Definitely So Likely Not Sure Likely Not Definitely Not

2. This draft Recommended Management Action (RMA) will result in an improvement to your life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade counties).

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I DO NOT SUPPORT ANY CLOSURE OF THE REEFS AND ANY NO FISH ZONES

5. Other comments or input:

ALL OF THE FISHING I DO THE VAST MAJORITY OF THE YEAR IS INSIDE OF 3 MILES. CLOSING THE FISHING IN THIS AREA WOULD PUT ME OUT OF BUSINESS. CLOSING FISHING IN ANY PORTION OF THIS AREA WOULD DO THE SAME THING. IF YOU WANT TO DO ANYTHING THEN HAVE BETTER ENFORCEMENT OF THE CURRENT NUMEROUS RULES THAT ARE IN EFFECT. NO CLOSURES OF THE REEF.

EXISTING FISHERIES MANAGEMENT
CARRIED OUT BY THE FWC IN THESE

5. Other comments or input:

I BELIEVE THAT MPA'S ARE NOT NECESSARY
FOR FISHERIES MANAGEMENT IN THE PROPOSED
AREAS.

I want to thank Bruce Marx once again for donating his valuable time to defend our fishing rights in Florida!!! Please take a minute to print this form fill it out and email or fax it back to Bruce ASAP. This is all he is asking in return now. I have been involved in this matter for several months now and I can tell you that the Save our Reefs group is SERIOUS about creating a huge series of no fishing areas between southern Dade county up to St Lucie inlet. If you think that's impossible, talk to people like Greg Stotesbury or Bill Shedd from AFTCO or any active fishermen from the California coast, if it happened there! At least one of the individuals involved in accomplishing it in California is involved in this movement on our coast. Please send your comments to bmarx@marlowadler.com or fax it to him at 305-446-3667

N-146 moves forward for consideration by state and federal agencies and possibly the legislature. public comments thereon will play an important role. I am concerned that there may be others like me who did not have an opportunity to express an opinion and to provide comment on N-146. Before any official action is taken on N-146, I think it is important that the involved government officials be apprised of as many comments/opinions on N-146 as possible. As a result, I am now providing this post and asking that everyone review it. I am also asking for everyone to take a moment and fill out the attached comment card (including the upper left indicating that it is for N-146), scan it and email it to me at bmarx@marlowadler.com. As was done during the Save the Bent Range Marker cause, everyone's comments will be archived and furnished to all of the public and private people who are involved in the N-146 issue. I think it is probable that everyone's opinion be reviewed and considered as this process moves forward.

As a recreational angler, I believe this is a critical issue that everyone should become involved in. I support conservation 100%. However, I also support the idea that conservation has to be based upon a thorough review of proper data, science and statistics before I am told that I can't fish in an area that I have fished all my life. I believe that such a review must be undertaken with respect to N-146 before any future fishing action is taken thereon.

In the coming months, I'll be sharing information on this issue both on Facebook and through emails. For those of you who are not on my email blast from the Bent Range Marker and Bring Back Bug Light causes, and would like to be placed on the distribution list, please email me and I will do so. Also, due to my lack of proficiency on Facebook, I can't attach N-146. However, if you email me and I request a copy, I can

OUR FLORIDA REEFS' PROPOSAL N-146 RECOMMENDING THAT 20-30% OF THE REEFS FROM ST. LUCIE INLET TO THE NORTHERN BOUNDARY OF BISCAYNE NATIONAL PARK BE CLOSED TO FISHING

Dear Fishing Community:

I recently became fully aware of N-146—the action being proposed by Our Florida Reefs ("OFR") for the implementation of certain Marine Protected Areas (MPA's) which include no-take (no fishing) zones. The following bullet points relating to potential no take zones are contained within N-146:

*Protect 20-30 percent of coral reefs and each type of associated representative reef habitat in the Southeast Florida Coral Reef Initiative (SEFCRI) region from extractive use (no take)

*Protect 20-30 percent of coral reefs in the OFR region of interest from extractive use (no take)

The OFR "Region of Interest" extends from the St. Lucie Inlet to the northern boundary of Biscayne National Park. It also extends from "Mean High Tide to 3 miles offshore"

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So

Likely

Not Sure

Likely Not

Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

We can protect our reefs and not have to close them off completely to fishing. This is a drastic measure that will do nothing. Propose no anchor areas and install various mooring buoy.

5. Other comments or input:

There is no way to police this. Instead of closing the reefs, that so many people enjoy and live off of, think of ways that people can still enjoy and not damage the reef.

Likely Not

Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Rather than closing the reef to recreational anglers + divers, we should focus on water quality. - The Real Problem!!!

5. Other comments or input:

There is no scientific proof that these closures will help the reef. The FWC needs to continue to enforce + protect our local waters. I support conservation but complete closure of 20-30% of the reef will affect the marine + tourist industry as a whole. Alternative solutions need to be considered.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Clean up the sewage discharged on our reefs; Adopt a "Reef Ball" program like Gulf coast; Restrict Commercial catch limits rather than recreational angler that really only gets out on water 2nd-times per month

5. Other comments or input:

Communicate to recreational anglers in a more transparent way. The commercial fleet's lobbyists are powerful & well funded... doesn't mean they are looking out for the "Reef's Best Interest". Stop picking on the recreational angler just because we don't have the same amount of lobbyists,

. What do you support, or how could this RMA be changed to an action you could support?

I support placement of anchor buoys on reef sites, elimination of lobster traps on the reef,
prohibition of port dredging and channel deepening in south east Florida, additional artificial
construction, removal and mitigation of sediment caused by PortMiami deep dredging.

. Other comments or input:

See attached sheet.

Addendum to reef questionnaire N-146

The document refers to “user conflicts” many times as a reason to establish closed MPA’s along south Florida’s reef tract. In the decades of my experience in these waters have I rarely witnessed “user conflicts”. At times, dive operations have come into conflict with recreational fishing vessels while using **artificial reefs**, but I have never seen user conflicts regarding the reef tract.

N-146 repeatedly describes the south Florida reef tract as “degraded and altered”. This is true, but the true causes are not related to fishers and divers. Scientist around the world document the same stresses found on south Florida’s reefs. The cause is multifaceted but mainly caused by global warming. Rising ocean temperatures cause the algae that live symbiotically in coral to die depriving coral of its food, oxygen and carbonates needed to build its exoskeleton. Coral bleaching also weakens the animal and should it not die, leads to much higher incidences of white and black band coral disease.

Additionally, as levels of anthropomorphic caused carbon dioxide enter the oceans, levels of carbonic acid increase hindering coral and other shelled sea creatures, the ability to extract calcium carbonates from ocean water to build their shells.

The third and much overlooked killer of coral is again man made, oxybenzone, a chemical found in sunscreens. Oxybenzone causes endocrine disruption, DNA damage, acceleration of coral bleaching and eventually coral mortality. The chemical is so potent that at levels of 62 parts per trillion (equivalent to one drop in an Olympic size pool) it is toxic to corals. One need only extrapolate out how many people daily use 120 miles of south Florida’s beaches to understand how large a problem this is.

Stated objectives of N-146 imply that closing large swaths of reef to recreational anglers (extractive uses), “**could**” replenish the reef system, increase spawning potential, protect habitats from fishing damage and build resilience. The operative word here is “**could**”. Science and fisheries management does not ever impose, and especially as draconian a plan as N-146, on users and resources because the plan, “**could**” bring improvement. By law, managers are NOT allowed to proceed with rule making on the hunch that the proposed plan “**could**” be successful.

Using the extensive MPA at Dry Tortugas, that has been in existence for the past 10 years, as proof that the proposed series on MPA’s along the south east Florida coast will work, is like comparing apples and oranges. The Tortugas reserve lies at the convergence of the Gulf of Mexica and the Florida Straits. The area is bathed in currents and upwelling of cool water. Coral bleaching is at a minimum. The area is very large and contiguous, historically holding the sites

of many spawning aggregations of reef fish. There is no doubt that the Tortugas Reserve has been successful.

On the other hand, H-146 proposes 20-30 percent of south east Florida's existing reef tract be declared off limits to recreational (there is essentially no commercial finfish fishery left in this area) fishers to increase spawning potential, grow numbers and size of fish and restore the reef to its original state. H-146 declares that fishers, "**could**", catch more and bigger spillover fish outside MPA's, and more absurdly:" create jobs, maintain local livelihoods and safe guard south Florida's culture and lifestyle".

H-146 **WOULD** effectively destroy jobs starting with the for hire charter fleet, tackle stores, marinas, boat dealers and boat maintenance companies and south Florida's world class fishing tournaments, as well as all the trickle-down economics that go hand in hand with south east Florida's expansive and economically vital recreational boating and fishing culture. The sponsors of H-146 should have asked the National Marine Manufacturers Association (NMMA) their thought on the economic effects of large scale closures of our reef tract. Surely the answer would not have been pretty!

Finally, H-146 states that the proposed MPA's located between Stuart and Key Biscayne represent a "small" part of fishable Florida waters, and fishers could fish in other locations. That is true, but tell that to the owners of 100 thousand registered boats that call south Florida home. To see what large scale coastal closures can do to communities one only need to look at California to see how their MPA program has destroyed the for-hire and recreational fishery along the coast. Economically, it has been a disaster with no way out as these "temporary" MPA's have now been made permanent.

Captain Dan Kipnis

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I do not support the closure of 20-30% of the reef.

FWC is doing a fine job in the fisheries management.

Once you take 20-30% of the reef the other areas will ^{over} be fished and you will

5. Other comments or input: want to then close these areas.

4. What do you support, or how could this RMA be changed to an action you could support?

Give the local marine patrol (F/W/C) the proper funding to enforce the laws that are already in place. If you create these zones with no one to enforce them then you are only penalizing the ones

5. Other comments or input:

that follow the rules now. Enforce the size limits and seasons of the fish and resources we have ~~in~~ in place now and these areas won't be needed. Create these zones with no enforcement and you create a fish farm for those that don't follow the rules now. The job should be to manage the resources not take them away from the people. A complete failure shuts down, a winner will manage his or her resources to sustain a healthy environment. Our resources are being managed by failures and it's not okay.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Reefs could be better protected through
the use of mooring buoys and anchorage
restrictions as used in Florida Keys popular

5. Other comments or input:

The areas of proposed restricted areas are vitally
important to the fishing diving and recreational
Boating industry and tourist industry in Southeast
Florida. Limited take zones and
regulation by the FWC can clearly lead to a
balanced approach rather than a crippling NO
TAKE ZONE.

3. Definitely not
- 4

I can support a timed closure per species passed on there spawning habits. I could also support a slot sizing on more species , or a higher minimum size limit on species.

5.

I believe that the information gathered and proseed has little to none scientific fact. I believe that a closure in any affect , as seen in the past, is a closure that will never be opened. Do closing down species to help them repopulate help the species as a whole , yes. Unfortunately the state has a long standing track record of never reopening these laws. I'm also for a better state funded tagging program. Not just on a particular species but on all fish released. You can make the community involved by giving out tags when each person renews there license. To keep people tagging you can do a month raffle on the tags that where recaptured. Giving both the original tagger , as well as the captured angler a prize. We as a community need to take strides to ensure that the oceans are left in a better state then we found them. Only through knowledge , true unbiased information , and a joined effort from all parties involved will this goal be reached. As long as one side feels they are being misinformed , mistreated , and misguided , we will never be able to achieve the common goal.

Thanks for all the help Bruce.

This community is made up of some very wise individuals and I believe with the right guidance we can make a difference that our grandchildren will be proud of.

Nick Adams.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I am in favor of proper management of our reefs, and I understand that change is necessary. However, I vehemently oppose ANY action taken by the governing bodies through evasive procedures aimed at avoiding community involvement.

I am in support of a management plan derived from fact based scientific research that has been properly noticed, discussed, and negotiated by a panel with a broad array of interests represented including government, environmental and conservation groups, recreational fisherman/divers, and boaters, as well as commercial fisherman/divers to name a few.

5. Other comments or input:

Something must be done regarding notice to the community of proposed actions before they are implemented. This is not the first time that we have been caught off guard by a plan of action that is already underway.

RMA #: _____ Name (optional): ^{Capt} Joseph Fingiel Email (optional): SitVtrHick@aol.com

What best describes your interest in the reef (circle all that apply): FISHING DIVING BOATING PROTECTION OTHER

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

Definitely So Likely Not Sure Likely Not Definitely Not

2. This draft Recommended Management Action (RMA) will result in an improvement to your life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade counties).

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Closures must often prove to be beneficial to the environment. However, they are only extreme measures to avoid real problems. I could support well researched temporary closures for spawning seasons for select reef fishes of concern.

5. Other comments or input:

I truly believe the most significant negative force on our reef ecosystems is fresh water runoff in conjunction of other contaminants. The Kissimmee, Okechobee, and Everglades water management needs to be thoroughly addressed and dealt with. No one seems to want to pursue this because there's too much at risk monetarily. Instead, they punish the public and reduce our usage. Big Sugar only makes money for themselves and the politicians whom vote in their favor. Our Florida resources bring money to the entire state. Let's finally realize what is more valuable.

RMA #: N-146 Name (optional): Jeff Scott Email (optional): Greenettatum@aol.com

What best describes your interest in the reef (circle all that apply): FISHING DIVING BOATING PROTECTION OTHER

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Improvement of water quality first

5. Other comments or input:

Fishing closures will not help the current reef situation
In no way shape or form. water quality! Such as removal of
outfalls, Lake discharges, and diverting rain water runoff, will
fix everything!

I think it may be reasonable to change bag limits and sizes if the science backs it up but closing down such large portions of the reef without any science to back up the claim that is necessary is very extreme and makes no sense.

5. Other comments or input:

The main threats to our reefs are not from fishing activities. You will be taking away a lot of peoples livelihood, and taking away from the recreational fisherman.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Denying access in any manner to our reefs is destructive to our recreational community and local economy. I would suggest compromise such as buoy balls, no anchor zones, etc but not deny access.

5. Other comments or input:

Close 15% of our reefs today and it might be 75% in a few years. This act opens a can of worms which would strip us of our freedoms.

RMA #:

Name (optional): Brent Feler

Email (optional): _____

What best describes your interest in the reef (circle all that apply) FISHING DIVING BOATING PROTECTION OTHER

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

Definitely So Likely Not Sure Likely Not Definitely Not

2. This draft Recommended Management Action (RMA) will result in an improvement to your life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade counties).

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Dredging, pollution, anchors, Nuclear reactor leakage, and
urban encroachment all have more of an effect than dredging.
These closures will only hurt local businesses and
the Miami economy.

5. Other comments or input:

Using other national parks as an example, there are
additional aids to preservation such as poles, dredging management, and
building operations management that will have a larger impact
on the bay.

RMA #:

comment.

5. Other comments or input.

Personally I do not trust any issues designed and monitored by any agency of the government, via enforcement agencies, committees, or interested parties, appointed to some type of governorship position.

My experience has been that once the decisions have been made to ban, or eminent domain, or remove for conservation; it has generally been 'the wolf in sheep's clothing', just getting started in the impact area.

My observations indicate that once approved for 'minimum impact', with maximum results the 'agency' never goes away and grows exponentially to the point of abandonment of the primary purpose. EG: Department of the Interior, Forest Service. BLM and many others that I am unaware of.

Thanks again for the opportunity to comment on this issue. Mike Wicks, Satsuma, FL 32189

RMA #: _____ Name (optional): Nelson D. Fonseca, P.E. Email (optional): nfonseca8@gmail.com

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Use sound scientific data and research to come up with a plan. Have the FWC oversea management
as they know the areas better than an outside Federal entity.

5. Other comments or input:

This closure will severely affect the recreational boater, marine and tourist industry.
FWC has done a great job managing grouper populations by implementing seasons and size/bag limits.
and I trust that they would use Scientific data to improve the reef system with management, not
Closures.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I support the no anchoring - I support closed seasons for fish species that are spawning but only for the months that they spawn.

5. Other comments or input:

I do not support closing down large areas for any time period. Increase law enforcement exposure. More spot checks on the water. Closing areas off only puts more people into smaller areas creating more pressure to these areas and also tension between the people using these areas!

None of the recommended Management Actions are acceptable

5. Other comments or input:

Over my lifetime every single plan proposed by any of the Department of interior /NPS/USWS/NPS/ Biscatne National park have all resulted in loss of access and Use. The crocodile sanctuary was supposed to be temporary we now have lost any chance of re-established motorized access, the Goliath Groper has made a huge comeback yet fishing is still prohibited. Stitsville has been lost to the public unless you are a special person and can afford a tour The Big Cypress National Preserve has twisted all the rules so that it is no longer manged as intended by those who fought for the Preserve. ENP refused to modify rules in the Back Contry of Florida bay to allow airboats which would be far less impacting on the grass beds. History has shown us there is no legitimate reason to allow any further mangment by Biscayne National park or Any DOI agency. We have many more resons if needed for examples a decline any further actions to lock up any lands or waters

4. What do you support, or how could this RMA be changed to an action you could support?

None of the RMAs are acceptable.

5. Other comments or input:

It's been my experience over the last 45 years that most efforts for improvement by the Department of the Interior, NPS, Biscayne National Park, Big Cypress NP to name a few, have resulted in permanent closure of access points, areas of interest, modes of traverse, and even specific species. Most that state they are temporary closures end up never reopening.

DEFINITELY SO

LIKELY

NOT SURE

LIKELY NOT

DEFINITELY NOT*

4. What do you support, or how could this RMA be changed to an action you could support?

Closing reef areas to public use should be the last thing attempted. This RMA should be scrapped until other actions are taken. If the reef closures were to happen, I may consider joining others in a legal class action with others as I no longer could run the business I've been in for 30 years, and I could no longer enjoy the reefs as I've done personally my whole life.

5. Other comments or input.

OFR has stated "facts" that have lead them to this proposal.

1. "our corals and fish are being impacted by pollution, poor development practices, climate change and unsustainable fishing practices". AGREED. The only thing our state and federal government have done successfully regarding these general items is develop fisheries management practices that, in many cases, WORK. Research, evaluation, education, and enforcement have been progressive in helping protect our marine resources.
2. "Floridians have chosen to protect their natural resources". TRUE, regarding banning offshore oil drilling(for the time being), but FALSE regarding many ongoing atrocities being committed against our marine habitats and environments. Our Florida and federal government and agencies have failed miserably in addressing *agricultural run off, dumping of huge volumes of fresh water, horrible dredging practices in our inlets (to bring in bigger tankers) and allowing sewer outfalls to pump millions of gallons of treated sewage on our reef lines.*

3. "We do not need more research and data before we can take educated action to protect our coral reefs". TRUE. What we really don't need are well meaning organizations like the OFR to look at the same data all the agencies already have and make proposals that don't address the true causes, and *don't really challenge our governing agencies to do ANYTHING*. Recommending closing reefs is way easier than fixing the underlying causes.

I've been fishing and diving off South Florida for over 50 years. I absolutely don't feel recreational fishing and diving have contributed nearly as much as the other issues. It's obvious the OFR has admirable intentions. I personally think they are wasting the resources they have developed by not addressing the above mentioned issues first. I will stand at the front of the pack to fight the ongoing abuses, and also fight closing reefs at this time.

Captain Wayne Conn

4. What do you support, or how could this RMA be changed to an action you could support?

A plan to study the waters and quality of waters flowing into Biscayne Bay, the effects of deep water ingestion of untreated sewage on the reefs. The complete closure of Bay nets in Biscayne Bay.

5. Other comments or input:

It's obvious that the reefs are suffering in South Florida. But there are many other reasons than recreational fishing. I would recommend that all fishermen would be educated on size limits, especially shore line anglers who take many smaller fish. I would not be opposed to mandatory courses for all boaters that define proper anchoring near reefs, safety and how to read water color so as to not run aground and damage habitat. Anchor Bays better maps, no lead zones for anglers. The RMA is like blaming hunters for three mile islands.

What best describes your interest in the reef?

FISHING

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

LIKELY

2. This draft Recommended Management Action (RMA) will result in an improvement to you life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

DEFINITELY NOT

3. Do you support this draft Recommended Management Action (RMA)?

LIKELY NOT

4. What do you support, or how could this RMA be changed to an action you could support?

It is difficult to argue that closing off portions of the reef would not be beneficial to certain fish stocks, but this action is a Band-Aid and not a solution to long-term conservation efforts. Education and enforcement are what will bring long-term stability to reefs. Also, as a recreational angler our footprint is so small that removing us from the equation doesn't move the needle. I would be in favor of commercial no take zones but allow recreational anglers to enjoy what limited time we have on the water.

The problem on our reef, estuaries and everglades, is not caused by overfishing. But by toxic outflow caused by sewage, algae blooms, fertilizers, etc.

What best describes your interest in the reef?

FISHING
BOATING

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

LIKELY NOT

2. This draft Recommended Management Action (RMA) will result in an improvement to you life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

DEFINITELY NOT

3. Do you support this draft Recommended Management Action (RMA)?

DEFINITELY NOT

4. What do you support, or how could this RMA be changed to an action you could support?

As an environmental scientist, I, too, want to see data. Strictly changing zones to “no fishing” zones does not always preserve fish populations or increase them. There are many factors that should be looked upon to preserve reefs, starting with water quality. They need to address runoff, in my opinion. I see a concern with closing certain fishing areas and that only populating nearby fishing areas. This is a problem that if not handled properly, could be a domino effect.

5. Other comments or input.

Found this article. The first sentence floors me.

“Currently, when fish populations do not rebound as expected, fishery managers respond by controlling what they can -- fishing levels -- even though other factors may be stalling the recovery.” They impose even stricter fishing limits in an effort to meet the federal deadline, which leads to more severe economic effects for fishing communities. If instead managers could implement recovery plans to keep fishing at a reduced but consistent level until the fish populations recover, there would be fewer harmful economic impacts because the fisheries wouldn't be subject to major, unanticipated dips in fishing limits.

Fishery managers could also take action earlier, imposing gradual limits when fish populations start to drop rather than waiting until they are overfished. Then they could avoid rebuilding plans -- and the strict fishing limits that come with them -- altogether.

-- Sara Frueh

Evaluating the Effectiveness of Fish Stock Rebuilding Plans in the United States. Committee on Evaluating the Effectiveness of Fish Stock Rebuilding Plans of the 2006 Fishery Conservation and Management Reauthorization Act, Ocean Studies Board, Division on Earth and Life Studies (2014, 154 pp.; ISBN 978-0-309-29230-6; available from National Academies Press, tel. 1-800-624-6242; \$50.00 plus \$5.00 shipping for single copies).

The study committee was co-chaired by **Ana Parma**, research scientist, CONICET (Council for Science and Technology of Argentina), Buenos Aires, and **Patrick Sullivan**, associate professor of quantitative population and community dynamics, department of natural resources, Cornell University, Ithaca, N.Y. The study was funded by the National Oceanic and Atmospheric Administration.

4. What do you support, or how could this RMA be changed to an action you could support?

I can support no-anchor zones at reefs that have been damaged but have a good chance to recover. I strongly support protection of spawning aggregations in applicable seasons.

5. Other comments or input:

This proposition is too full of "can" and "could" because there's little or no evidence that it will or would meet the worthy objectives by the means proposed. N-146's anticipated benefits are wishful thinking. It is beyond absurd to claim N-146 "could" help anyone to maintain his livelihood, create jobs + "safeguard South Florida's culture and lifestyle". That kind of outrageous hyperbole casts doubt on the entire proposition.

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I would support closures during the spawn, more anchor buoys, increased natural clean fresh water flow, more public education on how to safely enjoy the reef system, slot limits vs closures.

5. Other comments or input:

I will rarely ever agree with complete closures. Closures shift pressure to other areas. Recreational fishing and diving have little affect on populations. Lowering lobster bag limits will bring more pressure back to the keys. I've enjoyed the FL reef system my entire life and work in the fishing and boating industry.
Closures will affect tourism and revenue that can be used to improve the system in ways that will allow all to enjoy for generations to come.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I don't support the proposed plan. I would support increased enforcement & fines for polluters and litterers.

5. Other comments or input:

As a holder of a lifetime fishing license and frequent boater in South Florida waters, this proposal would have a significant NEGATIVE affect on my quality of life.

Subject: Comment card (let me know if it works?)

Bruce,
I currently do not have a way to print as I am injured and stuck on couch for a few weeks.

Mike said you would fill out card though if I had email

My dad whom is 72 and a broward resident also and I just both went over the cards and we hope you could fill 2 out
The names will be
David Severns Jr and
David Severns III

This is about N-146

First question.... Fishing

#1 likely not
#2 definetly not
#3 definetly not
#4 can't

My dad and I would both like to add that current regulations if enforced will preserve our reef and fish for the future. Closures only keep people from falling in love and caring about things.

If there is anything else I need to do
Please let me know.

Thanks

3. Do you support this draft Recommended Management Action (RMA)?

DEFINITELY NOT

4. What do you support, or how could this RMA be changed to an action you could support?

I support stopping cruise and cargo ships from dumping their waste in the ocean. I support stopping the Corps of Engineers from digging canals all across Florida which allows all the inland waters and its contaminants to reach the ocean. Send the water back to the Everglades where it belongs. I also think we need to check on where and what the large municipalities do with their waste.

5. I believe the contamination of the reefs has nothing with the fishermen, boating or diving.

Thank you.

I am Linda Reedy, "the Lady Salefish" Broker for Salefish Real Estate llc. I sell the waterfront lifestyle; leaving your dock, going up the Intracoastal through Hillsboro inlet to the gorgeous ocean waters. My clients who have boats and dive/fish in these local waters purchase waterfront property. This would be a detriment to my business and many other dive shops, fishing charters, marinas, boating and tackle suppliers, boat dealers, etc..not to mention the impact on families raising their kids here. The benefits of where we live cannot be taken away from the families who do these activities on weekends, spending time on the ocean with everything it has to offer. My daughter 16, drives boats, catches and cleans fish and is a part of our lobster season team. This is what we do. We do not abuse it. It's CRAZY to allow this proposal to go forward. This would mean no more taking of lobster or spearing a hogfish for dinner. You can't catch lobster 3 miles off shore; not on scuba, free diving or snorkel. Lobster seasons and limits are already in place. This action if passed will cause business coming to our area to take their business else ware.

DEFINITELY SO LIKELY NOT SURE LIKELY NOT **DEFINITELY NOT**

4. What do you support, or how could this RMA be changed to an action you could support?

There are many other issues that should be addressed first, before the N-164.

Corals are dying because of sewer outfall, polluted freshwater, anchoring.

Closure is a 'last resort' AFTER addressing the preceding issues.

5. Other comments or input.

Perhaps put limits on commercial fishing, and encourage more catch and release.

Having issues with PDF here is my Responses:

JohnBob Carlos

Email: PMitcfernandez@gmail.com

Johnbocarlos.com

Evergladesgallery.com

Describe me: Fishing, Protection, Activist, & Photographer

1. Not Likely

2. Without Access there is no ownership, and education to protect. Disagree with remove of access it has never improved, nor brought back an area. Everglades National Park case in point. Hunting has been removed for over 30 years now. Where are all the Deer?

3. Do not support everything on the draft

4. What I would support a plan that looks to address real issues like water issues, environmental issues, stocking programs, education, and so on....not one that wants to isolated the land.

4. What do you support, or how could this RMA be changed to an action you could support?

Slot limits on fish sizes, limited fishing seasons on specific fish species that are low in stock.

5. Other comments or input:

Closing these areas would be detrimental to the charter boat industry, commercial and recreational fisherman.

I think more research should be done and more input from the commercial charter boat and recreational fisherman should be given.

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

Definitely So Likely Not Sure Likely Not Definitely Not

2. This draft Recommended Management Action (RMA) will result in an improvement to your life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade counties).

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I believe that restriction on recreational angling will have little to no impact on the health of the reef systems in SWF. As a life long angler from Key Biscayne I have seen the effects of

5. Other comments or input: my actions on Biscayne Bay and the offshore reefs, and it has been negligible. Commercial fishing has a massive impact, but private boats taking a small bag limit of fishes has little. In my opinion this action will severely harm tourism and the local fishermen that have lived here for years and depend on the fishery for pleasure, enjoyment, and to a smaller extent, employment.

Sincerely

GLENN Savage, CHIEF ENGINEER, UNLIMITED HP

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?
Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?
Designate multiple smaller no-fish areas/zones along the Fl. East coast like ½ of size of Pennekamp in Key Largo, which makes more sense. Then rotate those areas to fishing every few years. This will mitigate constant fishing pressure in the same spot over and over. It will give the areas a chance to recover.

5. Other comments or input:
As far as the coral reef is concerned, I think water quality issues play an important role in the decline of our reefs. Yes, fishing pressure has something to do with it, but I feel that the powers that be are missing the bigger picture which has to do with water quality. For example runoff from nutrient rich water from the mainland is a big issue. That runoff has a bunch of fertilizer and chemicals in it. I believe that is having an impact on our reefs. Just look at what the Lake Okeechobee runoff has done this summer on both the east and west coasts. Sport fishing does not decimate our reef ecosystems. Commercial overfishing is much worse. Look at how fish populations rebounded when commercial gill nets were banned. I am not bashing commercial fisherman, as they too have to make a living. We need a better management plan for commercial fishing as well as sportfishing. Shutting everyone out is not the answer.

4. What do you support, or how could this RMA be changed to an action you could support?

The only way I could support this RMA is if instead of a complete closure it just made recreational and commercial regulations more strict. I believe commercial fishing has a much larger negative impact on fishing than anything else. More strict and limiting regulations on commercial and recreational fishing would greatly benefit the ecosystem of the reef without taking away jobs and impacting the local economy.

Hi Bruce,
Please find my comment card reply below. Thank you.

What best describes your interest in the reef? A: Protection and fishing.

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

A: Not sure.

2. This draft Recommended Management Action (RMA) will result in an improvement to you life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

A: definitely not

3. Do you support this draft Recommended Management Action (RMA)? A: definitely not

4. What do you support, or how could this RMA be changed to an action you could support?

A: I support the overall goal of protecting reef ecosystems, however, the proposed action for 20-30% closures of state waters and the No-take zones are drastic measures that should only be implemented when less intrusive actions have failed. Implementing no-anchor zones shorter harvest seasons for certain species are one example which can have significant positive impacts while being less restrictive to the recreational fishing community. Furthermore, the proposed action provides no guidelines for future management of these areas. It can be assumed that once the MPA is enacted, it will remain so indefinitely regardless of a positive or negative impact on the reef, local economies or tourism industry of south Florida. Again, an example of a less restrictive plan would provide guidelines for a probationary period of say 3 years for example, until there is tangible evidence of the broad impact the MPA is having on the reef, economy and culture.

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I support protecting the reefs but through installing more reef balls or adding more artificial reefs to provide more habitat and recreational opportunities. Closed areas do nothing more than create un-enforceable zones (too many for FWCS small staff).

5. Other comments or input:

I work in the Marine Industry & depend on our reefs and waterways to remain healthy and viable. I have been diving the reefs on the East Coast for about 12 years and feel their greatest threat is improper beach renourishment, & water quality issues. Not fishing or diving, if fishing is depleting the resource than the proper thing would be to modify limits, etc. Not shut everything down to access. Proper management is key!

What best describes your interest in the reef?

FISHING **yes**

DIVING **yes**

BOATING **yes**

PROTECTION **yes**

OTHER My small business relies on a healthy reef system and the ability to actively fish that reef system. I own Saltwater Professional Consulting and have lived in Florida for 32 years. I am the IGFA (International Game Fish Association) School Of Sportfishing Co-founder and TBF's (The Billfish Foundation) Conservation Ambassador.

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

DEFINITELY SO

LIKELY

NOT SURE

LIKELY NOT

DEFINITELY NOT **Definitely not. I am firmly against the recommended RMA.**

2. This draft Recommended Management Action (RMA) will result in an improvement to you life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

DEFINITELY SO

LIKELY

NOT SURE

LIKELY NOT

DEFINITELY NOT Definitely not. It will have a negative affect on my life and livelihood.

3. Do you support this draft Recommended Management Action (RMA)?

DEFINITELY SO

LIKELY

NOT SURE

LIKELY NOT

DEFINITELY NOT Definitely not. I do not support the RMA!

4. What do you support, or how could this RMA be changed to an action you could support? **I support Science based solutions to the problem and common sense fisheries management like increased minimum size requirements and changes to bag limits and no take seasons for certain species. Water quality is the number one issue that should be addressed.**

5. Other comments or input. **I believe water quality issues are far more crucial to the health of our reef systems. Our Florida Reefs and all other organizations or individuals should be putting all their energies and resources toward that issue. These issues include destructive dredging practises and projects in our ports and inlets, Lake Okeechobee discharges and the pollution created by big sugar and big agriculture, storing and cleaning the water and moving it south through the Everglades and stopping the 360 million gallons of semi treated sewage that is pumped directly onto our reefs at five outflows up and down the East coast of South Florida. Not to mention the pesticides, weed killers and plastics that get washed onto our reefs everyday. Fishing is the least of the reefs problems. I will not support the closures!**

What best describes your interest in the reef?

FISHING
DIVING
BOATING
PROTECTION
All of the above.

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

NOT SURE

2. This draft Recommended Management Action (RMA) will result in an improvement to you life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

NO

3. Do you support this draft Recommended Management Action (RMA)?

LIKELY NOT

4. What do you support, or how could this RMA be changed to an action you could support?

Stop commercial fishing and especially trapping, and put in mooring balls. Anyone who has ever snorkels the reefs off south Florida sees the only damage is done by dragging traps and anchoring.

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I support NOT closing the reefs. I also support more thorough research on what is actually hurting the coral reefs as there are greater forces affecting them rather than catching fish.

Pollution, run-off, sewage, dredging, acidity and salinity, algae blooms, etc. are all much more

5. Other comments or input: dangerous to the health of our reef system.

4. What do you support, or how could this RMA be changed to an action you could support? **Anytime you remove the sportsman from the very ecosystem you are trying to protect, you lose your most valuable stakeholder. There is a multi-billion dollar industry in Florida that comes from recreational fishing - this industry will**

undoubtedly suffer a huge loss if the proposed closures to fishing take place. The proposed plan has, at best, slight face validity in how it discusses the benefit of closures and what a "no take" area is. A layperson not involved in a fishing/boating/diving lifestyle in south Florida may be swayed on the basis of the rhetoric presented in the plan. Unfortunately, there is a lot of empirical research that is still needed so that we understand the true effects of fishing/diving in the affected areas. It is my recommendation that valid and reliable measures be used to study the habitat and come up with solutions that do not include an "all or nothing" attitude towards conservation. Look at other ecosystems that have successfully brought back coral reefs and make decisions based on all of the stakeholders, not just one group or another.

5. Other comments or input. See #4 above

Definitely So Likely Not Sure Likely Not Definitely Not
4. What do you support, or how could this RMA be changed to an action you could support?
I do not support any restrictions on fishing. I support good science and education but to close areas to fishing based on whimsical science and data is ludicrous.
5. Other comments or input:
Man's probably the reefs enemy but you can't blame it on fishermen. It needs to start with illegal discharges and enforcing that. We shouldn't be pumping or dumping anything into the ocean. One sewer force main break and that's more damage to the reefs than any fisherman will ever do.

4. What do you support, or how could this RMA be changed to an action you could support?

I believe in conservation but will not support an action that closes a fishery. Manage our resources through appropriate legislation of the fishery.

5. Other comments or input:

It is my understanding that the research used in providing support for the closure of several of our fisheries was done ~~inappropriately~~ incorrectly. That does not help your cause.

4. What do you support, or how could this RMA be changed to an action you could support?

In my opinion there should be better enforcement of current laws & regulations. There is very minimal enforcement currently and there are individuals who knowingly abuse & break rules. I would like to see increased enforcement of

5. Other comments or input:

Current laws.
Like all other laws & regulations, the law abiding such as myself & other outdoorman, will always adhere to them, while other individuals will continue to ignore, break these new laws. We can continue to create new laws/regulations but without proper enforcement the law abiding ~~the~~ citizens are the ones affected.

I SUPPORT THE ENFORCEMENT OF RULES & REGULATIONS,
THAT CURRENTLY EXIST IN THESE AREAS. THERE NEEDS
TO BE MORE LAW ENFORCEMENT THAT GOES AFTER LAW BREAKERS.

5. Other comments or input:

MOSTLY NEW IMMIGRANTS THAT ARE "UNAWARE" OF THE REGULATIONS
THE NEW RULES WILL ONLY PUNISH ~~THE~~ LAW
ABIDING CITIZENS. THE LAW BREAKERS ARE MOSTLY
NEW "IMMIGRANTS" THAT DON'T FOLLOW THE LAWS
THESE ARE THE PEOPLE THAT CONTINUE TO BREAK THE LAWS.

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I will not support anything that suggests closing down fishing areas to any part of south Florida

5. Other comments or input:

There are several great ideas in these RMA's, however the suggestion of closing down fishing to improve the coral reefs is based on bad data collection techniques, we should be focusing our efforts on water quality issues.

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

More education on how responsible recreational fishing practices can improve fish stock in South Florida.

5. Other comments or input:

Ever since I was a child my family has fished off South Florida waters, for pleasure and to put food on the table.

Closing the reef will only encourage people to poach.

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Instead of creating MPA'S (marine protected areas) please consider
modifying fish bag limits or minimum sizes. Shutting down
areas of the reef only places greater stress on nearby areas and

5. Other comments or input: FWC does not have enough resources to watch all these
potential MPA zones.
