

# Florida Park Service 2016-2017 Resource Management Annual Report

A 550-ac aerial burn at Paynes Prairie.

Fuel reduction at Bulow Creek.

Nesting green sea turtle.

Timber harvest to remove off-site pines and restore longleaf pine at Falling Waters.

Removal of invasive titi to restore historic wet prairie at Deer Lake.

FLORIDA PARK SERVICE  
RESOURCE MANAGEMENT ANNUAL REPORT

July 2016 - June 2017

## 2016-2017 Resource Management Annual Report Executive Summary

### Prescribed Burning and Wildfires

- In Fiscal Year 2016-17, FPS had the third-best year on record for prescribed fire, burning 72,773 acres. This is 1,946 more acres than the previous fiscal year – 68.1% of the acres planned.
- The number of fire-type acres in rotation increased by 1.7%, totaling 183,193 acres.
- FPS conducted 277 prescribed burns, 168 less than the previous year.
- Forty-three wildfires accounted for 1,488 acres (2.07%) of the total acres burned.
- Of 89 parks with acres planned for prescribed fire, 82 conducted at least one prescribed burn.
- In Fiscal Year 2016-2017, 19 parks exceeded the minimum ecological target, eight more than the previous year.
- District One achieved 100% of its' planned goal.
- The Governor of Florida issued a statewide fire ban that lasted 60 days, April 11, 2017 – June 3, 2017.
- In Fiscal Year 2016-17, BNCR purchased, outfitted and distributed five new fire engines – one new engine for each District.
- FPS received a grant from Florida Forest Service for \$430,000 to make improvements to the prescribed fire program.

### Mechanical Treatment

- In Fiscal Year 2016-17, FPS set the new record for mechanical treatment, treating 12,528 acres in 46 parks for habitat improvement or fuel reduction. This is 11,230 more acres than the previous year – a 865% increase.
- FPS harvested 1440 acres of timber at six State Parks including Marjorie Harris Carr Cross Florida Greenway, Falling Waters State Park, Ichetucknee Springs State Park, Ichetucknee Trace, Wekiwa Springs State Park, and Torreya State Park.
- BNCR managed an internal mechanical treatment contract - \$840,000 to create/improve fire lines statewide and reduce fuels in more than 2,000 acres of backlogged fire-type habitat.

### Exotic Plant Removal

- In Fiscal Year 2016-17, FPS set the new record for infested acres of exotic plant treatment, treating a total of 15,436 infested acres. This is a 106% increase from the previous year, reaching 95% of its goal for the year.

- According to the Natural Resource Tracking System (NRTS) Survey Trends Report, the Total Infested Acres division-wide increased by less than 1%.
- In Fiscal Year 2016-2017, 32 project submittals were approved for funding through FWC's Upland Invasive Plant Management Program. A total of 3,473 infested acres were treated using FWC's UIPMP contractors.

### Exotic and Nuisance Animal Removal

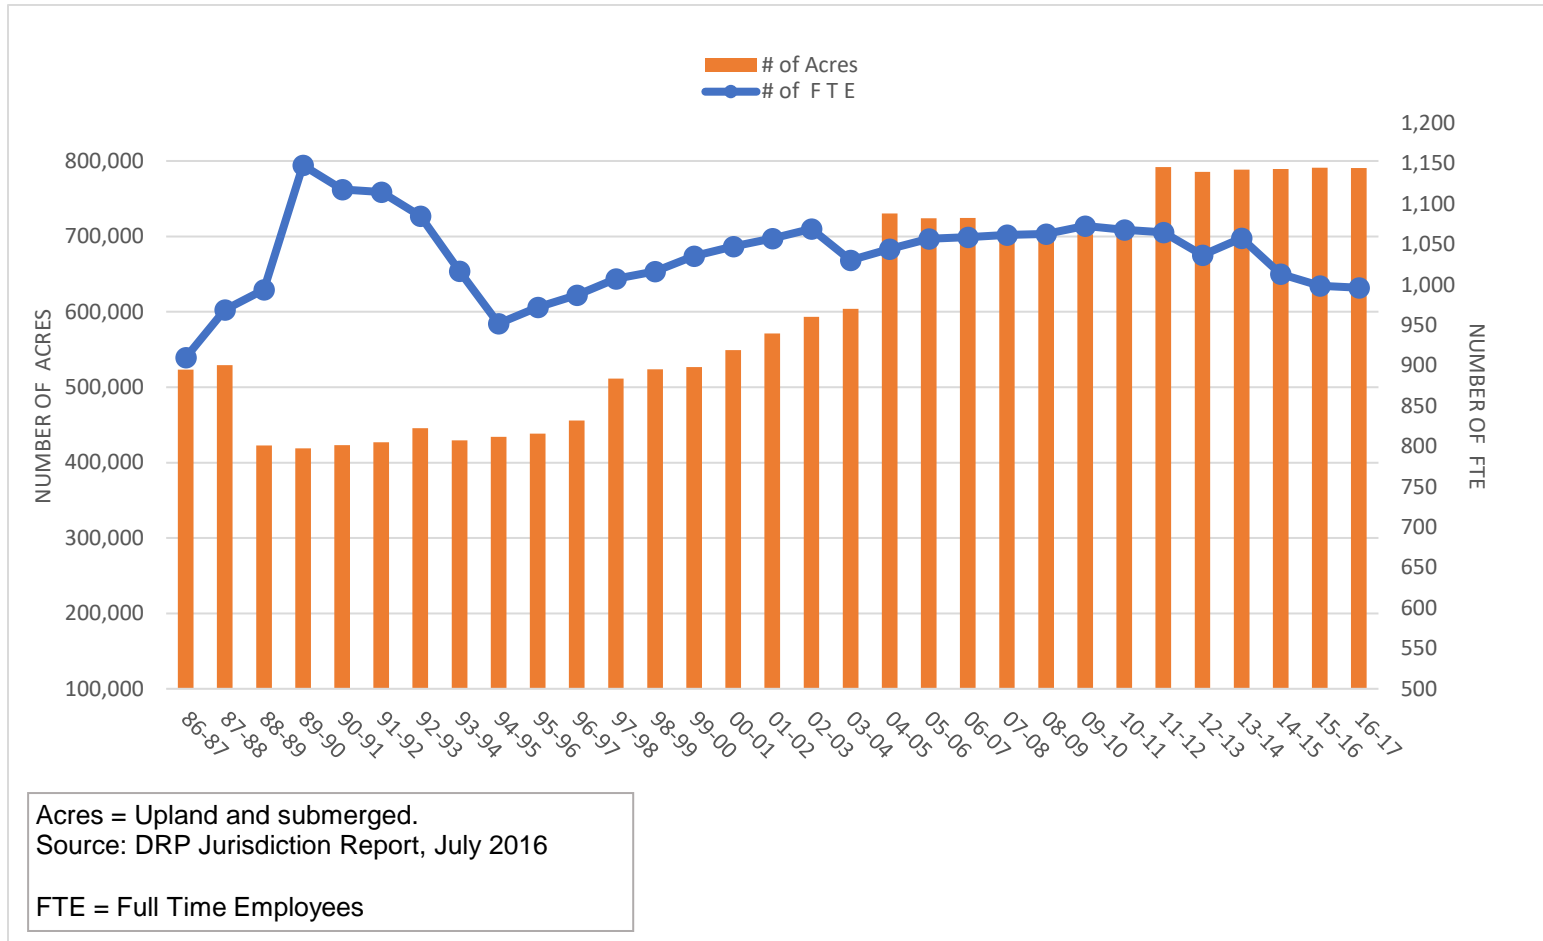

- In Fiscal Year 2016-17, FPS removed 3,109 feral hogs from 47 parks, a 34% increase from the previous FY which had 2,322 hogs removed.
- When analyzing by vertebrate class, herpetofauna (amphibians and reptiles) consistently represent the greatest variety of nuisance (native or exotic) species removed from State Parks. Among herpetofauna, the green iguana represents the greatest number of animals removed.
- The raccoon represented the greatest number of nuisance native animals with 402 removed.
- Feral hogs consistently reflect the greatest number of mammals removed with 3,109 hogs removed.
- The number of feral cats removed decreased from 196 to 91.

### Marine Turtle Nesting

- A total of 7,710 nests were reported on state park beaches; an increase of 20% from the previous year.
- FPS surveyed 107.9 miles of beach in 41 state parks, or adjacent property.
- On average FPS surveyed beaches had 71.5 sea turtle nests per mile of beach.
- In Fiscal Year 2016-17, FWC reports that 1 out of every 18 sea turtle nests laid on the beaches of Florida was in a state park.
- Nest predation was 12% statewide, a 1% decrease from the previous year.
- A total of one suspected Kemp's Ridley and two hawksbill nests are in the process of being confirmed.
- Nests lost to beach erosion increased from 1,312 nests in 2016 to 2,203 nests in 2017, an increase of 68%. This is due in large part to the storm activity caused by hurricane Irma, which impacted nearly the entire state of Florida.

## Comparison of Staff to Acres Managed

The chart below shows the changes over time in the number of full-time staff compared to the number of acres under the jurisdiction of the Division of Recreation and Parks.

**PLANNING AS OF JULY 1**

**Fire-Type (FT) Acres:** Includes all natural communities where fire is an ecological process and any other zones being managed with fire.

**FT Acres in Rotation:** Fire-type acres that do not exceed maximum Fire Return Interval. That is, acres that are not backlogged. Formula: Fire-Type Acres less Backlog Acres.

**FT Target Acres:** Range of fire-type acres that need to be burned to remain in rotation. Formula: Sum of Acres by zone divided by maximum / minimum fire return interval.

**FT Acres Planned:** Fire-type acres in the fiscal year plan for burning. Formula: Sum of Annual Planned Acres.

**ACCOMPLISHMENTS - ACRES BURNED (RX / WILDFIRE)**

**Total:** Acres burned during the fiscal year, showing both prescribed and wildfire.

**Quarterly:** Acreage burned during each fiscal quarter, showing both prescribed and wildfire.

**Burn Count:** Number of prescribed fires and wildfires during the fiscal year. Each entry with a FFS Authorization counts as a single prescribed burn. Each entry with 'Day of 1st Report' for wildfire counts as a single wildfire burn.

**EVALUATION (Figures are performance indicators during the year and statistically valid on June 30.)**

**FT Acres in Rotation:** Acreage that would be considered in rotation if no further burning for the fiscal year is done.

Formula: Acres in Rotation (as of July 1) less acres that would become backlogged on June 30, plus acres burned during the fiscal year.

**% of Plan Met:** Percent of planned acres that were treated with fire. Formula: Annual Acres Treated Total divided by Acres Planned with a maximum value of 100%

## Florida Park Service Prescribed Burning History 1981-2017

**Notes About This Graph**

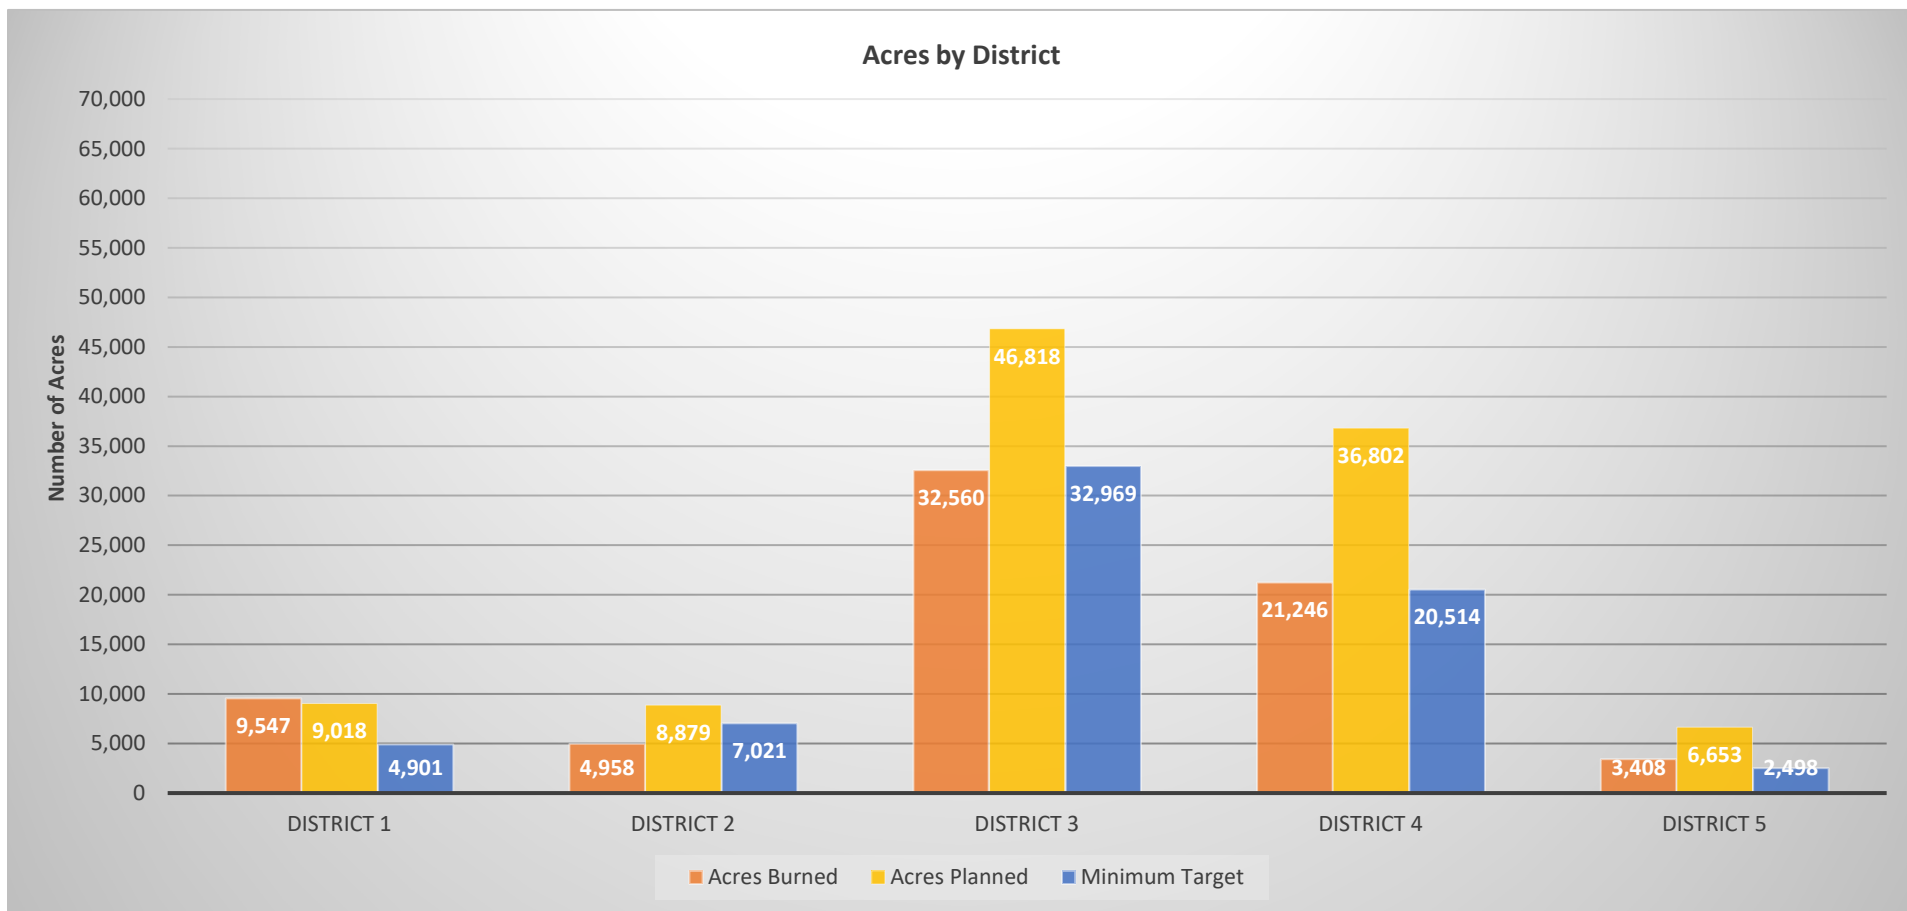

- 1981: FPS began systematically tracking fire program accomplishments
- 2005: Fire-type acres under management increased with the addition Office of Coastal and Aquatic Managed Areas properties
- 2005: Apparent increase in "Acres Planned" resulted from re-defining the plan to reflect ecological need rather than the operational plans
- 2007: Number of fire-type acres dropped significantly with the transfer of Tosohatchee State Reserve to FWC
- 2009: Began tracking fire management accomplishments with new, more accurate database; resumed tracking operational plans rather than ecological objective
- 2014: Greenways and Trails data were incorporated into the fire database adding nearly 30,000 acres of fire-type community.
- 2017: The Governor of Florida issued a statewide fire ban that lasted 60 days, April 11, 2017 – June 3, 2017.

# Florida Park Service Annual Fire Report

Fiscal year 2016-2017

## Burned, Planned, Minimum Ecological Target Acres by District

The graph below shows the number of acres each district burned compared to the number planned and the minimum ecological target. Acres burned are from both wildfire and prescribed fire. Minimum ecological target represents the number of acres that must be burned in order to maintain appropriate fire return intervals and healthy, biodiverse natural communities.

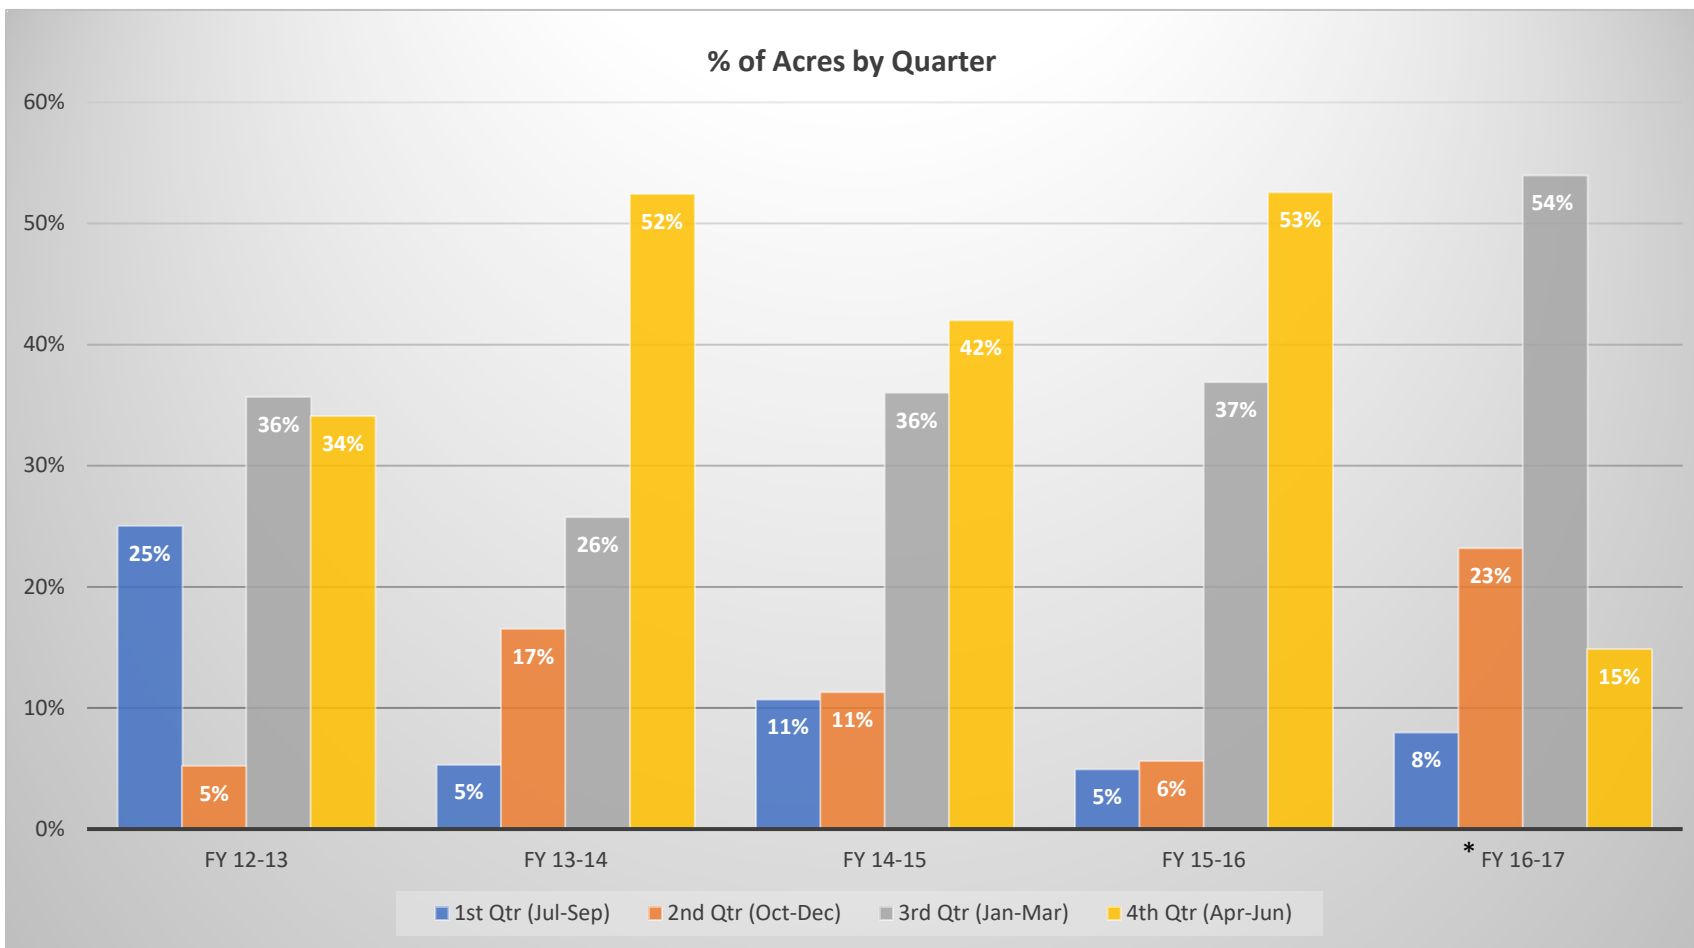

# Florida Park Service Annual Fire Report

Fiscal Year 2016-2017

## Acres Burned by Quarter Statewide/ Five-Year Summary

The graph below compares the percentage of acres that were burned (either by prescribed fire or wildfire) during each quarter of the last five fiscal years.

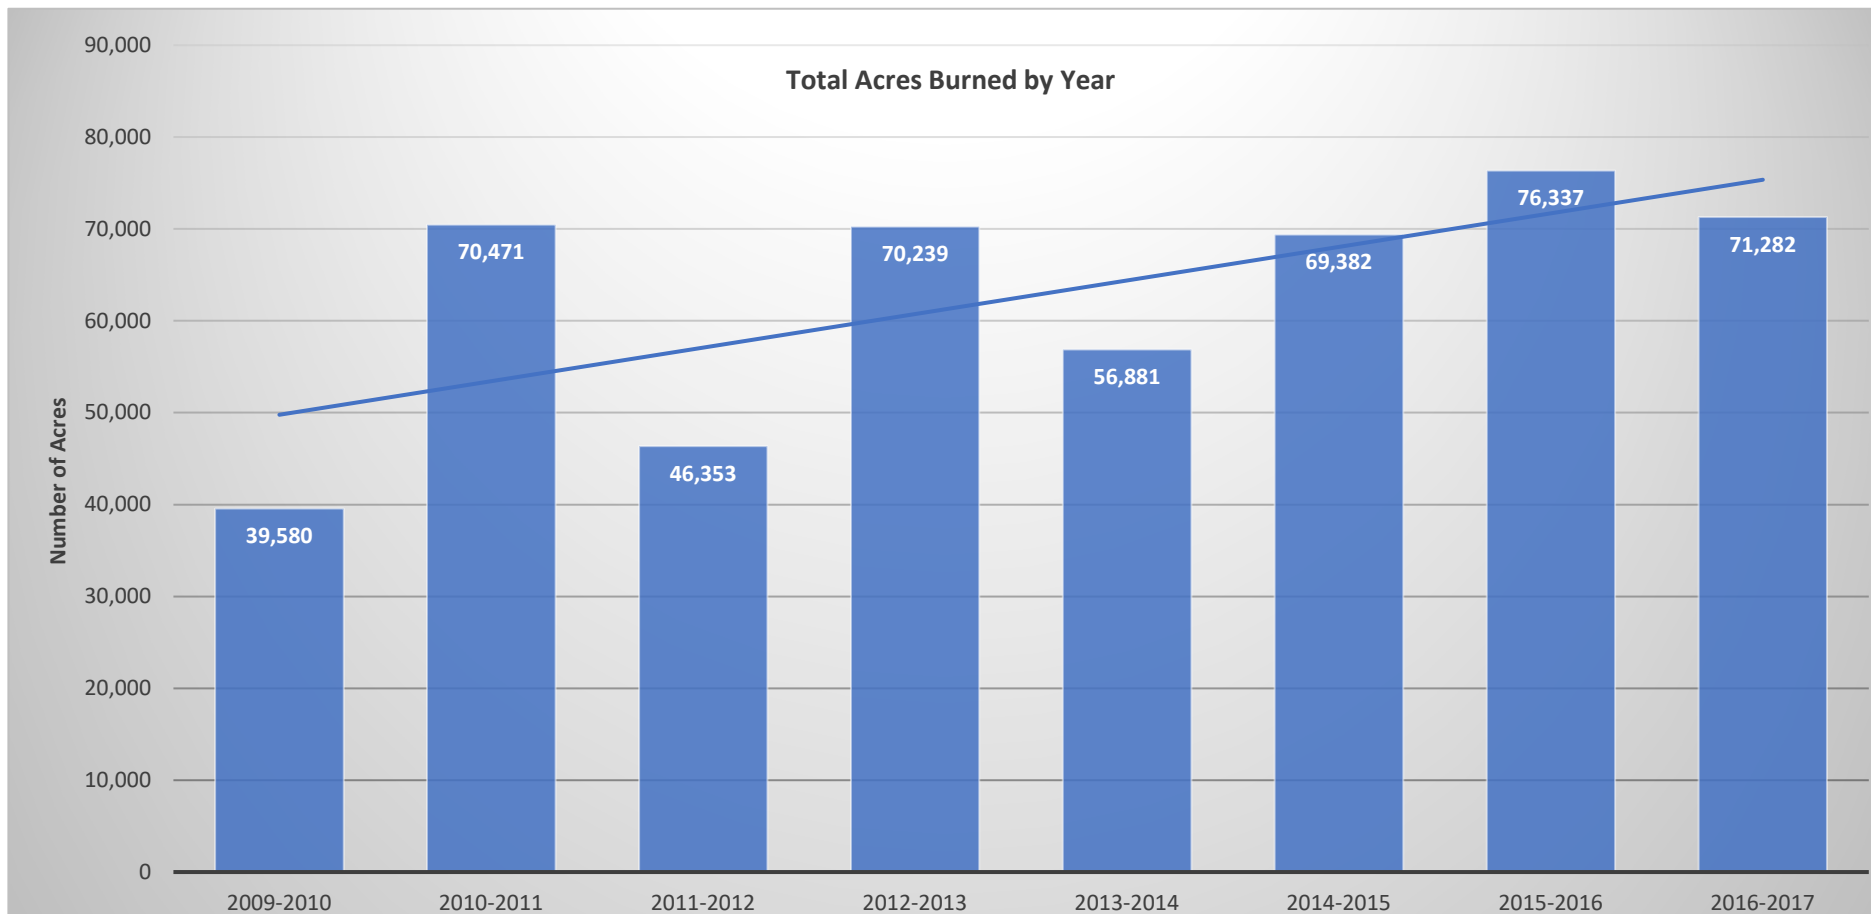

\* The Governor of Florida issued a statewide fire ban that lasted 60 days, April 11, 2017 – June 3, 2017.

# Florida Park Service Annual Fire Report

Fiscal Year 2016-2017

8-year Summary

The graph below represents the total number of acres burned across all five districts during an eight-year period. There has been a positive trend in the total number of acres burned per year for the last 8 years.

## Florida Park Service Prescribed Fire Enhancement Program Grant (PFEP)

Fiscal Year 2016-2017

The table below shows the FPS projects completed utilizing funds from the PFEP grant from FFS.

Category	Location	Project Description	Project Cost
Contracted Services			
	District 2 - Paynes Prairie	Aerial Burns, 961 acres	\$15,357.00
	District 4 - Collier Seminole	Aerial Burn, 1671 acres	\$3,875.00
	District 3 - Bulow Creek	Fireline Installation	\$28,375.00
	District 2 - Paynes Prairie	Mechanical Treatment	\$34,983.00
	District 4 - Charlotte Harbor	Fireline Prep and Mechanical Treatment	\$28,210.00
	District 2 - Cedar Key	Mechanical Treatment	\$18,031.42
	District 3 - Dunns Creek	Roller Chopping, 124 acres	\$12,400.00
	District 3 - Florida Greenway	Roller Chopping, 388 acres	\$48,525.00
<b>Contractual Total</b>			<b>\$189,756.42</b>
Equipment			
	Statewide	Communication Equipment	\$15,000.00
	Statewide	Water Handling Equipment	\$114,821.47
	Statewide	Ignition Equipment	\$5,227.14
	Statewide	Personal Protective Equipment	\$11,811.11
	Statewide	Tractor Implements	\$55,726.50
	Statewide	Hand Tools	\$2,542.14
<b>Equipment Total</b>			<b>\$205,128.36</b>
Labor			
	District 3 - Multiple Parks	OPS Positions (3)	\$34,154.16
<b>Labor Total</b>			<b>\$34,154.16</b>
			<b>\$429,038.94</b>

## Florida Park Service Mechanical Treatment Report

Fiscal Year 2016-2017

The figures below represent the number of acres mechanically treated (mowing, roller-chopping, timber removal etc.) for natural community improvement or maintenance.

District One	
Bald Point	19.0
Big Lagoon	48.0
Deer Lake	58.4
Falling Waters	15.0
Tarkiln Bayou	35.0
Torreya	901.0
<b>Total</b>	<b>1,076.4</b>

District Two	
Big Talbot Island	248.0
Cedar Key Scrub	406.2
Crystal River Preserve	345.5
Devil's Millhopper	20.5
Fort Cooper	7.5
Itchetucknee Springs	75.0
Itchetucknee Trace	72.3
Manatee Springs	118.6
Mike Roess Gold Head	11.1
Paynes Prairie	156.5
Price's Scrub	190.0
Pumpkin Hill	327.4
San Felasco Hammock	113.0
<b>Total</b>	<b>2,091.5</b>

District Three	
A.D. Broussard Catfish Creek	31.4
Colt Creek	228.0
Dunns Creek	679.4
Kissimmee Prairie	56.3
Lake Griffin	3.0
Lake Louisa	6.0
Lower Wekiva River	230.0
Marjorie Harris Carr	1,848.2
Rock Springs Run	110.0
St. Sebastian River	2201.8
Tomoka	75.0
Wekiwa	270.0
<b>Total</b>	<b>5,739.9</b>

<b>District Four</b>	
Caladesi Island	7.0
Collier-Seminole	19.5
Highlands Hammock	658.3
Hillsborough River	12.0
Honeymoon Island	1.0
Lake June-in-Winter	186.4
Little Manatee River	3.0
Myakka River	2314.0
Oscar Scherer	90.0
Paynes Creek	2.4
Weeki Wachee Springs	0.5
Wingate Creek	219.0
<b>Total</b>	<b>3513.1</b>

<b>District Five</b>	
Atlantic Ridge Preserve	20.8
Jonathan Dickinson	59.8
Savannas Preserve	27.5
<b>Total</b>	<b>108.1</b>
<b>Total Acres, FY 16-17</b>	<b>12,528</b>

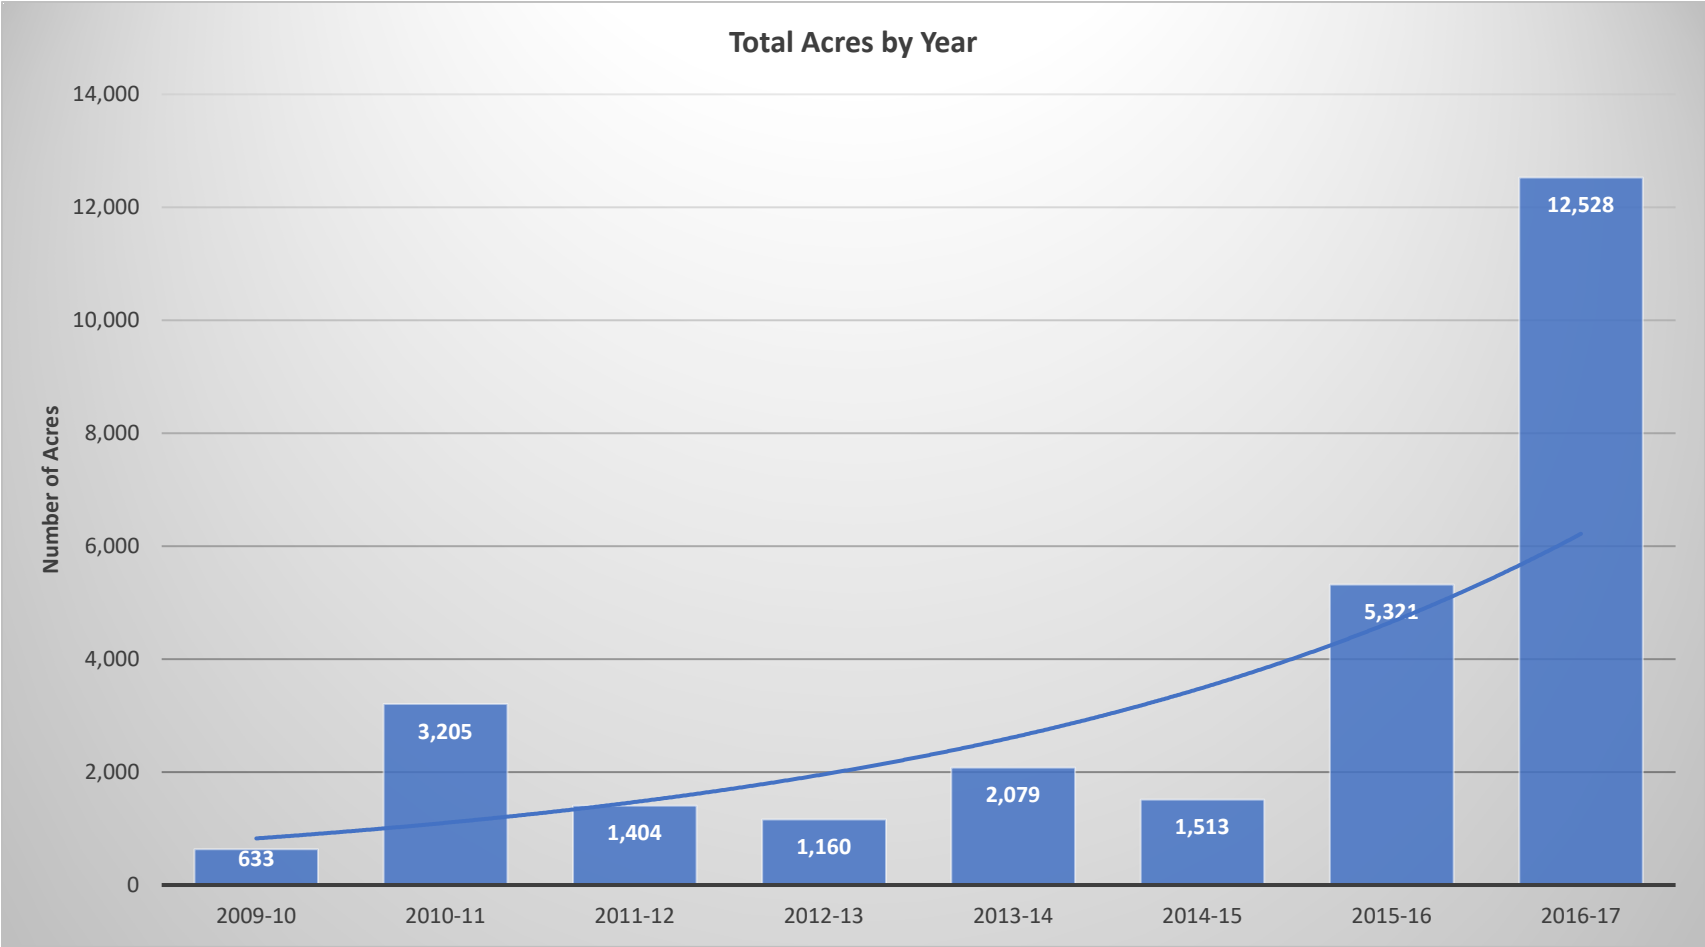

<b>Summary by Year</b>	
2016-17	12,528
2015-16	5,321

# Florida Park Service Mechanical Treatment Report

Fiscal Year 2016-2017

8 Year Summary

The graph below represents the total number of acres mechanically treated across all five districts during an eight-year period. There has been an exponential increase in the total number of acres mechanically treated per year for the last 8 years.

**SUMMARY OF CURRENT CONDITIONS/PLANNING**

- Total Park Acres:** The sum of the Management Zone acreages. This acreage may differ from the Division Jurisdiction Report.
- Acres in Maintenance Condition:** A field-based determination which should consider several factors. Generally, infestations in Maintenance Condition should: be manageable with existing staff and resources, not be expanding in size or percent cover, not contain large numbers of mature reproducing individuals, and not pose an imminent threat to imperiled plants, animals or natural communities. Additionally, any infestation that hasn't been surveyed within 24 months will fall out of maintenance condition.
- Gross Area (acres):** The general area occupied by one or more invasive exotic species. The area is estimated by imagining a line around the general perimeter of the infestation. The Gross Area may contain significant parcels of land that are not occupied by invasive exotic plants. Also interpreted as the total area that has to be worked to ensure complete treatment of the infestation.
- Infested Area (acres):** The approximate area of land covered by the invasive plants within a Gross Area if the invasive plants were accumulated into one area. Infested Area = Gross Area X midpoint of the Cover Class.
- Treatment Goals (Inf. Area):** The proposed area to treat (measured as Infested Area) established by the Park Manager as an achievable annual goal with the existing park resources or probable grants for the fiscal year.

**ACCOMPLISHMENTS / INFESTED AREA TREATED**

- Infested Area Treated:** Infested Area Treated (in acres) within each fiscal quarter (acres are not cumulative).
- Total Treated:** Sums, to date, the individual fiscal quarters for Infested Area Treated (in acres).
- % of Goal Met:** The percentage of the Treatment Goals accomplished at the time the report was generated.
- Gross Area Worked:** A running total of the Gross Area (in acres) that have been worked or traversed to treat the Infested Area.

# Florida Park Service Invasive Exotic Plant Report

Fiscal Year 2016-2017

## Statewide Summary

Cogon grass and Brazilian pepper retained the top two spots as the species most frequently being treated in state parks. Chinese tallow tree has gone from the eighth most treated exotic plant, to the fourth most treated.

	<b>Infested Acres Treated</b>	<b>Gross Area Worked</b>	<b>Number of Parks Treating Invasives</b>
District One	525	3,287	28
District Two	2,284	8,650	39
District Three	2,226	16,893	30
District Four	6,526	16,230	33
District Five	3,874	16,558	23
<b>Totals</b>	<b>15,435</b>	<b>61,618</b>	<b>153</b>

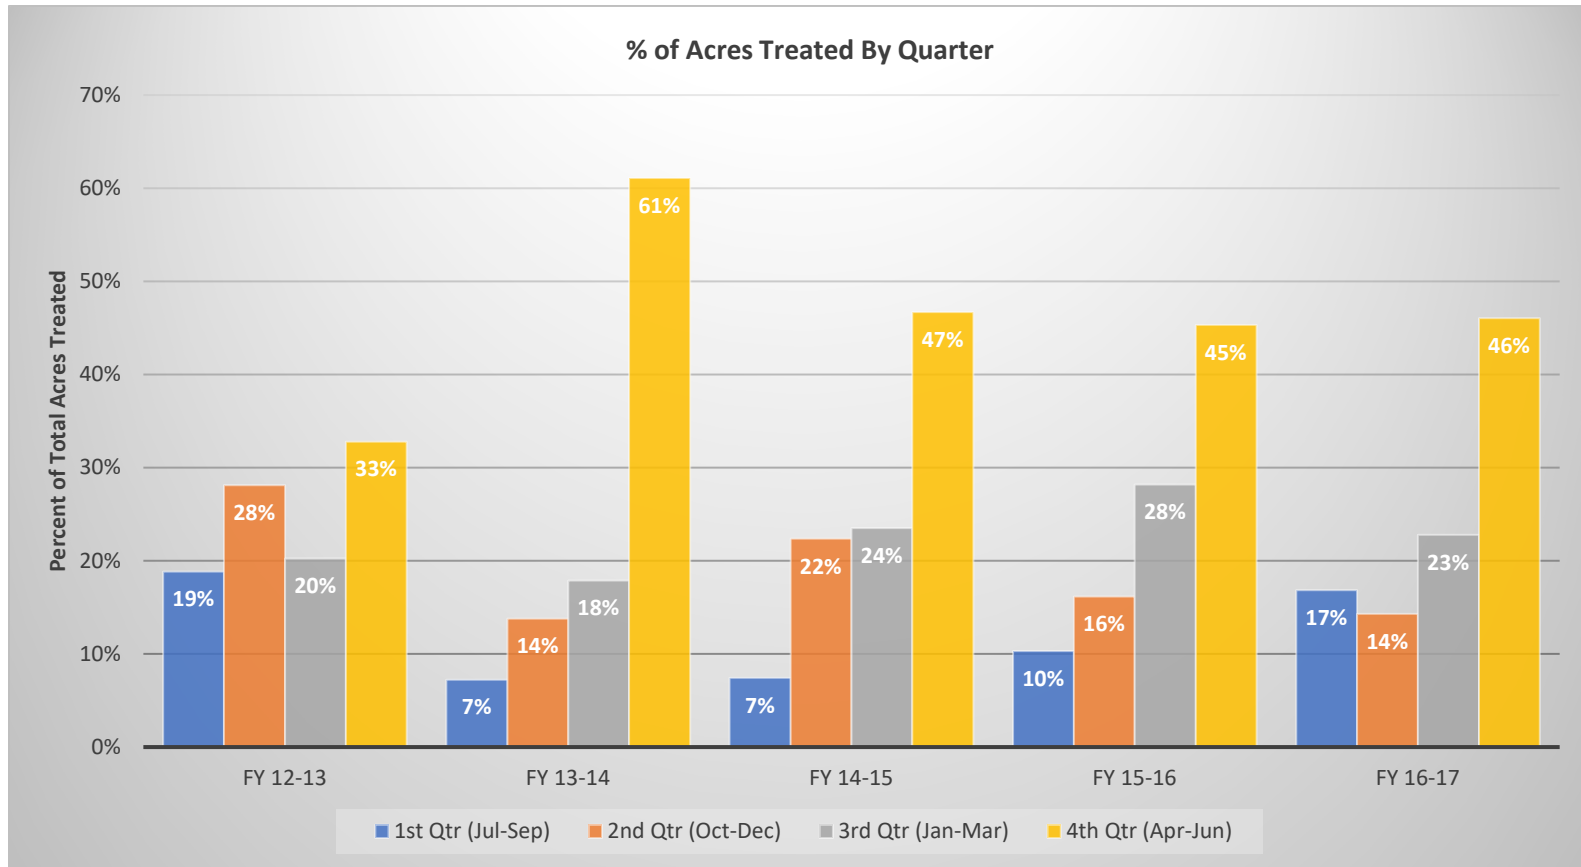

<b>Number of Parks Treating Each of the Top 10 Most Commonly Removed Species</b>

# Florida Park Service Exotic and Nuisance Animal Report

Fiscal Year 2016-2017

10 Year Trends

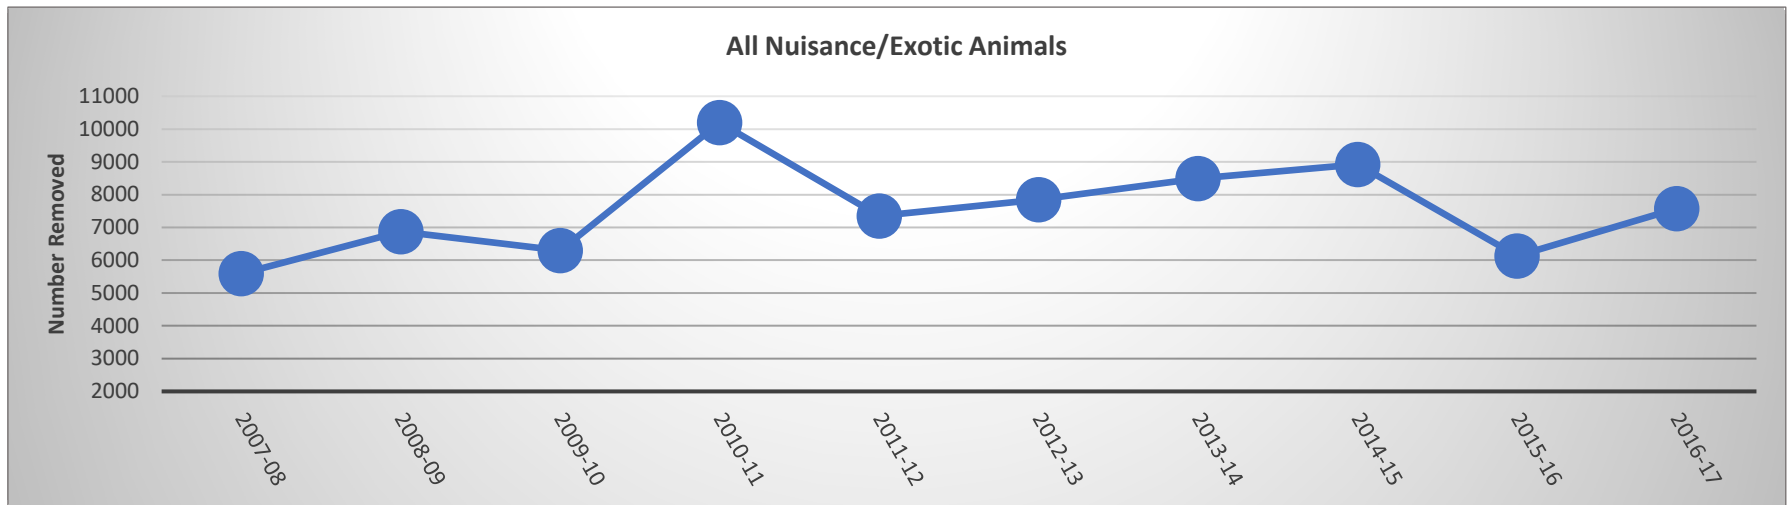

## Fiscal years 2016-2017 comparison to previous 9 years

-- Feral hogs continue to be the species removed from the most parks (47) and in the largest numbers (3,109), approximately 25% more than the previous year. All while the percent of feral hogs removed played a smaller role in the total number of animals removed.

-- From the chart, the amount of "Other" species removed increased by 3.2% whereas Armadillos, Feral Cats and Fish have seen a decrease by 0.1%, 0.1% and 1.4% respectively.

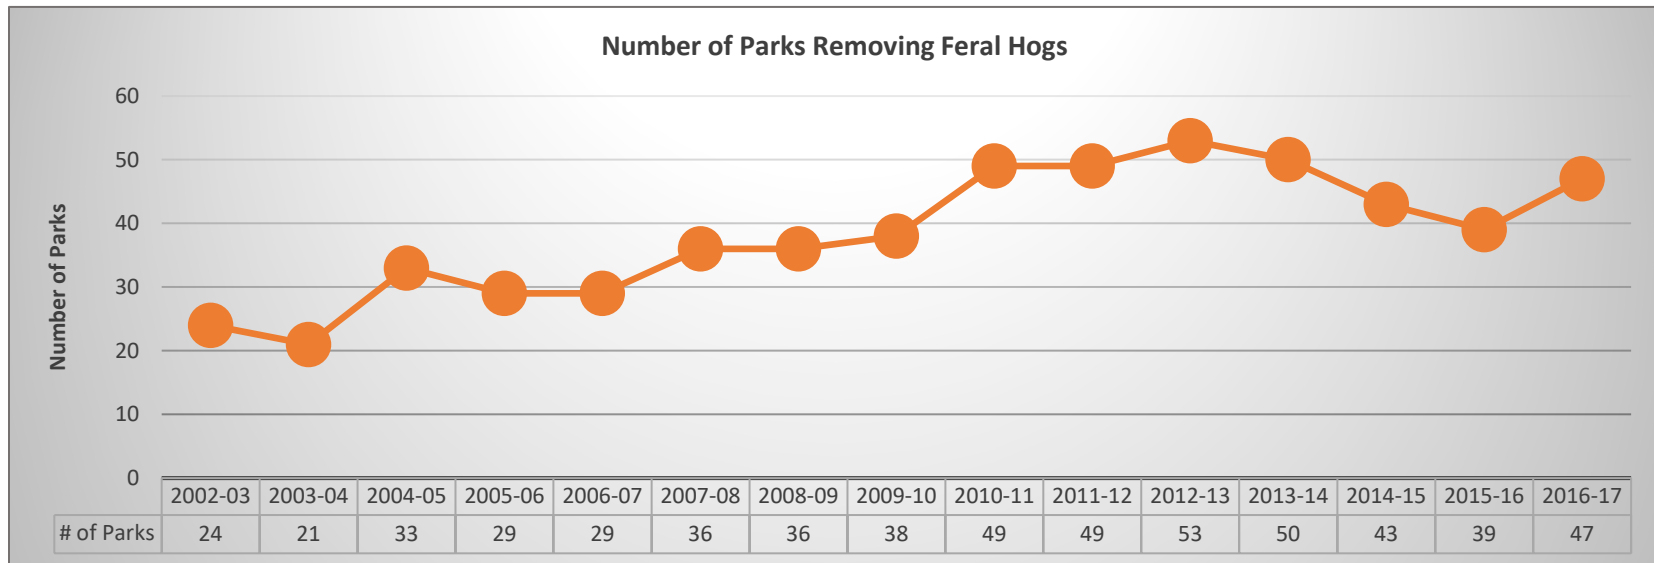

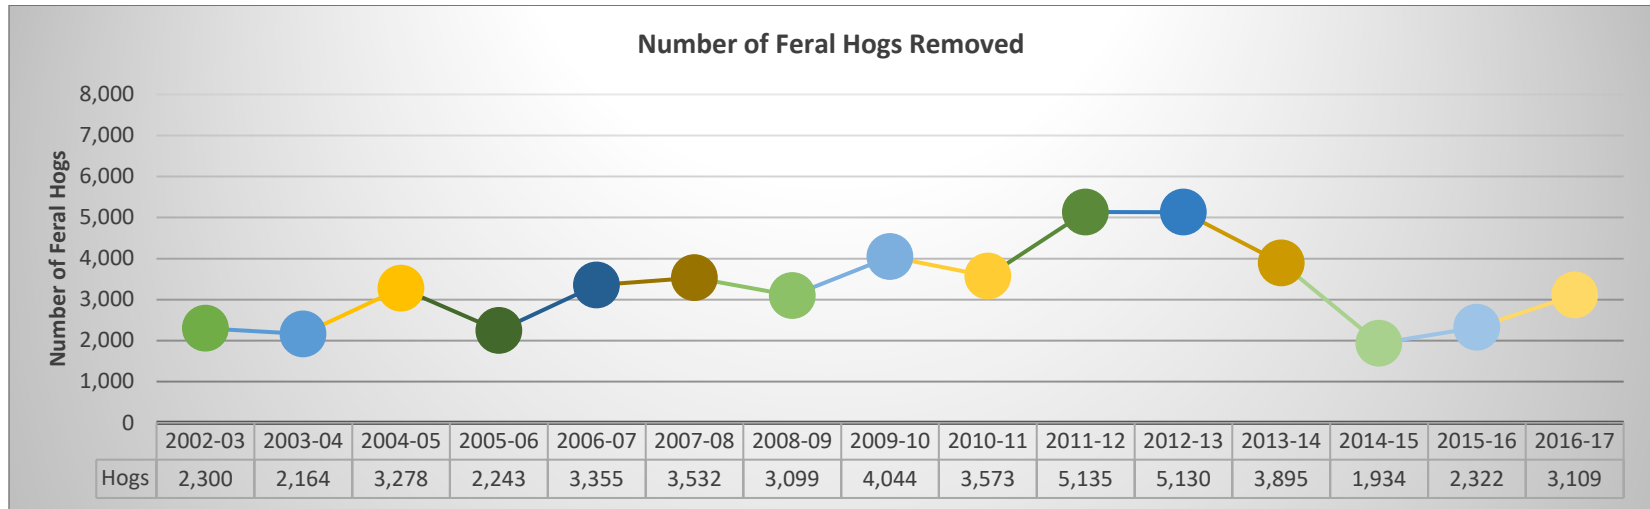

-- The graph below shows a substantial increase in the total number of animals removed rising from 6,128 seen the previous year to 7,571 this fiscal year. This increase is largely due to a greater number of feral hogs, fish, and "Other" species being removed this fiscal year over last.
