### Active Maintenance Entity Service Permits by run date: 3/31/2022

381.0065(4), Florida Statutes, provides:

A person may not contract to construct, modify, alter, repair, service, abandon, or replace a sewerage treatment and disposal system without being registered under part II of chapter 64E, unless the person personally performs construction, maintenance, or repairs to a system serving a single-family residence is exempt from registration requirements for performing repairs on that residence, but is subject to all permitting requirements.

Under these provisions, a property owner may qualify to be permitted by the department to install a septic aerobic treatment unit serving their owner-occupied single-family residence. Except for a contractor, the owner must comply with all provisions of 64E-6.012, Florida Administrative Code, for their system. The owner must have written approval from the manufacturer or their representative that they have received training on the service of their unit. They must possess a valid ME license. The owner must make application to the department for approval to be an ME and pay the fee. The property owner is responsible for obtaining a biennial operating permit for the system.
