A nighttime photograph of a city skyline, likely Miami, with numerous skyscrapers illuminated. In the foreground, a multi-lane highway is shown with long-exposure light trails from cars, creating streaks of white, yellow, and red. The sky is a deep blue with some light clouds. The image is partially obscured by a white diagonal shape on the left side.

MIAMI-DADE COUNTY'S BROWNFIELDS PROGRAM

Wynwood Hotel Brownfield Site

The Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), through its 2020 delegation agreement with the Florida Department of Environmental Protection (FDEP), administers the Miami-Dade County Brownfield Program to encourage the expansion, redevelopment and reuse of brownfield sites, where redevelopment may be complicated by actual or perceived environmental contamination.

A brownfield area is a contiguous area of one or more brownfield sites, some of which may not be contaminated, and which has been designated by a local government by resolution. There are currently ninety-two brownfield areas in Miami-Dade County, forty-nine of which were designated by the County beginning in 1999 when enterprise zones, empowerment zones, and other such designated economically depressed areas were made brownfield areas to encourage site rehabilitation, redevelopment, investment and job creation.

Miami-Dade County's delegation agreement with FDEP, which was renewed in October of 2020 for a ten-year period, authorizes Miami-Dade to negotiate, execute and ensure compliance of Brownfield Site Rehabilitation Agreements (BSRAs) for brownfield sites within a designated brownfield area. Execution of a BSRA entitles a qualifying Person Responsible for Brownfield Site Rehabilitation (PRFBSR) to certain benefits and incentives, including but not limited to a bonus refund for job creation, sales tax refund on building materials for affordable or mixed-use housing, tax credits on eligible site rehabilitation costs incurred and solid waste removal, and certain liability protections.

Currently there are sixty active BSRA sites in Miami-Dade County, three of which were executed with FDEP rather than Miami-Dade based on the County's prior or current ownership of the property or the County's involvement in funding the site's rehabilitation. Twenty-eight BSRA sites have received a Site Rehabilitation Completion Order since inception of the program. Rehabilitation of sites with BSRAs is conducted pursuant to the cleanup criteria of Chapter 62-780, Florida Administrative Code.

This Annual Report summarizes brownfield area designation and BSRA site activities in Miami-Dade County from June 1, 2022 through June 1, 2023. During this annual reporting period, nine new Brownfield Areas

were designated, eleven new BSRA's were executed, along with three Assignment and Assumption Agreements, one BSRA was terminated, and seven sites received a Site Rehabilitation Completion Order, as further detailed below.

NEW BROWNFIELD AREAS DESIGNATED:

Miami-Dade County designated the following brownfield areas during this reporting period:

- 19640 WDH Green Reuse Area (BF132202000), consisting of approximately 2.2 acres, via resolution R-903-22 on October 6, 2022.
- Bellamonte at Golden Glades Green Reuse Area (BF132203000), consisting of approximately 7.09 acres, via resolution R-1094-22 on November 15, 2022.
- The Line Green Reuse Area (BF132204000), consisting of approximately 1.7 acres, via resolution R-1093-22 on November 15, 2022.
- The Water Park Villas Green Reuse Area (BF132207000), consisting of approximately 4.01 acres, via resolution R-1152-22 on December 6, 2022.

The City of Miami designated the following brownfield areas during this reporting period:

- The Southside Park Green Reuse Area (BF132205000), consisting of approximately 1.5 acres, via resolution R-22-0449 on November 17, 2022.
- The Parkview Apartments Green Reuse Area (BF132301000), consisting of approximately 0.79 acres, via resolution R-23-0021 on January 12, 2023.

The Town of Medley designated the following brownfield areas during this reporting period:

- Palmetto Station (BF132208000), consisting of approximately 11.88 acres, via resolution C-2049 on December 21, 2022.
- Palmetto 74 (BF132209000), consisting of approximately 22.8 acres, via resolution C-2050 on December 21, 2022.

The Village of Key Biscayne designated the following brownfield area during this reporting period:

- Paradise Park Green Reuse Area (BF132206000), consisting of approximately 0.3 acres, via resolution 2022-60 on November 29, 2022.

BSRA'S ASSIGNED AND ASSUMED:

On July 21, 2022, an Assignment and Assumption Agreement was executed to assign Hawkins Park Green Reuse Site 1 to TYG Development, LLC.

On July 21, 2022, an Assignment and Assumption Agreement was executed to assign Hawkins Park Green Reuse Site 2 to TYG Development, LLC.

On December 20, 2022, an Assignment and Assumption Agreement was executed to assign The TVML Industrial Project Site to 167th XF, LLC.

BSRA TERMINATED:

On March 9, 2023, the Tropical Pointe Green Reuse Site (BSRA ID# 139912009) was terminated by the PRFBSR.

**SITE REHABILITATION COMPLETION ORDERS ISSUED
JUNE 1, 2022 – JUNE 1, 2023:**

AHS AT BISCAYNE VILLAGE

BSRA ID# 139913002
Executed December 20, 2021
Address: SW 288 St. and SW 142 Ave
Acres: 7
DERM HWR-1066
SRCO issued: July 19, 2022

AHS at Biscayne Village, LLC entered into a BSRA with Miami-Dade County for the development of a 216-unit, 5 building, workforce housing apartment complex at SW 142nd Avenue and SW 288th Street (Folio # 30-7903-000-0300). The subject property was a vacant lot adjacent to the Florida Turnpike previously utilized for agricultural purposes. Site assessment activities documented arsenic above cleanup target levels in soil, but a site-specific background study demonstrated that arsenic in soil was consistent with background. An SRCO was issued on July 19, 2022.

Former vacant site

Residential Development at AHS at Biscayne Village

HAWKINS PARK GREEN REUSE SITE 2

BSRA ID#139801012

Executed March 16, 2017

Address: 1021 NW 21 St, Miami

DERM IW5-20466

CSRCO issued: January 9, 2023

A BSRA was executed by Hawkins Park Land, LLC on March 16, 2017 for the property located at 1021 NW 21st Street in Miami. Previous site uses included retail, commercial and automobile repair. Contaminants of concern include arsenic and nickel in the groundwater; however, the source of the nickel is the adjacent site to the north, Former Alert Plating. A Site Assessment Report and Monitoring Only Plan were approved for the site on October 14, 2016, and groundwater monitoring was completed in pursuit of NFAC. The site redevelopment consists of expansion of the existing Florida Bottling manufacturing facility. A restrictive covenant was recorded on March 14, 2022, and a Conditional Site Rehabilitation Completion Order was issued on January 9, 2023.

DIAMEDIX PROJECT

BSRA ID# 139801022

Executed December 21, 2021

Address: Properties located at 2115, 2127, 2141, 2150, and 2160 N Miami Avenue, 38 NW 22 Street, and 2155 NW Miami Court, Miami, Florida 33127

Acres: 2.29

DERM HWR-1124

SRCO issued: January 10, 2023

PRH N Miami, LLC entered a BSRA on December 21, 2021, for the rehabilitation and redevelopment of the approximately 2.29-acre property. The historical usage of the subject property has involved use as a cleaners (2162 North Miami Avenue), a lumber/milling yard (2141 North Miami Avenue & 30 NE 22nd Street), and paint warehouses (2127 & 2164 North Miami Avenue), with development portions of the site beginning prior to 1918. In January of 2022, 664.82 tons of metals and/or PAH-impacted soils were excavated and disposed of. On November 14, 2022, additional source removal was conducted, successfully satisfying the site rehabilitation requirements. The site is planned for redevelopment for residential use as apartment buildings. The site received an SRCO on January 10, 2023.

Rendering of proposed residential development

HAWKINS PARK GREEN REUSE SITE

BSRA ID#139801010

Executed October 3, 2016, Miami

Address: 2125 NW 10th CT & 2133 NW 11th Ave, Miami

DERM IW5-1694/File-1574

SRCO issued: February 9, 2023

On October 3, 2016, Hawkins Park Properties, LLC, entered into a BSRA for renovations of an existing industrial site consisting of two parcels. The parcel at 2125 NW 10 Ct documented Isopropylbenzene groundwater contamination and the parcel at 2133 NW 11 Ave documented Arsenic groundwater contamination. The site formerly operated as a repair and maintenance facility for Waste Management trucks. A Natural Attenuation Monitoring Plan was approved on March 29, 2017, and completed on August 16, 2021 for the Arsenic groundwater contamination. The Remedial Action Plan addressing the IPB groundwater plume via injection of Klozur[®] was approved on December 19, 2018, and implemented on March 15, 2019. A Post Active Remediation Monitoring Plan was approved on September 17, 2019, and completed on March 29, 2022. Documentation submitted with the SARs/NFAP confirmed that the only remaining contaminant (isopropyl benzene) exceeds the nuisance, organoleptic or aesthetic consideration criteria set forth in 62-780, F.A.C. An SRCO was issued on February 9, 2023.

7777 NW 41ST STREET GREEN REUSE SITE

BSRA ID# 131701000

Executed December 20, 2021

Address: 7777 NW 41 St., Miami

Acres: 23.7

DERM UT-1454/F-7880

SRCO issued: March 7, 2023

Park 7777 NW 41st Street Owner, LLC entered into a BSRA with Miami-Dade County for rehabilitation and redevelopment of the property located at 7777 NW 41 Street. The site historically was pastureland between 1938 to 1953, then developed by Pepsi Bottling Company in 1964 with multiple buildings, underground and above ground storage tanks (e.g., petroleum, waste oil, etc.), a vehicle repair area, petroleum dispenser areas, a truck wash area, stormwater collection area and a pump station. The site received No Further Action without conditions for petroleum discharges discovered on May 22, 1987 (on June 1, 1989) and August 16, 1988 (on October 26, 1995) and waste oil dated February 15, 1991 (on January 15, 1993). However, groundwater contamination was discovered during due diligence activities for demolition and site development activities on November 11, 2017. Site rehabilitation activities (source removal) were conducted. A monitoring only plan was approved on October 25, 2021. The contaminants of concern (COCs) remaining on site are Benzene, Isopropylbenzene, and Iron in the groundwater. The site received closure on March 7, 2023, using the organoleptic provisions of Chapter 62-780, Florida Administrative Code. The construction of the site into industrial warehouses is currently being completed.

WYNWOOD HOTEL BROWNFIELD SITE

BSRA ID# 1319801017

Executed March 19, 2019

Address: 2215/2217 NW Miami Ct, Miami

DERM IW5-3013/File-2783

CSCRO issued: May 4, 2023

A BSRA was executed with Wynwood DC Propco LLC, for three parcels (2217, 2233 and 2235 NW Miami Court). The northern building (2217 NW Miami Court) was formerly occupied by a company that serviced fuel tanker trucks. The central portion of the building was previously open courtyard that was used for steam cleaning of engine parts. Interim source removal along with application of Klozur® to the excavation was conducted between July 2 and July 20, 2019. Following the confirmation soil sampling, Post Active Remediation Monitoring was approved on March 13, 2020, and completed on July 13, 2021. All contaminated soil was removed from the property, and remaining groundwater contamination consists of benzene, isopropyl benzene, sulfate and TDS. A No Further Action with Conditions was elected to address the remaining groundwater contamination. A restrictive covenant was recorded on March 10, 2023, and a CSRCO was issued May 4, 2023. The site was redeveloped as the Arlo Wynwood Hotel, a 217-room, nine-story hotel with ground floor restaurants and bars, surrounding an interior courtyard. Initial estimates indicated that the development would create up to 125 permanent jobs and required a capital investment of approximately \$75 million.

Former site conditions

Completed Hotel

WAL-MART NEIGHBORHOOD MARKET

BSRA ID# 131201001

Executed December 28, 2012

Address: 1499 N. Homestead Boulevard, Homestead

DERM UT-1961/File-554/DEP-138629034

SRCO issued: May 8, 2023

Walmart Stores East, LP executed a BSRA for the property located at 1499 Homestead Boulevard. The site previously operated as an automotive dealership and mechanical repair shop until 1996. Oil water separators, hydraulic lifts, and underground storage tanks were removed from the site. The site assessment was completed and approved on December 6, 2012, and documented Volatile Organic Compounds and Polycyclic Aromatic Hydrocarbon groundwater contamination. A Source Removal Report dated November 8, 2013, which included post-excavation soil and groundwater assessment, documented that no impacted soil remained onsite. Groundwater monitoring was conducted and completed for a No Further Action site closure. An SRCO was issued on May 8, 2023. The Wal-Mart Neighborhood Market opened in January of 2014 and created up to 95 full and part-time jobs.

Completed Walmart Development

VILLAGE AT OLD CUTLER

BSRA ID# 139912007

Executed December 20, 2021

Address: Old Cutler Rd and SW 107th Avenue, Miami

Acres: 17.25

DERM HWR-1059

CSRCO issued: May 24, 2023

Village at Old Cutler, LLC entered into a BSRA with Miami-Dade County for the proposed development of Village at Old Cutler (Folio #s 30-6017-001-0010 and 30-6017-000-0012). The site was formerly used for agricultural purposes. Site assessment activities documented arsenic in soil, and ammonia and iron in groundwater. The arsenic in soil and iron in groundwater were determined to be consistent with background concentrations, while an alternative cleanup target level (ACTL) was derived for the ammonia in groundwater. Based on the ACTL utilized, a Conditional SRCO was issued on May 24, 2023. The site is being developed as an apartment complex to include workforce housing units. Upon completion the development will offer 390 homes across eight three-story buildings.

**NEW BSRA EXECUTED
JUNE 1, 2022 – JUNE 1, 2023**

NOMI SQUARE BROWNFIELD SITE

BSRA ID# 132201001
Executed July 21, 2022
Address: 13855 NW 17th Avenue, North Miami
Acres: 7.6
DERM HWR-1199

North Miami Ventures, LLC entered into a BSRA on July 21, 2022, for the rehabilitation and redevelopment of a vacant property located at 13855 NW 17th Avenue (Folio # 06-2123-000-0060), North Miami, FL. The site was formerly a YMCA. Site assessment activities documented buried debris, and arsenic, lead, copper and PAH contamination in the soil and PAHs and lead in the groundwater. The site is pursuing No Further Action with Conditions closure with engineering controls. Further assessment is pending. The proposed redevelopment of the site includes possible multi-family residential, commercial, and public uses.

19640 GREEN REUSE SITE

BSRA ID# 132202001

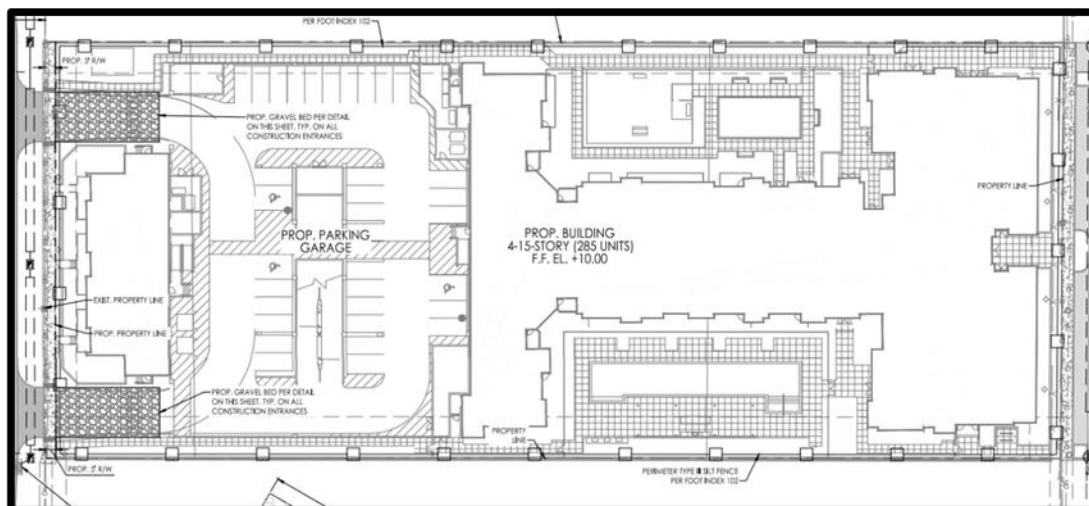

Executed December 20, 2022

Address: 19640 Harriet Tubman Highway

Acres: 2.25

DERM HWR-1224

19640 WDH, LLC entered into a BSRA on December 20, 2022, for the rehabilitation and redevelopment of the property located at 19640 Harriet Tubman Highway, Miami, FL (Folio 30-2203-005-0040). The site was formerly a trailer park located adjacent to the former FEC railroad. Site assessment activities documented arsenic contamination in the soil and groundwater. A source removal to remove a portion of the arsenic soil contamination was completed in 2022. The site is pursuing No Further Action with Conditions closure with engineering controls. Further assessment is still pending. The site will be redeveloped for residential use.

CARD SOUND KEY GREEN REUSE SITE

BSRA ID# 130830001

Executed December 20, 2022

Address: Krome Avenue & South Dixie Highway, Florida City

Acres: 12.72

DERM HWR-1304

Card Sound Key Investors, LLC, entered into a BSRA on December 20, 2022, for the rehabilitation and redevelopment of the property located at Krome Avenue and South Dixie Highway, Florida City, FL (Folio 16-7930-003-0010) into affordable rental apartments. Historical documentation indicates the property was undeveloped land from as early as 1938 to 1971 when the southern portion appeared to have been cleared, filled in and graded. The property was vacant and overgrown in the mid-1980s until evidence of uncontrolled dumping on the southern portion was observed in 2007. The subject property has remained vacant until the present day. A Phase II Environmental Site Assessment documented buried debris, including asphalt shingles, metal siding, roof tar, and concrete blocks, as well as arsenic and PAH contamination of the soil and Ammonia, Aluminum, Iron, and TDS contamination of the groundwater. A Site Assessment Report for the site is pending submittal.

BELLAMONTE AT GOLDEN GLADES GREEN REUSE SITE

BSRA ID# 132203001
Executed December 20, 2022
Address: Northwest 6th Avenue & Northwest 161st Street
Acres: 7.09
DERM HWR-1125

Resia (the site owner) obtained Brownfields Area designation in August 2022 and entered into a Brownfield Site Rehabilitation Agreement (BSRA) for this Site on December 20, 2022. This vacant site is located in a commercial and residential area in the Golden Glades neighborhood of northern Miami-Dade County, Florida. Identified by the as folio number 30-2113-036-0010. The site contains remnants of concrete building pads that were constructed as part of a property development activity that started in 2009, and part of a 30-foot-wide drainage ditch easement is located along the eastern site boundary.

Soil samples collected throughout the Site detected concentrations of arsenic, dieldrin and Leachable dieldrin. Iron, manganese and dieldrin were detected above their respective GCTLs predominantly at the center of the Site. The owner intends to redevelop the site with a multi-family rental community consisting of four 5-story, 16,800-square-foot (sf) apartment buildings, one in each corner of the site, and an approximately 61,000-sf, 4-story parking garage and a 12,500-sf amenity building at the center of the site. The PRFBSR is pursuing NFAC with engineering controls.

DORAL 87 BROWNFIELD SITE

BSRA ID# 131701002

Executed November 30, 2022

Address: 8650 NW 58 ST, 8690 NW 58 ST, 5675 NW 87 Ave, Doral

Acres: 5

DERM UT-1180

Doral 87 Group, LLC, entered into a BSRA on November 30, 2022, for the rehabilitation and redevelopment of the property located at 8650 NW 58 ST, 8690 NW 58 ST, 5675 NW 87 Ave, Doral, as a retail complex. The site was historically commercial/industrial, with tool repair conducted in the central portion of the site on open ground. Site assessment activities documented petroleum hydrocarbon constituents, Arsenic, Cadmium, Chromium and PAH soil contamination. Source removal activities were conducted; however total Benzo(a)pyrene Equivalent (BaPE) concentrations continue to exceed soil cleanup target levels. The Owner of the Property has elected to close the site with conditions and implement institutional controls.

Photograph 2. View towards the north showing the SS-1 Excavation (still opened) in the northern portion of the subject site.

WATER PARK VILLAS GREEN REUSE SITE

BSRA ID# 132207001

Executed December 22, 2022

Address: 190 NW 162 ST

Acres: 4.01

DERM HWR-1240

Water Park Villas, LLC, entered into a BSRA on December 22, 2022, for the rehabilitation and redevelopment of the property located 190 NW 162nd Street, Miami, Folio No. 30-2113-000-0280. The subject property consists of approximately 4 acres of vacant, former agricultural land. Assessment activities documented groundwater analytical results exceeding arsenic, iron and manganese cleanup target levels. Soil analytical results exceeded arsenic cleanup target levels. The property will be redeveloped with 38 townhomes and an apartment building with 62 units.

THE LINE GREEN REUSE SITE

BSRA ID# 132204001

Executed December 23, 2022

Address: 190 NW 162 ST

Acres: 1.6

DERM HWR-908

Fruit Joy Florida, LLC entered into a BSRA for the Line Green Reuse Site encompassing two vacant parcels (Folios 30-4035-000-1435). Historically the site was used for agriculture from 1938 to 1970, along with the surrounding area, and is adjacent to the former FEC corridor (Ludlam Trail). The site is to be redeveloped into a mixed use multifamily residential rental community with 840 units and 11,673 sq.ft. of retail space. Site assessment documented arsenic contamination in soil and groundwater and PAH soil contamination. A Soil Management Plan was approved by DERM on August 27, 2019. The PRFBSR is pursuing a No Further Action with Conditions closure. A Site Assessment Report Addendum is pending.

PARADISE PARK GREEN REUSE SITE

BSRA ID# 132206001

Executed December 19, 2022

Address: 530 Crandon Blvd

Acres: 0.29

DERM IW5-8656 & UT-474

The Village of Key Biscayne entered into a BSRA for the rehabilitation and redevelopment of the Paradise Park Green Reuse Site (Folio # 24-4232-001-0050) for public park purposes. The site was historically a gas station, and a petroleum discharge was discovered on July 18, 1996. A Site Assessment Report for the site is pending submittal.

TUCKER TOWER GREEN REUSE SITE

BSRA ID# 139911004

Executed December 22, 2022

Address: 17800 & 17832 South Dixie Highway, 9912 E Indigo Street, and 9940 Hibiscus Street

Acres: 1.82

DERM HWR-1227

HTG Merrick, Ltd. entered into a BSRA for the rehabilitation and redevelopment of the Tucker Tower Green Reuse Site, for rehabilitation and redevelopment of Tucker Tower Apartments, a 120-unit housing development. A Phase I ESA revealed recognized environmental conditions with respect to the site's long term industrial use and the historical presence of an underground storage tank on the site. A Phase II ESA documented TRPH, Arsenic and PAH soil contamination. A No Further Action, with engineering and institutional controls was elected for the site, and a Soil Management Plan was approved by DERM for the proper handling of contaminated soils during the site's redevelopment. Monthly operating reports of the soil management activities are being provided to DERM.

Artistic rendering of proposed apartment development

PALMETTO STATION

BSRA ID# 132208001

Executed December 22, 2022

Address: 7400 NW 79 Ave

Acres: 11.88

DERM IW5-1761

B9 Medley 79th Avenue Owner LLC entered into a BSRA on December 22, 2022, for the rehabilitation and redevelopment of the property located at 7400 NW 79th Avenue, Medley, FL (Folio 22-3010-002-0010). The site was formerly an unauthorized landfill called the Wilson-Hopper Pit. Site assessment activities documented arsenic, barium, cadmium, chromium, iron, lead, mercury, dieldrin, Trichloroethene, Polycyclic Aromatic Hydrocarbons (PAHs), and Total Recoverable Petroleum Hydrocarbons (TRPH) soil contamination and ammonia, iron, and TRPH groundwater contamination. The site is pursuing No Further Action with Conditions closure with engineering controls. Further assessment is pending. The site will be redeveloped for commercial use as warehouses.

PALMETTO 74

BSRA ID# 132209001

Executed December 22, 2022

Address: 8100 NW 74th Street

Acres: 22

DERM IW5-373

GPT 74St Owner LLC entered into a BSRA for the Palmetto 74 Logistics Center for commercial development. The site footprint sits on the former Mathew Dump, which operated from 1965 to 1971. The site also was used as an automotive scrapyards and had a petroleum discharge. The site has soil and/or groundwater contamination for Benzene, Toluene, Ethylbenzene, Xylenes, 124 Trimethylbenzene, TRPHs, PAHs, Ammonia, Total Dissolved Solids, Iron, PCBs, Arsenic, Barium, Chromium, Copper, Lead, Antimony and Dieldrin. Also, the site has solid waste remaining; therefore, the future buildings are required to have a methane gas management system (MGMS). The MGMS for each building (A, B, C, and D) were approved by DERM on March 2, 2022 and March 30, 2022, respectively. Also, the site has a Soil Management Plan (SMP) approved by DERM on March 22, 2022. Construction activities are underway. The site currently is pending submittal of the Site Assessment Report Addendum. The PRFBSR intends to pursue No Further Action with Conditions closure with restrictions for both groundwater and soils (i.e., institutional controls and engineering controls consisting of impervious and pervious (top 2' of clean fill and/or 1' with a liner)).

PREVIOUSLY DESIGNATED BROWNFIELD AREAS:

Unincorporated Miami-Dade County:

On July 13, 1999, the Miami-Dade County Board of County Commissioners approved Resolution R-767-99 and Ordinance 99-85, which designated as brownfield areas all Enterprise Zones, Enterprise Communities, Empowerment Zones, Developable Areas, Targeted Urban Areas, and areas eligible for Community Development Block Grants in unincorporated Miami-Dade County within the Urban Development Boundary. The twelve brownfield areas designated in 1999 included Carol City, Central Miami, Model City\Brownsville, Opa-Locka, Perrine, Redlands\Leisure City, Richmond Heights, South Dade, South Miami, Sweetwater A, Sweetwater B, and Sweetwater C.

On May 20, 2003, the Board of County Commissioners designated Beacon Lakes as a brownfield area (BF130301000) via resolution R-559-03. The Dedicated Transportation area was designated as a brownfield area (BF130503000) on March 1, 2005 via resolution R-248-05.

The incorporation of Cutler Bay, Palmetto Bay, and Miami Gardens, which changed the boundaries of the existing brownfield areas under Miami-Dade County jurisdiction, and changes in the boundaries of the Enterprise Zones and Community Development Block Grant-eligible areas, prompted Miami-Dade County to amend the map of brownfield areas to reflect these changes. On February 7, 2008, the Board of County Commissioners passed and adopted Resolution R-149-08 and Ordinance 08-19, amending the Miami-Dade County map of designated brownfield areas within certain unincorporated areas of Miami-Dade County. As a result, twenty-five additional brownfield areas within unincorporated Miami-Dade County were created, increasing the number of sites eligible to qualify for the economic incentives and benefits available for brownfield redevelopment.

Resolution R-412-11, adopted May 17, 2011, designated the parcel at 8400 Coral Way in Miami-Dade County a brownfield area (BF131101000). Wal-Mart Stores East, LP constructed a supercenter store at this previously undeveloped location. This redevelopment resulted in a total investment of \$7.25 million and created 300 new jobs. Resolution R-413-11, also adopted May 17, 2011, supported Wal-Mart Stores East, LP's application for a State of Florida Brownfield Redevelopment Bonus.

Resolution R-1038-11, adopted December 6, 2011, designated land located at 12900 SW 252nd Terrace in Miami-Dade County as a brownfield area (BF131103000). Mirabella I Associates, Ltd. completed the construction of an affordable rental community at this location in early 2012, resulting in a total investment of \$34 million and creation of 12 new permanent jobs.

On March 5, 2013, Miami-Dade County designated the land located at 7090 Coral Way the Coral Terrace Redevelopment Area (BF 131302000) via resolution R-142-13. The property, which has contamination associated with the site's former use as a wood-treating plant, was vacant for thirty years prior to brownfield area designation and subsequent development. Pan American developed the site into approximately 200,000 square feet of retail space with a capital investment of 30 million. The retail development, which includes a BJ's Wholesale Club which opened summer of 2014, will create 120 new full-time jobs.

On June 3, 2014, Miami-Dade County designated property at NW 90th Avenue and NW 58th Street as the Miami-Dade Regional Soccer Park Brownfield Redevelopment Area. The 47-acre parcel was part of the over 550-acre 58 Street Landfill property utilized as a municipal and construction landfill until 1987 when it was

properly closed. The subject property was acquired by the Parks, Recreation and Open Spaced Department to allow for the development of a Miami-Dade regional soccer park.

On December 15, 2020, Miami-Dade County designated the land located at 6970 Bird Road as the Miline at Ludlam Trail Green Reuse Area (BF132003000), consisting of 5.03 acres, via resolution R-1241-20. The property owner, Ludlam Trail Phase I, LLC plans to construct 338 multifamily residential units, 4600 square feet of retail space, and serve as the connection point for the Bird Road node of the planned Ludlam Trail recreational trail corridor within the former Florida East Coast railroad corridor. The developer is projecting a total investment of \$90 million and the creation of at least 17 new permanent jobs.

On October 19, 2021, Miami-Dade County designated the South Riviera Investments No. 2 Brownfield Area (BF132103000), consisting of approximately 5.1 acres via resolution R-988-21. According to the property owner, South Riviera Investments #2, Inc. ("South Riviera"), the owner plans to construct a two-story, 63,120 sq. ft. charter school for students in kindergarten through the eighth grade. The developer is projecting a total investment of \$11,000,000.00 and will create at least five new permanent jobs.

On November 2, 2021, Miami-Dade County designated the Miami Lakes Industrial Project (BF132104000), consisting of approximately 15.7 acres via resolution R-1017-21. According to the developer, TV ML Investments, LLC ("TV ML"), TV ML plans to construct 350,000 sq. ft. of warehouse/light industrial space. The developer is projecting a total investment of \$60,000,000.00 and will create 1,046.5 new permanent jobs.

City of Miami:

On March 10, 1998, the City of Miami Commission designated via resolution R-98-24, the Enterprise Communities, Empowerment Zone, and Empowerment Target Areas as brownfield areas, with an amendment (R-99-197) on March 23, 1999. On June 24, 2004, the City of Miami Commission designated via resolution R-04-0413, the property at 1960 NW 27 Avenue as a brownfield area (BF130401000). On February 24, 2005, the City of Miami Commission passed a resolution that incorporated the expanded Enterprise Zones as part of the brownfield areas.

The City of Miami in Resolution Number R-21-0141 approved on April 22, 2021, the designation of the Brickell Fire Station Green Reuse Area (BF132102000), encompassing 1.5 acres.

City of Opa-Locka:

On February 24, 1999, the City of Opa-Locka Commission designated brownfield areas (BF139901000) via resolution 99-6013. The City of Opa-Locka received an Environmental Protection Agency (EPA) Brownfield Initiative Grant in 2001.

City of Miami Beach:

On June 7, 2000, the City of Miami Beach Commission designated via resolution 2000-23963 a city block between Alton Road-Lenox Avenue and 5th- 6th Streets a brownfield area (BF130001000).

On June 16, 2018, the City of Miami Beach designated a total of approximately 95 acres of city-owned property as the following four brownfield areas: Convention Center Green Reuse Area (BF131801000) via resolution 2018-30346, Former Par 3 Golf Course (BF131804000) via resolution 2018-30349, Maurice Gibb Memorial Park Green Reuse Area (BF131803000) via resolution 2018-30348 and the Fleet Management Green Reuse Site (BF131802000) via resolution 2018-30347.

On November 14, 2018, the City of Miami Beach designated via resolution 2018-30611, approximately 1.5 acres of city-owned property as the Collins Park Garage Green Reuse Area (BF131805000).

City of North Miami Beach:

On December 2, 2002, the City of North Miami Beach approved via resolution (R-2002-59) the designation of the former Pace landfill located at 14700 Biscayne Boulevard as a brownfield area (BF130201000).

On December 4, 2012, the City of North Miami Beach passed Resolution No. R2012-88 which designated the Antigua Redevelopment Site, a property located at 15780 West Dixie Highway, a brownfield area (BF131203000). The property is undergoing site rehabilitation for contamination associated with historic gas storage operations. The proposed redevelopment is mixed use residential.

On November 3, 2015, the City of North Miami Beach approved via resolution R2015-88 the designation of the Taylor Park Green Reuse Area located at 15458 W. Dixie Highway as a brownfield area (BF131501000).

On November 15, 2016, the City of North Miami Beach approved the designations of the Peoples Gas East Parcel Green Reuse Area (BF131603000, Resolution R2016-92) located at 15779 W Dixie Highway and the Former Melting Pot Green Reuse Site (BF131604000, Resolution R2016-91), located at 15700 and 15902 Biscayne Boulevard, as brownfield areas.

On April 12, 2022, the City of North Miami designated the NoMi Square Brownfield Area (BF132201000), consisting of approximately 7.6 acres via resolution R-1017-21.

City of Hialeah:

On October 30, 2003, the City of Hialeah Commission designated the City's enterprise zones as brownfield areas (BF130302000).

On September 13, 2011, the City of Hialeah adopted Resolution No. 11-95 designating property at 1350 West 49th Street a brownfield area (BF131102000). The City of Hialeah also adopted Resolution No. 11-97 supporting a Brownfield Refund Bonus application for a new restaurant facility at the site, projected to create 35 full-time equivalent Florida jobs and demonstrate a fixed capital investment of at least \$2 million in mixed-use business activities, including retail. The restaurant was completed in 2012.

City of Homestead:

On February 22, 2005, the City of Homestead Commission designated the city's Community Redevelopment Area (CRA) as a brownfield area (BF130501000).

On August 22, 2012, the City of Homestead passed Resolution No. R2012-08-70, designating the property at 1499 North Homestead Boulevard, the Homestead Wal-Mart Brownfield Area (BF 131201000).

Town of Medley:

On December 4th, 2006, the Town of Medley passed a resolution (Resolution N. C-959) designating the Medley Auto Parts property, located at NW South River Drive and NW 96th Street, a brownfield area (BF130601000 - Medley Redevelopment Brownfield Area).

City of Miami Gardens:

The Solabella Apartments Brownfield Area was designated by the City of Miami Gardens on July 11, 2012 (BF131202000), via Resolution 2012-94-1689-2-124. A history of agricultural uses was documented at the property located at 17361 NW 7th Avenue. The Solabella Townhome Rental Community project was completed in 2013 and consists of 92 affordable housing rental units.

On June 8, 2016, the City of Miami Gardens passed a resolution (Resolution 2016-119-3018) designating the Willow Lake Apartments Green Reuse Area, located at 123 NW 202nd Terrace, a brownfield area (BF131602000).

On June 12, 2013, the City of Miami Gardens passed and adopted Resolution 2013-159-1955-Z-133, designating the 27th Avenue Corridor Greenpowerment Zone.

City of North Miami:

On January 8, 2013, the City of North Miami designated a contaminated parcel of land, located at 1600 NE 123 Street, and formerly used as a gas station, the Land South Brownfield Area (BF131301000) via resolution R-2013-4. The Land South Brownfield site was rehabilitated and will be redeveloped for commercial and/or retail service use.

On September 23, 2014, the City of North Miami designated the vacant property identified by Miami-Dade County folio number 06-2219-000-1620 as a brownfield area (BF131403000). The property was formerly occupied by the Rucks Park Wastewater Treatment Plant. Development proposals for the Rucks Park site include conservation, recreation, healthcare and/or residential uses.

City of South Miami:

On September 17, 2013, the City of South Miami passed and adopted resolution R202-13-14020, designating the property at 6701 SW 62 Avenue, the South Miami Plaza Preservation Site (BF131303000).

City of Doral:

On December 2, 2015, the City of Doral passed and adopted the designation of the Doral Legacy Park Green Reuse Area (BF131502000) located at NW 114th Avenue, between NW 80th Street and NW 82nd Street, via resolution R15-221.

On April 20, 2016, the City of Doral passed and adopted resolution R16-95, designating the property in the vicinity of NW 102 Ave and NW 62nd Street, identified by Miami-Dade County folio number 35-3017-001-0360, the NW 62nd Street Passive Park Green Reuse Area (BF131601000).

On November 15, 2017, the City of Doral passed and adopted resolution 17-191, designating approximately 260 acres of land and over 220 light industrial and commercial properties as the NW 58th Street Corridor Green

Reuse Area (BF131701000). The brownfield area boundary starts south of NW 58th Street to NW 54th Street, east of the intersection of NW 87th Avenue and NW 58th Street to SR 826, and east between NW 79 Avenue and SR 826 to its southern extent on NW 41st Street.

Village of El Portal:

On December 15, 2015, the Village of El Portal passed and adopted resolution R2015-60, designating the properties at 471 NE 83rd Street and 495 NE 83rd Street, the El Portal NE 83rd Street Green Reuse Area (BF131503000).

On May 23, 2017, the Village of El Portal passed and adopted resolution 2017-14, designating 13.8 acres located at 8650 NW 87 Street, 8500 Biscayne Boulevard and 8360 Biscayne Boulevard, a brownfield area (BF131701000).

Carol City:

On December 12, 2018, Carol City expanded the boundaries of the Carol City Brownfield Area (BF139902000), via resolution 2018-210-3624, to encompass a vacant parcel of land impacted with solid waste owned by Miami-Dade County, located at the southwest corner of NW 183rd Street and NW 37th Avenue.

Florida City:

On February 11, 2020, the City of Florida City designated the Florida City Community Redevelopment Area (CRA) as the Florida City CRA Green Reuse Area (BF132001000), encompassing 809.4 acres, via resolution 20-01.

Town of Cutler Bay:

On October 28, 2020, the Town of Cutler Bay designated the Cutler Bay Civic and Resiliency Enhancement Zone (BF132002000), consisting of 32 acres and 5 parcels of land, via resolution 20-70.

Town of Bay Harbor Islands:

The Town of Bay Harbor Islands designated the CBTS Green Reuse Area (BF132102000) on April 14, 2021, via Resolution Number 2224.

ADDITIONAL ACTIVE BSRA SITES IN MIAMI-DADE COUNTY:

Biscayne Commons

BSRA ID# 130201001

Executed April 7, 2003

Address: 14601 Biscayne Boulevard, North Miami Beach

DERM SW-1428/File-19261

Biscayne Commons, LLC, entered into a BSRA for the redevelopment of a former landfill in the City of North Miami Beach. Solid waste was compacted, utility trenches were completed, and a shopping center was constructed in 2005. A methane gas abatement system was approved and installed. Methane monitoring is being conducted. A request for conditional closure utilizing an alternative groundwater cleanup target level (AGCTL) for ammonia was reviewed by DERM. DERM requested an additional round of groundwater sampling from eastern wells to facilitate NFAC closure evaluation. Based on the results of the requested additional round of sampling, on October 7, 2021, DERM issued an Acknowledgment of Intent to Pursue Conditional Closure which requested, among other deliverables, an Engineering Control Plan and an Engineering Control Maintenance Plan.

Midtown Miami/Former FEC Buena Vista

BSRA ID# 139801002

Executed December 18, 2003

Address: North Miami Avenue between NE 29th ST & NE 36th ST, Miami
DERM UT-5419/File-10621/DEP-139805136

A BSRA was executed with Biscayne Development Partners, LLC, for the Midtown Miami/Former FEC Buena Vista site. The site was formerly owned by the Florida East Coast Railway and was used as a storage yard for freight containers in the maritime transport of goods. The contamination assessment documented lead and arsenic in the soil and arsenic and petroleum contamination in the groundwater. This site is currently pending additional groundwater assessment at the property boundaries for arsenic, which was previously assessed at the northern, eastern and western boundaries. Therefore, pursuit of a No Further Action with Conditions site closure with institutional and engineering controls is currently on hold pending the completion of this monitoring. The development is mixed use and when completed will consist of 600,000 square feet of retail space, 3,000 condo lofts and 350 apartment units. It will have an estimated development value of \$1.2 billion and will generate an estimated 1,700 permanent jobs. For Tract F, a Soil Management Plan was approved on December 2, 2015 for the construction of the Wal-Mart store and the Engineering Control Certification is pending. For Parcel 5 (Tract E), the engineering controls have been verified for a commercial/residential building and an ECMP was approved on May 4, 2018. For Midtown 8 (Tract A&B), a Soil Management Plan was approved on 11/15/17 with supplemental information approved on January 12, 2017. The construction plans were approved on 4/26/17 for this parcel. Groundwater assessment for the parcel is complete. The site is currently built and is pending approval of a Source Removal Report for engineering controls for the future conditional closure. FEC and the City of Miami have agreed to encumber their properties via a restrictive covenant for offsite groundwater impacts. The development of another high rise has been completed on Parcel 6, Tract D. This new building includes residential, retail and commercial space. A contaminated soil management plan (inclusive of dust control and air quality monitoring) was approved for implementation during demolition activities and other ground disruptive tasks of construction. Approximately 11,000 tons of contaminated soils have been removed and disposed of in relation to this project. The overall Midtown site is currently pending the submittal of the groundwater sampling report for closure with conditions.

McArthur Dairy 7th Avenue

BSRA ID# 139801005

Executed October 7, 2005

Assignment and Assumption Agreement Executed June 8, 2021

Address: 2451 NW 7th Avenue, Miami

DERM IW5-8903/File-7532/DEP-138628942

McArthur Dairy Inc. executed a BSRA for the property located at 2451 NW 7 Avenue on October 7, 2005. The BSRA was assumed by McArthur Dairy, LLC on May 3, 2006, and later by 2451 NW 7th Avenue Realty, LLC. in 2021. McArthur Dairy operated a dairy products distribution facility with a fleet management garage at the site until March 31, 2008. Oil water separators, hydraulic lifts, and underground storage tanks were removed and the site is now vacant. The site assessment was completed and approved on January 28, 2011. Groundwater monitoring was conducted in support of a No Further Action with Conditions Closure. The contaminants of concern included Volatile Organic Compounds, Phenols, Polycyclic Aromatic Hydrocarbons, Total Recoverable Petroleum Hydrocarbons and Arsenic. The BSRA is pending assignment and assumption by 2451 NW 7th Avenue Realty, LLC. The current owner has elected to pursue NFA for the site by conducting source removal. Further site assessment is pending.

TMR Cairo Lane

BSRA ID# 139901001

Executed December 28, 2012

Address: 13200 Cairo Lane, Opa-Locka

DERM SW-1160/File-9125

Trademark Metals Recycling, LLC, entered into a BSRA for the property located at 13200 Cairo Lane in the City of Opa Locka. The site has been and is currently used as an automobile parts metal recycling facility and the redevelopment consists of site improvements. Both petroleum contamination and non-petroleum contamination (iron, ammonia, etc.) have been identified in both groundwater and soils at the site. Site assessment activities are complete and the facility currently has approved Engineering Controls in place. The site will be closed under the No Further Action with Conditions provisions with on-site groundwater impacts and on-site soil impacts being addressed with engineering controls. A draft covenant closure package has been submitted. Recent groundwater data provided for a permit required monitoring program supports that additional boundary confirmation sampling for groundwater is required and is pending.

Resorts World Miami

BSRA ID# 139801006

Executed December 28, 2012

Address: Vicinity of One Herald Plaza, Miami

DERM HWR-602/File-22234

Resorts World Miami, LLC entered into a BSRA for the rehabilitation and redevelopment of several contiguous downtown Miami properties, including a parcel that housed the former Miami Herald building at One Herald Plaza. Site assessment activities documented Arsenic, Barium and Polycyclic Aromatic Hydrocarbon soil contamination and Arsenic, Ammonia and Vinyl Chloride contamination of the groundwater. Monitoring of the groundwater is currently being conducted. Demolition of existing structures was completed. Development plans are currently unknown.

Procacci 1400

BSRA ID# 130843002

Executed December 31, 2013

Amended July 22, 2020

Address: 1400 NW 110th Avenue, Sweetwater

DERM HWR-781

A BSRA was executed between MDC and Procacci 1400, LLC for the property at 1400 NW 110th Avenue on December 31, 2013. The Procacci 1400 BSRA was later amended (July 22, 2020) to modify the site boundaries and amend certain attachments. Cemex formerly operated at this facility. DERM records also indicate the underground storage of petroleum products between 1987 and 1993. The eastern portion of this property is encompassed by the former Marks Brothers Dump/Lake fill and contains buried solid waste. Groundwater monitoring for the future No Further Action with Conditions was completed. The site is in the preliminary process of pursuing development of an Atlas Air Training facility. Site construction and drainage plans are in the review process. The site has an ongoing Interim Engineering Control Plan pending completion of the final development, which is still undetermined at this time. However, groundwater assessment has been approved for potential drainage locations.

Former Peoples Gas System

BSRA ID# 131203001

Executed December 31, 2013

Address: 15780 West Dixie Highway, North Miami Beach

DERM IW5-1444/File-1343

December 31, 2013, a BSRA was executed between MDC and Antigua at NMB Development, LLC for the property at 15780 West Dixie Highway, North Miami Beach. On September 4, 2014, Moore 77, LLC was added to the BSRA by amendment. The parcel is currently vacant, but it was previously part of a manufactured gas plant (MGP) that began operation in 1930. DERM records indicate that the parcel was mainly used for gas storage, which ceased in 1984. The site rehabilitation activities conducted since 1984 have consisted of assessment, soil removal (also targeting residual coal tar) in the late 1980s and early 1990s, hydraulic pump tests in 2007 and a biosparge/soil vapor extraction pilot test in 2010. Between December 2013 and May 2014, an Interim Source Removal (ISR) was implemented to address the direct exposure risk concerns from contaminated surface soils within the site and to remove visible MGP residual within the footprint of the shallow groundwater plume. The ISR resulted in the excavation and proper disposal of approximately 54,000 tons of soils and 4000 gallons of contaminated water. Following source removal, a cap of 2 ft of clean fill underlain with a high-visibility permeable geosynthetic liner, was placed in all areas subject to remediation and in a former borrow area. Hydroseeding of the capped surface was then implemented for long term dust control. Between May and July 2014, approximately 4.2 acres of a 4.8-acre former borrow pit located in the southern half of the property was filled with clean sand. On November 19, 2015, based on a cleanup goal of No Further Action with Conditions, DERM reviewed and approved a Remedial Action Plan (RAP) to address contamination at four parcels impacted with contamination associated with the Former Manufactured Gas Plant (BF131203001, 131603001 & 131604001). The treatment system originally approved for this parcel consisted of a biosparging/soil vapor extraction curtain along the eastern boundary of the property with 19 biosparging wells (extending to 40 bls) and 10 soil vapor extraction wells. However, confirmatory sampling collected in January 2016 during the installation of the biosparging wells, revealed the presence of contamination in the deep and intermediate zones of the aquifer, which was not previously documented. As a result, the treatment system was modified to incorporate 21 additional biosparging wells, for a total of 40 wells (at depths ranging from 40 ft bls to 74 ft bls) to be operated in four zones with 10 soil vapor extraction wells. The treatment compound for the remedial system is located on the East Parcel of the Former Manufactured Gas Plant (BSRA - BF131603001). RAP Construction Plans were approved by DERM in June 2018. The commissioning and start-up activities of the system were completed in March 2020 and the start-up report, along with record drawings were submitted to DERM in June 2020. Since then, the remedial system has remained operational. The most recent correspondence issued by DERM has required a RAP modification (inclusive of supplemental assessment) to address contamination on wells that are located outside of the influence of the existing remediation system.

Opa-Locka CDC

BSRA ID# 139901002

Executed September 26, 2014

First Amendment September 13, 2021

Address: 432 Opa-Locka Boulevard, Opa-Locka
DERM UT-4230/File-9956

The Opa-Locka Community Development Corporation, Inc. (OLCDC) entered into a BSRA for the OLCDC's Moorish-style historic Hurt Building, which began as a hotel in 1926. The building is currently used as offices for the OLCDC and as a community health center. A petroleum discharge was documented at the site after the discovery of three improperly abandoned steel underground storage tanks that were believed to be related to the property's former operation as a gas station circa 1930-1950. The three underground storage tanks were removed. Site assessment documented petroleum contaminated groundwater consisting of Total Recoverable Petroleum Hydrocarbons, Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons and lead. Delineation of groundwater contamination is required. Subsequent to execution of the BSRA, OLCDC applied for the FDEP's Petroleum Cleanup Participation Program (PCPP) and was deemed eligible on September 6, 2016 with a priority score of six. FDEP has determined that the Person Responsible for Site Rehabilitation can maintain the BSRA, along with the PCPP eligibility, and await site assisted rehabilitation funding based on the site's priority score. A BSRA amendment to reflect modified submittal timeframes based on PCPP funding was executed on September 23, 2021. A Low Score Assessment report was completed on April 11, 2019 to characterize the eligible discharge for risk. Further assessment is required; however, the facility was placed back into the priority score order to await funding under the PCPP.

1255 NW 103rd Street

BSRA ID# 139904003

Executed December 18, 2014

Address: 1255 NW 103rd Street, Unincorporated Miami-Dade County
DERM UT-3181/File-9133/DEP-138943364

103 FD LLC entered into a BSRA for the property located at 1255 NW 103rd Street. The site was a former gas station contaminated with petroleum products, which was redeveloped as a Family Dollar Store. A Monitoring Only Plan was approved and implemented in 2015. In July 2015, the cleanup criteria had been met for all on-site monitoring wells. The only remaining contamination was limited to an off-site well in the median of the right of way owned by FDOT. Based on the unfeasibility of addressing this contamination, a No Further Action based on the memorandum of understanding between FDEP and FDOT signed in June 2014 has been requested.

Former Rucks Park

BSRA ID# 131403001

Executed December 23, 2014

Address: 13780 NE 5th Avenue, North Miami

DERM IW5-8624/File-8022

The City of North Miami entered into a BSRA for a vacant property identified by Miami-Dade Folio number 06-2219-000-1620. The property was formerly occupied by the Rucks Park Wastewater Treatment Plant and contained a plant nursery. Current contaminants of concern include arsenic, ammonia and fecal coliform in the groundwater and arsenic, lead, pesticides and polycyclic aromatic hydrocarbons in soil. Site assessment activities are on-going, and off-site soil and groundwater contamination has been documented. A background study for arsenic in soil is currently being conducted. Mixed use/affordable housing development is proposed for the site.

Former Westview Golf Course

BSRA ID#139904004

Executed December 18, 2015

First Amendment July 22, 2020

Address: 11700 East Golf Drive, Unincorporated Miami-Dade County

DERM AW-173/File-9374

CP Logistics Westview, LLC, and later in the First Executed Amendment executed July 22, 2020, Westview Plaza LLC, entered into a BSRA for a vacant parcel formerly known as the Westview County Club Golf Course. The property, approximately 77.37 acres, is the portion of the former golf course located south of NW 119th Street. The golf course operated from 1958 until 2011. The northern 20 acres (the commercial parcels) are being redeveloped for commercial and residential uses. Construction of the RaceTrac gasoline service station has been completed and the construction of a fast-food restaurant is underway. The northern 20 acres will also contain a small area being preserved as an archeological site. The remainder of the property has been developed for industrial use, consisting of a logistical center (Logistics Center) with six warehouses and guardhouse. An estimated 2000 jobs are expected to be created upon development of the property. The former maintenance area is planned to be redeveloped as a 5-acre park and the engineering control, two feet of clean fill, has been completed. The park is expected to contain green space, fields, tennis courts basketball courts and a playground. An 8-acre portion of the Site will be developed into a residential neighborhood by Lennar Homes, LLC that is planned to have two feet of clean fill as the engineering control and prevent further disturbance of the archeological area. Soil and groundwater investigation identified the current contaminants of concern to be arsenic, dieldrin, and toxaphene in soils and arsenic in groundwater and surface water (lakes). Soils are currently being addressed pursuant to No Further Action with Conditions provisions, utilizing engineering controls consisting of either 2 feet of clean fill, asphalt/concrete pavement, or building foundation. Some of the formally existing lakes were either filled completely or reshaped. Stormwater retention ponds/lakes have been constructed along the eastern, western and southern property boundaries and an additional (new) pond/lake has been constructed in the north-central portion of the property. Groundwater modeling was conducted to demonstrate the proposed storm water management system will not cause the arsenic contaminated groundwater to migrate offsite. Quarterly groundwater monitoring at perimeter wells is currently being conducted. An in situ pilot test was recently conducted to address an area of groundwater arsenic contamination along the western site boundary. The Pilot Test Plan was approved January 20, 2023. Engineering controls and soil management were completed as of January 2021 within the industrial use portion of the property, the planned park area, and portions of the commercial use area (RaceTrac). Monitoring wells at the property boundary detected groundwater contamination during and following site earthwork is currently being delineated prior to the submittal of a MOP in support of NFAC.

NE 83rd Street Green Reuse Site

BSRA ID#131503001

Executed December 18, 2015

Address: 471 and 495 NE 83rd Street, El Portal

DERM HWR-841

BH 495 NE 83rd Street, LLC purchased the parcels located at 471 and 495 NE 83rd Street in 2013. Shortly thereafter, BH 495 demolished and cleared several residential structures spanning both parcels and has since maintained the parcels as vacant land. BH 495 entered into a BSRA on December 21, 2015. The contamination at the site consists of arsenic, PAHs, selenium and arsenic in the soil, and arsenic and ammonia in the groundwater. Pre-construction groundwater monitoring was completed in 2018 in pursuit of a No Further Action with Conditions with institutional and engineering controls. The site will be redeveloped into a high-rise, mixed-use development, with ground floor retail and residential towers; however, development is still pending. A contaminated Soil Management Plan was approved on May 14, 2021 and a quarterly report of soil management plan activities has been submitted to DERM for review.

Redland Market Brownfield Area Site

BSRA ID#139912002

Executed June 27, 2016

Address: 13593 SW 248th Street, Unincorporated Miami-Dade County
DERM UT-2448/File-8556/FDEP-138945065

On June 27, 2016, a BSRA was executed with Redland Market Village, Inc. for the Redland Market site, consisting of ten parcels. A portion of the site formerly operated as a gas station and has documented contamination associated with a 1990 petroleum discharge. Additional historic uses include agriculture and industrial. The petroleum discharge became eligible for the Abandoned Tank Restoration Program (ATRP) on June 15, 2016. FDEP has determined that the Person Responsible for Site Rehabilitation can maintain the BSRA, along with the ATRP eligibility, and await site assisted rehabilitation funding based on the site's priority score, if a BSRA amendment reflecting these changes is executed. Further site assessment is pending.

BSRA ID#131602001

Executed October 3, 2016

Address: 123 NW 202nd Terrace, Miami Gardens

DERM SW-1675/File-25104

BSRA was executed between Miami Dade County (MDC) and Willow Lake Associates, Ltd. for the property located at 116-142 NW 202nd Terrace. The west parcel was previously used as a water treatment plant between the 1960s and 1985. Soil and groundwater contamination of inorganics has been documented on the western portion of the site. Site improvement and development activities were initiated in 2016 in accordance with plans approved by DERM to develop a multi-family complex consisting of residential buildings, paved parking areas, paved roadways, and landscaped areas. A Site Assessment Report was approved on February 8, 2016 and a Monitoring Only Plan for the intended No Further Action with Conditions was approved on February 17, 2016. Site construction has been completed and quarterly groundwater monitoring continues in pursuit of a No Further Action with Conditions (NFAC). An Engineering Control Plan and Maintenance Plan was approved on May 2, 2018.

Liberty NW 79th Street

BSRA ID#139904005

Executed December 21, 2016

Address: 2160 NW 79th Street, Unincorporated Miami-Dade County

DERM HWR-837

A BSRA was executed between Miami Dade County (MDC) and Liberty NW 79th Street for the property located at 2160 NW 79th Street. DERM Records indicate that the parcel previously housed a plant nursery and contamination assessment documented arsenic soil and groundwater contamination of inorganics. A soil management plan was approved on March 3, 2017. The western portion of the site was developed into a gas station and convenience store. The eastern side of the site is still undeveloped. A site assessment report and groundwater sampling plan in pursuit of a No Further Action with Conditions was approved in 2017 and quarterly groundwater monitoring is ongoing.

Peoples Gas East

BSRA ID#131603001

Executed December 21, 2016

Address: 15779 West Dixie Hwy, North Miami Beach

DERM HWR-873

On December 21, 2016, a BSRA was executed between MDC and Peoples Gas System for the property located at 15779 West Dixie Highway, North Miami Beach. This property was used as a manufactured gas plant between the 1930's and 1959, when the operation was converted to a natural gas distribution system. Contamination site rehabilitation activities have been conducted since 1984 and have consisted of soil removal (also targeting residual coal tar) in the late 1980s and early 1990s, hydraulic pump tests in 2007 and a biosparge/soil vapor extraction pilot test in 2010. On November 19, 2015, based on a cleanup goal of No Further Action with Conditions, DERM reviewed and approved a Remedial Action Plan (RAP) to address contamination at four parcels impacted with the contamination associated with the former manufactured gas plant (BF131203001, 131603001 & 131604001). At this parcel, the system consists of a biosparging/soil vapor extraction curtain along the western boundary with a total of 63 biosparging wells at depths ranging from 40 ft below land surface (bls) to 67 ft bls and 17 soil vapor extraction wells. The construction of the remedial system was completed in February 2020. This parcel also houses the equipment compound of the remedial system installed at the West Parcel of the former Peoples Gas facility (BF #131203001). The commissioning and start-up activities of the remediation system were completed in March 2020 and the start-up report, along with record drawings were submitted to DERM in June 2020. Soil/Source removal activities were conducted in conjunction with site improvements (stormwater management system, etc.) between January 2019 and April 2021. Approximately 39,000 tons of contaminated soils were excavated and removed from this parcel. The remediation system remains operational since the March 2020 start-up and Operation and Maintenance reports are routinely submitted to DERM in accordance with the approved RAP.

Former Melting Pot Parcels

BSRA ID#131604001

Executed December 21, 2016

Address: 15700 Biscayne Blvd & 15902 Biscayne Blvd, North Miami Beach

North Miami Beach

DERM HWR-872

On December 21, 2016, a BSRA was executed between MDC and People Gas System for properties located at 15700 Biscayne Boulevard and 15902 Biscayne West Dixie Highway, North Miami Beach, which are impacted with groundwater contamination as a result of the off-site migration of a groundwater plume originating at a former manufactured gas plant, located at 15779 West Dixie Highway. Based on a cleanup goal of No Further Action with Conditions, the DERM reviewed and approved a Remedial Action Plan (RAP) on November 19, 2015, to address contamination at four parcels impacted with the contamination associated with the former manufactured gas plant (BF131203001, 131603001 & 131604001). At this parcel, the system consists of a biosparging/soil vapor extraction curtain along the western boundary of the property that comprises 28 biosparging wells (at depths ranging from 40 ft bls to 67 ft bls) and 8 soil vapor extraction wells. The remedial action construction plans were approved by RER in October 2017. The remedial activities using the Biosparging system were initiated in July 2018 and since then the system has been operational. The most recent review by DERM of an Operation and Maintenance Report recommends the preparation of a RAP Modification to address contamination in wells outside of the radius of influence of the remediation system.

Civic Towers Brownfield Site

BSRA ID#139801013

Executed March 16, 2017

Address: 1855 NW 15th Ave, Miami

DERM HWR-556

Civic Towers LLLP entered into a BSRA on March 16, 2017. The site use is affordable multi-family (196 units) residential with planned renovations to include a new roof system, upgraded windows, upgraded outdoor and indoor amenities and new Wi-Fi. Buried debris and soil contamination were identified during site investigation related to a property transaction. Soil impacts with mainly arsenic, barium, dioxins, lead, and PAHs and groundwater impacts with primarily arsenic, barium, lead, iron and aluminum have been identified at the site. An Engineering Control Plan and Groundwater Monitoring Plan in support of No Further Action with Conditions have been approved for the site. The engineering control has been installed and the site has completed groundwater monitoring to support the NFAC closure. A draft restrictive covenant package has been submitted and reviewed. The covenant is in the process of being executed and recorded.

T.M. Alexander Apartments

BSRA ID#139801014

Executed March 16, 2017

Address: 1400 NW 19th Street, Miami

DERM HWR-868

Civic Towers Senior LLLP entered into a BSRA on March 16, 2017 for the T.M. Alexander Apartments. The site is currently affordable senior residential housing and site renovations, including a new roof system, upgraded windows, upgraded outdoor and indoor amenities, and new Wi-Fi, are planned. Buried debris was identified during site investigation related to a property transaction. Soil contaminants include arsenic, barium, dioxins, lead, and PAHs and the groundwater is primarily impacted with iron and aluminum. An Engineering Control Plan and Groundwater Monitoring Plan in support of No Further Action with Conditions have been approved for the site. The engineering control has been installed and the site has completed groundwater monitoring to support the NFAC closure. The draft restrictive covenant package has been reviewed. The covenant is in the process of being executed and recorded.

Former Biscayne Chemical

BSRA ID# 139801015

Executed June 26, 2018

Address: 690 NW 13th Street, Miami

DERM IW5-4745/File-4393

On June 26, 2018, Rumasa Corporation entered into a BSRA for the Former Biscayne Chemical site which operated as a retail chemical warehouse used to store bulk cleaning chemicals and solvents for distribution from the 1940s to 2000. The BSRA was assumed on October 23, 2019 by KTLC Biscayne, LLC. Soil and groundwater are contaminated by Volatile Organic Halocarbons (VOHs). The Site Assessment and Interim Source Removal activities were completed in 2020. In October 2020, FDEP and EPA approved an application for site-specific activities under the SRP grant. The site conducted remedial action activities in April 2021 and is currently, conducting groundwater monitoring. A Post Active Remedial Monitoring Plan provisionally approved (January 2022) is ongoing. The site is unoccupied and demolition efforts have been conducted for the garage area. The site is going to be redeveloped for approximately 600 units of affordable housing with almost 13,000 square feet of ground level retail and a total capital investment of approximately \$160 million.

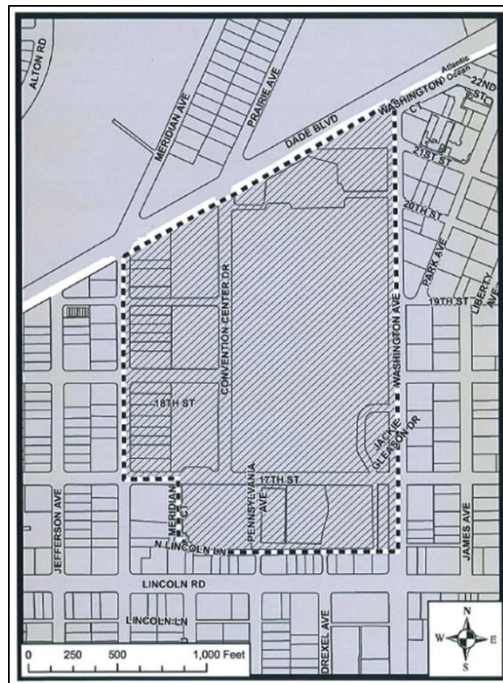

Convention Center Site

BSRA ID# 131801001

Executed October 1, 2018

Address: 1700 Convention Center Drive, Miami Beach
DERM HWR-812

The City of Miami Beach identified soil arsenic contamination after preparation of a Phase I and Phase II Environmental Site Assessment in 2014. A portion of the site operated as a golf course in the 1950s. Construction has commenced and further site assessment is pending in pursuit of a No Further Action with Conditions. The Convention Center was renovated and expanded. On April 24, 2020, DERM approved the proposed site assessment plan to complete the site assessment of the remainder of the Miami Beach Convention center and other associated sites under the BSRA. Partial Engineering control implementation reports have been provided and completion of the site-wide site assessment, including a groundwater background investigation, is on-going.

BSRA ID# 131803001
Executed October 1, 2018
Address: 1700 Purdy Ave, Miami Beach
DERM UT-5443/File-15745
DEP-139813745

Maurice Gibb Memorial Park, established by the City of Miami Beach circa 1969, consists of a passive use recreational facility and a boat launch ramp and building for the Miami Beach Police Marine Patrol. Prior to 1969, at least two facilities (Gulf Oil Company and Amber Oil Company) stored hydrocarbons on the property. Additionally, an unknown building was identified on the northern portion of the site. In June 1997, petroleum contamination, in the form of free-phase floating product, was discovered in a monitoring well installed in the park. Soil contamination has also been documented. Soil remediation will be conducted in conjunction with park renovations, to include replacement of playground equipment, new landscaping, irrigation and new park furnishings. A report with the findings of the supplemental site assessment and proposal for engineering controls and corrective actions was approved by DERM and is pending completion.

Fleet Management Site

BSRA ID# 131802001

Executed October 1, 2018

Address: 140 MacArthur Causeway, Miami Beach

DERM UT-2689/File-3527

DEP-9201879

The Fleet Management Site, which includes a maintenance facility and filling station for the City of Miami Beach, has two petroleum discharges, discovered September 19, 1989 and October 5, 1992. Redevelopment options may include expanded City operations and commercial or retail use. Free-floating product has been present since 1992, and soil Total Recoverable Petroleum Hydrocarbon (TRPH) contamination has been documented. Site assessment activities are being conducted for contaminated soil (TRPH, arsenic, BAP TEQ, and lead above direct exposure cleanup target levels (CTLs), and BTEXs, VOCs, TRPH, PAHs above leachability based on groundwater and/or marine surface water CTLs) and groundwater (PAHs and VOCs). An Interim Source Removal Report dated April 10, 2023, documented removal of free product in the groundwater at MW-8. Groundwater monitoring is being conducted.

Castle Opa Site

BSRA ID# 139901003

Executed December 19, 2018

Address: 1700 Service Road, Opa-Locka

DERM IW5-3869/File-3575

The 7.6-acre Castle Opa Site, formerly known as the Cuyahoga Wrecking site, was used for agriculture through the 1950s, and then as a borrow pit lake by 1968. In the 1970s the borrow pit was filled with construction debris, until 1978 when lake filling was completed. A large maintenance building and operations area were located within the northwestern quadrant for over twenty-five years. Uncontrolled dumping, burying of debris and improper disposal of asbestos containing material (ACM) occurred at the site. Assessment activities conducted from 1992 –2008 reported TRPH, oil and grease, Volatile Organic Aromatics, Polycyclic Aromatic Hydrocarbons, lead, copper and arsenic, ammonia, and Total Dissolved Solids at concentrations above their applicable soil cleanup target levels and/or groundwater cleanup target levels. In 1998, a Brownfields Targeted Site Assessment was conducted. The FDEPs Bureau of Emergency Response removed approximately 3,000 cubic feet of asbestos tiles from three containers on the site. Additionally, multiple piles of bagged ACM identified throughout the site were removed in May-June 2018. In 2018, the City of Opa-Locka funded the preparation of a Phase II Environmental Site Assessment for the site via its EPA Brownfields Community-wide Assessment Grant. Redevelopment plans include mixed-use residential and commercial/retail. Site assessment, including off-site delineation, is being conducted. This includes a background sampling proposal for groundwater. Off-site notification of groundwater impacts have been provided to the FDEP by the responsible party. A background study for groundwater has been submitted and is under review.

Skilled Nursing Facility Brownfield Site

BSRA ID# 131104003

Executed December 19, 2018

Assigned August 21, 2019

Address: 3635 NW 78th Ave, Doral

DERM UT-1866

On December 19, 2018, a BSRA was executed by Care Outlook, LLC and Florida International Medical Center, LLC. On August 21, 2019, 3635 Doral Land Development, LLC assumed the BSRA from Care Outlook, LLC. This approximately 9.92-acre site, currently developed with two commercial buildings, a showroom/warehouse building, and two tiki huts, was part of a 72-acre stone quarry that operated from the 1940s to the 1960s. The quarry was backfilled by 1968 with construction debris. A Phase II Environmental Site Assessment conducted in 2018 documented solid waste and groundwater contamination- specifically, ammonia, total dissolved solids, iron and dieldrin. The design of a methane gas management system was approved for the site on February 25, 2020. A Groundwater Monitoring Plan in support of No Further Action with conditions was approved November 29, 2021, with contaminants of concern including Iron, Manganese, Ammonia, OCPs, and Total Dissolved Solids. The fourth quarterly monitoring report has been submitted and is currently under review. An updated Engineering Control Plan is pending submittal. Proposed plans for the site include demolition of the existing structures and construction of a skilled nursing facility and medical office building.

Proposed Dolphin Professional Centre Site

BSRA ID# 130843003

Executed December 19, 2018

Address: 1695 NW 110 Ave, Sweetwater

DERM IW5-20757 and SW-1016

The Proposed Dolphin Professional Centre Site was formally part of the Marks Brothers Dump Site (reportedly closed in 1976). Test pits/borings conducted onsite indicate the waste primarily consists of construction and demolition debris, including concrete rubble, wood, shingles, glass, plastic, and muck. Solid waste was discovered in the upper 4 feet down to a depth of approximately 30 feet at the western property boundary. Solid waste removal from beneath the building footprint to approximately 8-43 feet below land surface (western portion) was completed in 2008. Excavations were backfilled with clean concrete rubble fill material. Soils onsite are contaminated with PAHs. Iron and ammonia groundwater contamination has been documented, and delineated onsite, and will be addressed through groundwater monitoring in pursuit of NFAC. Methane gas detected at levels > 25% LEL will be addressed through a methane gas monitoring/management system. A soil management plan was approved and pre-construction earthwork commenced in July 2017. The site was redeveloped for commercial use consisting of 54,000 square feet of Class A offices, 26,000 square feet of ground floor retail, and commercial condominium space. Engineering controls Groundwater monitoring and methane gas assessment and monitoring in support of NFAC are being conducted.

Collins Park Garage Green Reuse Site

BSRA ID# 131805001

Executed December 19, 2018

Address: 340 23rd Street and 2200 Liberty Ave, Miami Beach
DERM UT-480/File-7205/DEP 138503541

The City of Miami Beach entered into a BSRA for the Collins Park Garage property identified by Miami-Dade Folio numbers 02-3226-001-0400 and -0405. This property was formerly occupied by a Chevron No. 47617 fuel service station. DERM records indicate that four underground storage tanks (USTs) were installed in 1983 and registered under FDEP Facility Identification No: 138503541. A Discharge Reporting Form indicated a used waste oil overfill at the facility on March 1, 1989. The site was deemed eligible for the Florida Petroleum Liability and Restoration Insurance Program (FPLRIP) in February 1994. The remediation ceased in March 1995. A TCAR completed in January 2019 documented the removal of 5-1000 gals USTs and 2238 tons of contaminated soil from the site. 2948 tons of clean fill, 1518 tons of characterized soil and 495 pounds of Regenesis Oxygen Release Compound® were used to backfill the excavation. Contaminants of concern that exceeded applicable CTLs in soil are Arsenic, Isopropyl benzene (IPB), 1,2,4-Trimethylbenzene, naphthalene, 1-methylnaphthalene and 2-methylnaphthalene in groundwater. Site assessment activities are being conducted. The construction of the parking garage has been completed.

Industrial Shipping

BSRA ID# 139905001

Executed December 19, 2018

Address: 2974 NW N River Drive, Miami

DERM IW5-3744/File-3462

2974 NW North River Drive, LLC, entered into a BSRA for the Industrial Shipping site, consisting of 19 parcels and currently operating as a shipping import/export company. The site was historically developed as residential and commercial buildings in the early 1930s, and then became industrial/commercial from the 1940s to present date. A Phase I was performed due to the potential purchase and redevelopment of the subject property. The contaminants of concern for the site are Arsenic, Lead, Barium, Mercury, PAH and Trichloroethene in the soil. A Groundwater Monitoring Plan Approval Order in support of NFAC was issued for the site on November 4, 2020, for Aluminum, Arsenic, Lead, Mercury and PAHs. The Groundwater Monitoring Plan was deemed complete and no further groundwater monitoring was required on January 18, 2023. An Engineering Control Plan/Engineering Control Maintenance Plan ECP/ECMP and Revised Engineering Control Implementation Report ECIR were approved on May 19, 2023. A No Further Action with Conditions Proposal is pending.

Riverfront Brownfield Site

BSRA ID# 139801016
Executed December 19, 2018
Address: 24 SW 4th Street, Miami
DERM HWR-848

A BSRA for Riverfront Brownfield site was executed between MDC and Miami River Project, LLC and KAR Miami MRP, LLC for the Riverfront Brownfield Site. The site was part of FEC rail yard operations. The property is currently vacant. Soil contamination discovered in 2016 consists of Arsenic, Lead, TRPH and PAHs. Source removal was conducted in 2018 within the boundaries of the property with the exception of areas at the perimeter where the soils were inaccessible under the roads. The "unexcavated" soils are covered by impermeable materials and are planned to be removed and property disposed of as part of the development of the site. A Groundwater Monitoring Only Plan was approved by DERM on September 21, 2016 for one well for BTEX and Arsenic. The groundwater monitoring requirements have been satisfied (two consecutive events below cleanup target levels). Contaminated soils at the perimeter of the site (which are covered by engineering controls) will be removed in conjunction with development and construction. An update on the timeline for development is pending.

297 NE 67 Street Redevelopment Site

BSRA ID# 1319801018

Executed December 16, 2019

Amended March 21, 2021

Address: 290 & 280 NE 68th Street & 277, 287 & 297 NE 67th Street, Miami

DERM HWR-1007

Acres: 0.94 acres

290 NE 68 Street, LLC, entered into a BSRA to rehabilitate and redevelop the 297 NE 67 Street Redevelopment Site, which was leased to an equipment supplier that sold equipment to laundry and dry cleaning service operations since the 1970s. It is suspected that in the 1970s, the site may have stored dry cleaning plant equipment which contained small amounts of tetrachloroethene (PCE). The Site Assessment Report documented groundwater contamination consisting of tetrachloroethane, trichloroethene, vinyl chloride, cis-1,2-dichloroethene, chloromethane, 1,1-dichloroethene, and chloroform. Further site assessment is pending. The owner plans to refurbish and update the warehouses and office spaces into a variety of upscale mixed warehouse/office businesses. The BSRA was amended March 21, 2021 to include an additional PRFBSR. A restrictive covenant was recorded for the site March 29, 2022. However, site assessment for the groundwater conditions is ongoing. Groundwater monitoring wells installed at the boundaries of the site at various depth intervals (shallow, intermediate, deep) documented vinyl chlorine contamination. Additional groundwater assessment will be conducted as well as investigation of potential offsite contamination. On March 1, 2021, the BSRA for 297 NE 67 Street Redevelopment Site was amended to update certain provisions and attachments and add a Person Responsible for Brownfield Site Rehabilitation to the BSRA.

237-295 NW 20th Green Reuse Site

BSRA ID# 1319801019

Executed December 24, 2019

Address: 237-295 NW 20th Street, Miami

DERM IW5-2112

Acres: 0.84 acres

Miami Development 2122 Trustee, Inc., as Trustee for Land Trust Miami – 2122, entered into a BSRA on December 24, 2019 for the rehabilitation and redevelopment of properties located at 237-295 NW 20th Street. The site was a food market with an adjacent vacant lot, but historic uses included a junk yard and auto wrecking facility, auto repair shops and a blacksmith. Site assessment activities documented metals contamination in the soil and groundwater. A Site Assessment Report documented soil contamination consisting of Arsenic, SPLP Arsenic, Cadmium, SPLP Cadmium, Lead, and SPLP lead. Further assessment is still pending. The site will be redeveloped for commercial/retail use.

Grouper Park Green Reuse Site

BSRA ID# 139911002

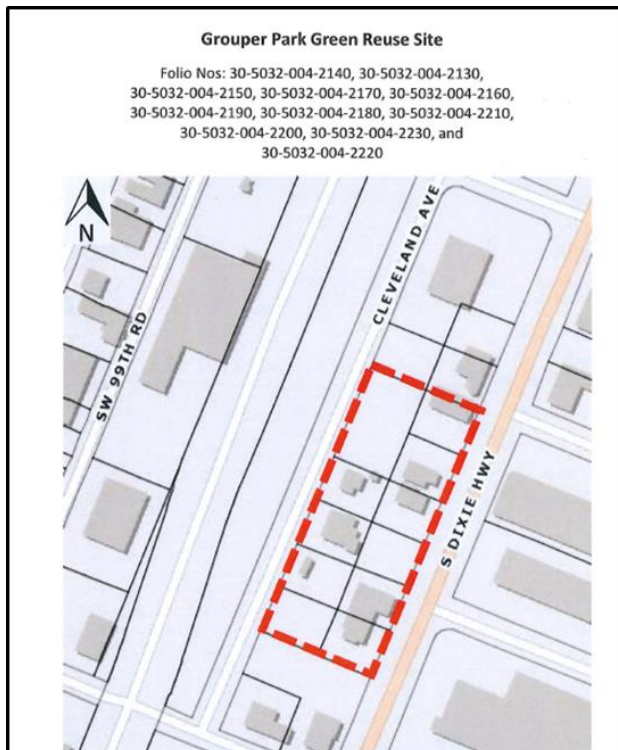

Executed December 24, 2019

Address: 17600-17700 S Dixie Hwy and 17613-17665 Cleveland Ave, Unincorporated Miami-Dade

County

DERM IW5-292

Grouper Park, LLC, entered into a BSRA on December 24, 2019 for the rehabilitation and redevelopment of properties located at 17600-17700 S Dixie Highway and 17613-17665 Cleveland Ave. A portion of the site historically included Bob's Spray Service, a pesticide storage and mixing facility for 30 plus years, with a wastewater underground storage tank located on the northwestern corner of the facility. Site assessment activities documented pesticides contamination in the soil and groundwater. The site is pursuing No Further Action with Conditions closure with engineering controls. Further site assessment and a source removal is pending. The site will be redeveloped for commercial use.

Paradise Gardens Green Reuse Site

BSRA ID# 139912004

Executed December 24, 2019

Address: Vicinity of SW 139 Ave & SW 260 ST (Folios: 30-6927-013-0015 & 30-6927-000-0435),

Unincorporated Miami-Dade County

DERM HWR-922

On December 24, 2019, a BSRA was executed with Paradise Gardens Green Reuse LLC. The site has Arsenic and Chromium soil contamination and Nitrate groundwater contamination. The site was formerly used for agriculture and is currently being re-developed as a portion of the Miami Urban Village, a mixed-use development consisting of 665-unit multifamily apartment and retail buildings. A Site Assessment Report Addendum and Soil Management Plan operating report is pending for the site.

Modern Towers Green Reuse Site

BSRA ID# 139912005

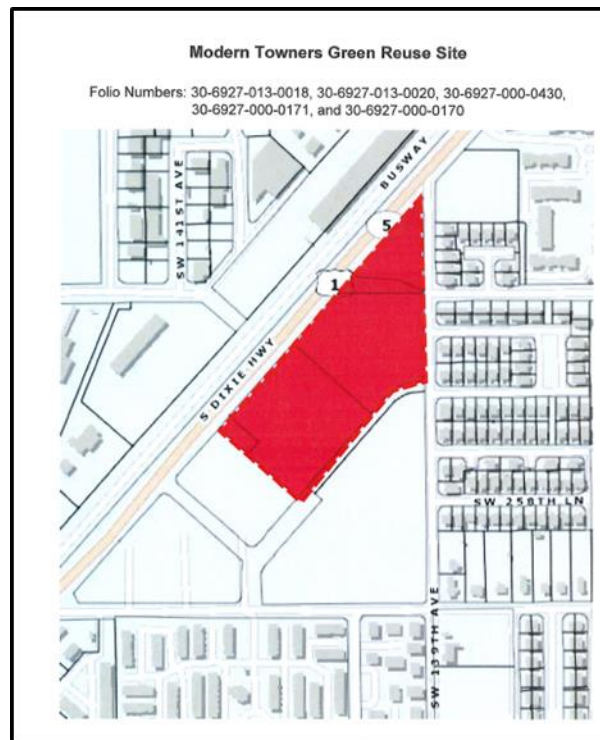

Executed December 24, 2019

Address: Vicinity of SW 139 Ave & SW 256 ST (Folios: 30-6927-013-0018, 30-6927-013-0020, 30-6927-000-0430, 30-6927-000-0171, 30-6927-000-0170), Unincorporated Miami-Dade County

DERM HWR-923

Acres: 11 acres

On December 24, 2019, a BSRA was executed with Paradise Gardens Green Reuse LLC. The site was formerly used for agriculture and has Arsenic and Chromium soil contamination and Nitrate contamination of the groundwater. The site is currently being re-developed as a portion of the Miami Urban Village, a mixed-use development consisting of 665-unit multifamily apartment and retail buildings. A Site Assessment Report Addendum and Soil Management Plan operating report is pending for the site.

Solimar Apartments Green Reuse Site

BSRA ID# 132001001

Executed July 2, 2020

Address: 419 NW 8th Street, 815 NW 5th Avenue, 925 NW 5th Avenue, and the Intersection of NW 12th Street and NW 4th Avenue, Florida City

Acres: 10.5

DERM HWR-1016

On July 2, 2020, a BSRA was executed between MDC and Solimar Associates, Ltd. for development of 10-acres (consisting of 5 parcels) in the vicinity of the intersection of NW 11th street and NW 5th Avenue, Miami, Florida, into Solimar Affordable Rental Apartments. The property was historically occupied by a trailer park in the southwest, a building in the west central portion, and agricultural land in various parts of the site. Site rehabilitation activities have been conducted since September 2019 and identified soil and groundwater contamination at the site. Soil contaminants consist of arsenic, lead, and chromium, and groundwater is impacted by nitrate. An Engineering Control Plan was proposed to address soil impact in support of No Further Action with Conditions. Further site assessment and site development construction are ongoing.

Cutler Bay Town Centre Brownfield Site

BSRA ID# 139911003

Executed December 2, 2020

Address: 10100 SW 186 ST, Cutler Bay

Acres: 1.26

DERM HWR-1068

Cutler Bay Town Centre, LLC, entered into a BSRA for the rehabilitation of two vacant parcels abutting a former Florida East Coast railway line to the east, and petroleum contaminated site to the west. The preliminary assessment conducted at the property documents arsenic and PAH contamination in soils, and arsenic contamination in the groundwater. A Site Assessment Report is not yet approved and the DERM has required additional soil assessment. The site will be developed as the Crossings at Quail Roost - a Senior Residential Community. This mixed-use development will consist of 93 residential units, 8,977 square feet of commercial space, and 9,754 square feet of offices. Based on the results of the preliminary assessment and the use of engineering controls, DERM approved construction plans for the proposed development in March 2021; however, construction has not been initiated. A groundwater monitoring plan will be implemented along the eastern perimeter of the property, with the baseline event conducted prior to the installation of the approved stormwater management system.

Subject site

Shoppes of Cutler Bay Green Reuse Site

BSRA ID# 132002001

Executed December 30, 2020

First Amendment December 21, 2021

Address: 20951 Old Cutler Road, Cutler Bay

Acres: 29

DERM UT-7288 and HWR-1158

A BSRA was executed with Publix Supermarkets, Inc., for the development of an 87,444-square-foot commercial mixed-use development, called Shoppes of Cutler Bay, on a portion of a former agricultural site. Site assessment documented both soil and groundwater contamination. All contaminated soils were removed and disposed of offsite during construction. The site is developed as a Publix Shopping Center. The site continues quarterly groundwater monitoring for Arsenic and Iron in pursuit of a No Further Action with Conditions closure for groundwater. Because the site is a portion of a larger contaminated site as that term is defined in §376.79(7), F.S., the BSRA specifies that the 25-percent VCTC bonus, pursuant to §376.30781 (3)(c), F.S., will not be available to the PRFBSR, until such time as the entire contaminated site is cleaned up in accordance with Chapter 62-780, F.A.C. In 2021, the BSRA was amended to add the Town of Cutler Bay, as a PRFBSR to the BSRA for the development of 16 acres of the larger contaminated site, as a government building center and recreational park. Site assessment on the Town of Cutler Bay parcels documented arsenic soil contamination and arsenic, iron, and manganese groundwater contamination. Additional assessment and delineation are pending. Additionally, A site-specific background study is also pending.

Northside Commons Brownfield Site

BSRA ID# 139904006

Executed December 30, 2020

Address: 8301 NW 27 Ave, Unincorporated Miami-Dade County

Acres: 0.94

DERM UT-4310/IW5-11740/File-9997/9501822

A BSRA was executed with Northside Commons Residential, LLC for the Northside Commons Property located on the east side of 27th Avenue (Folio No: 30-110-000-0210), bounded to south by NW 83rd Street. The site was developed into an affordable housing development serving residents with disabling conditions. A portion of the site was a service station from the 1956 up to the 1970s, and the site had a petroleum discharge dated May 9, 1995 which received a Site Rehabilitation Completion Order on December 11, 2017. Aluminum recycling activities also historically occurred on site. Analytical results indicate that groundwater is impacted with PAHs on the eastern portion of the property, which is suspected to be residual contamination from the historic petroleum discharge. A groundwater Monitoring Only Plan in pursuit of NFAC was implemented and completed. A declaration of restrictive covenant is pending execution.

Miami Parcel West Green Reuse Site

BSRA ID# 139801020

Executed December 30, 2020

Address: 60 NW 17th Street, Miami, Florida

Acres: 2.38

DERM UT-3223

On December 30, 2020, a BSRA was executed between Miami-Dade County and Peoples Gas System (Florida) for the Miami Parcel West Green Reuse Site. The site is a part of a former manufactured gas plant (MGP) facility which operated in two parcels between 1906 and 1958. The properties were connected with an underground tunnel, which was filled in the past with solid waste material of MGP operations. The tunnel was remediated and filled with concrete in 1999, resulting in the removal of approximately 2,250 tons of MGP related waste. Since the decommissioning of the plant, the property has been used as a storage yard and a natural gas distribution facility. Assessment and remedial activities have taken place since 1987. A pilot Test Plan including source removal and open air sparging with vapor extraction was implemented at the site in October 2019. However, in February 2021, a Source Removal Remedial Action Plan (RAP) (inclusive of supplemental assessment) was submitted to the DERM for review including a revised remedial approach. The RAP proposes to address contaminated soils, including soils affected with free product (non-aqueous phase liquid) via conventional excavation in combination with large diameter auger technology. The RAP also accounts for the construction of engineered caps following excavation and groundwater monitoring. While the overall approach has been deemed acceptable by DERM, additional information is pending submittal and evaluation prior to the approval of the RAP. People's Gas System intends to expand its operations at the subject property by installing additional infrastructure to allow for increased storage and operating capacity as well as by integrating new technologies to further increase operating capacity. The planned expansion will cost in excess of \$20 million and will create 15 to 20 new permanent jobs for consultants, engineers, and transportation workers who will be involved in operating, maintaining, and transporting materials to the site.

Miami Parcel East Green Reuse Site

BSRA ID# 139801021

Executed December 30, 2020

Address: 1600 N. Miami Ave, Miami, Florida

Acres: 1.85

DERM IW5-3225

On December 30, 2020, a BSRA was executed between Miami-Dade County and Peoples Gas System (Florida) for the Miami Parcel East Green Reuse Site. The approximately 4.7-acre site is a part of a former manufactured gas plant (MGP) facility which operated in two parcels between 1906 and 1958. Both parcels were connected with an underground tunnel, which was filled in the past with solid waste material of MGP operations. The tunnel was remediated and filled with concrete in 1999, resulting in the removal of approximately 2,250 tons of MGP related waste. The subject site is currently leased to CEMEX USA and a cement batching operation has been in place since 1968. Assessment and remedial activities have taken place since 1987, including but not limited to, the removal of underground storage tanks, removal of free product (approximately 1,300 gallons between 1993 and 2012), excavation of approximately 863 tons of coal tar, soil and debris in 1994 and excavation of approximately 47 tons of soil in 2014 from the city-owned ROW. However, soil and groundwater contamination remains at the property and extends off-site. Dissolved groundwater contamination vertically extends to 60 feet below land surface (bls) and the presence of non-aqueous phase liquids (NAPL) is verified to below 15 feet bls. A remedial Action Plan is currently pending for the site. Peoples Gas System's tenant, Cemex, Inc., intends to expand its current infrastructure at the site, install new equipment, and employ additional full-time staff – a project that will require a capital investment of no less than \$10 million, involve up to 100 temporary construction jobs, and support the creation of 50 to 100 permanent jobs.

Miline at Ludlam Trail Green Reuse Site

BSRA ID# 132003001

Executed December 30, 2020

Address: 6970 Bird Rd, Unincorporated Miami-Dade County

Acres: 4.05

DERM HWR-1115

Ludlam Trail Phase I, LLC entered into a BSRA for the Miline at Ludlam Trail Green Reuse Site encompassing two parcels (Folios 30-4023-000-0503 and 30-4023-101-0020) which are part of a proposed six-mile long pedestrian and biking trail being developed for the Miami-Dade County Department of Parks and Open Spaces (PROS) along the abandoned former Florida East Coast (FEC) railroad. Site assessment documented arsenic and Total Benzo(a)pyrene Equivalents soil contamination. A Soil Management Plan was approved by DERM on April 14, 2020 and earthwork and construction activities started on August 18, 2020. The development includes 338 multifamily units in a 6-story residential building with residential amenities including an entertainment lounge, fitness center, workroom, clubroom, swimming pool deck, private courtyard, and a common plaza area. The completed development will also provide approximately 4,200 square feet of retail space, lush landscaping in a common plaza, and will serve as a centralized social hub for apartment residents as well as users of the recreational trail component of the former rail corridor. The Site is pursuing a No Further Action with Conditions closure with engineering controls and groundwater restrictions. The engineering controls will consist of 2 feet of clean fill, concert, and/or asphalt building pads and pavement. Additionally, a groundwater monitoring plan in support of a No Further Action with Conditions site closure is being conducted.

BRICKELL FIRE STATION GREEN REUSE SITE

BSRA ID# 132102001

Executed September 8, 2021

Address: 145, 155, 165 and 191 SW 12th Street and 1133, 1131, 1115 and 1105 SW 2nd Avenue, Miami,
FL 33130

Acres: 1.5

DERM HWR-1134

191 SW 12 Owner, LLC entered the BSRA with Miami-Dade County for the proposed development of two residential towers at the site. The site was historically occupied by residential homes, followed by residential apartment complex in the southern part constructed in 1960s and a fire station constructed in 1980s (owned by City of Miami) in the northern part. The apartments were demolished circa 2015 and the southern part remained vacant since then. The fire station remains active. Site rehabilitation activities have been conducted since 2019 and identified soil and groundwater contamination at the site. The assessment results identified soil contamination by arsenic, dieldrin, and PAHs, and groundwater contamination by arsenic and perfluoroalkyl substances (PFAS). A conditional closure via No Further Action with Conditions was selected. Further assessment is ongoing to support the site closure and facilitate the development construction (i.e., soil reuse request approval, drainage system design, construction dewatering, soil management plan).

CBTS GREEN REUSE SITE

BSRA ID# 132101001

Executed October 21, 2021

Address: 1000 Kane Concourse, Bay Harbor Island

Acres: 1.19

DERM UT-2037/F-391

CBS Realty Holding, LLC entered into a BSRA with Miami-Dade County for the development of a church on the CBTS Green Reuse Site. The site historically operated as a vehicle repair shop and as an automotive dealer with a service center from the 1950s until demolition around February 2020. Contamination associated with improperly abandoned underground storage tanks (USTs) was discovered on August 27, 1986. Site rehabilitation activities (source removal of contaminated groundwater and soils) have been ongoing intermittently since that time. The contaminants of concern (COCs) remaining onsite are soil (Arsenic) and groundwater (Benzene, Isopropylbenzene, and Total Dissolved Solids). The site has elected conditional closure with institutional and engineering controls. The construction of the church is currently in progress. The site is currently pending the submittal of a no further action with conditions closure proposal.

South Riviera Brownfield Site

BSRA ID# 132103001

Executed December 21, 2021

Address: SW 120th Avenue & SW 248th Street, Princeton

Acres: 4.8

DERM HWR-970

South Riviera Investments #2, Inc. entered into a BSRA with Miami-Dade County for the proposed development of a two-story, 63,120 sq. ft. charter school for students in kindergarten through the eighth grade. The developer is projecting a total investment of \$11,000,000.00. The site historically operated as a nursery. Contaminants of concern on site in soils are Arsenic and Chromium. Further site assessment is pending for the site. The site has elected for a No Further Actions with Conditions closure.

Windmill Farms Green Reuse Site

BSRA ID# 139912008

Executed December 21, 2021

Address: NE Corner of the Intersection of SW 242nd Street and SW 129th Avenue, Miami

Acres: 9.48

DERM HWR-1186

Windmill Farms Associates, LLC entered into a BSRA with Miami-Dade County for the proposed development of a 274-unit affordable housing project. The site was formerly used for agricultural purposes and site assessment activities documented copper and arsenic soil contamination and nitrate groundwater contamination. Source removal for arsenic and copper contamination in soil was conducted in 2022. Remaining arsenic concentrations were determined to be consistent with background. A Groundwater Monitoring Plan is currently being implemented.

Cordial Holdings Green Reuse Site

BSRA ID# BF132001002
Executed December 20, 2021
Address: 75 W Palm Drive, Florida City
Acres: 25
DERM AW-72

Cordial Holdings, LLC entered into a BSRA with Miami-Dade County for proposed commercial development of the Cordial Holdings Green Reuse Site. The subject site was a former agricultural packaging facility. A Phase 1 and Phase 2 Environmental Site Assessment were submitted on July 26, 2019. Contamination associated with the former use was identified. Site assessment activities are on-going.

TV ML Industrial Project

BSRA ID# 132104001

Executed December 20, 2021

Address: 6601 NW 167th Street, Miami Lakes

Acres: 16

DERM UT-1090/File-7637

TV ML Investments, LLC entered into a BSRA on December 20, 2021 for the rehabilitation and redevelopment of an approximately 16-acre property. The site was used as a football and baseball field since the 1970s and has documented arsenic soil and groundwater contamination. The site is planned for redevelopment for commercial use as warehouses and is proposing a No Further Action with Conditions (NFAC) closure with engineering controls. Further site assessment is pending.

Sawyer's Landing Mixed Use Project

BSRA ID# 139801023
Executed December 28, 2021
Address: 249 NW 6th Street, Miami
Acres: 3
DERM HWR-1108/File-NA

Block 55 Residential, LP entered into a BSRA on December 28, 2021 for the rehabilitation and redevelopment of Folio 01-0105-050-1120. The site historically included a dry cleaners, funeral home, pressing and dyeing shop, printing and photography shop, and hat shop. A source removal was completed in 2020 to remove methylene chloride soil contamination. The site will be redeveloped for retail and residential use, including 578 affordable housing units. A Site Assessment Report is pending submittal.

BSRAS EXECUTED WITH FDEP*:

Taylor Park Green Reuse Site

BSRA ID# 131501001

FREQUENTLY ASKED QUESTIONS FOR BROWNFIELDS IN MIAMI-DADE COUNTY:

1. My property is located within a designated brownfield area within Miami-Dade County, what does that mean?

Brownfield sites are generally abandoned, idled, or under-used industrial and commercial properties where expansion or redevelopment is complicated by actual or perceived environmental contamination. A brownfield area is defined as a contiguous area of one or more brownfield sites, some of which may not be contaminated, and which has been designated by a local government by resolution. Brownfield areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency-designated brownfield pilot projects. In Miami-Dade County there are over 53,000 acres designated as brownfield areas. The majority of the brownfield areas were created in 1999 when Miami-Dade County designated all unincorporated areas within certain economic incentive areas as brownfield areas. Copies of the resolutions designating Miami-Dade County brownfield areas can be found on the Florida Department of Environmental Protection's (FDEP's) Brownfields website. Given the aforementioned basis for historic designation of many of Miami-Dade County's brownfield areas, not all properties located within Miami-Dade County's designated brownfield areas are contaminated or have the perception of contamination. Further, the inclusion of a property within a designated brownfield area does not impose any additional restrictions or requirements on that property. Rather, being located within an existing designated brownfield area facilitates entry into the Florida Brownfields Program by interested eligible parties upon execution of a Brownfield Site Rehabilitation Agreement with Miami-Dade County.

2. What is a Brownfield Site Rehabilitation Agreement (BSRA)?

A BSRA is a voluntary cleanup agreement entered into by a Person Responsible for Site Rehabilitation (PRFBSR) and FDEP, or Miami-Dade County as delegated by FDEP. The BSRA establishes the time frames, schedules and milestones for completion of site rehabilitation tasks and submission of technical documents, and other commitments or provisions pursuant to Chapter 62-780, Florida Administrative Code.

3. What are the benefits of entering into a BSRA?

Benefits and incentives that may be available upon execution of a BSRA include, but are not limited to, a \$2,500 Job Bonus Tax Refund, refunds on sales tax paid on the purchase of building materials used for affordable or mixed-use housing projects, state tax credits on eligible site rehabilitation costs and solid waste removal, along with a bonus refund when cleanup is complete and for development of affordable housing or healthcare facilities, and certain cleanup liability and lender liability protections.

4. I want to participate in the brownfield program, what are the eligibility requirements?

The eligibility requirements to enter into a BSRA are found in Section 376.82, Florida Statutes.

5. How can I find out if my property is located within a designated brownfield area?

The following online applications can be utilized to determine if your property is located within a designated brownfield area:

- [Miami-Dade County's Environmental Considerations Application](#)
- [FDEP Brownfields GeoViewer](#)

6. How can I access Miami-Dade County RER/Division of Environmental Resources Management's (DERM's) records of contamination?

Search [RER/DERM's online environmental records](#) for contamination records.

7. Who do I contact if I have questions regarding the Brownfield Program in Miami-Dade County?

Contact the RER/DERM Brownfield Coordinator at 305-372-6700 or rezols@miamidade.gov.
