Appendix A: Project Proposal Application Form	13

Introduction

In 2021, the Resilient Florida Program was created by the Florida Legislature. To address numerous challenges, Florida must assist communities in adapting critical and regionally significant assets, maintain a statewide vision for both coastal and inland communities, and prioritize state resources with a statewide data set and vulnerability assessment (“VA”). One way Florida will achieve those goals is through the Statewide Resilience Plan (“Statewide Plan”) contained within this report. Section 380.093(5)(a), Florida Statutes (F.S.), establishes the requirement for a Statewide Plan.

By December 1, 2021, and each December 1 thereafter, the department shall develop a Statewide Flooding and Sea Level Rise Resilience Plan on a 3-year planning horizon and submit it to the Governor, the President of the Senate, and the Speaker of the House of Representatives. The plan must consist of ranked projects that address risks of flooding and sea level rise to coastal and inland communities in the state. All eligible projects submitted to the department pursuant to this section must be ranked and included in the plan.

In addition, the statute lists the required elements of the plan, including the eight listed items below:

- Overall summary of proposals including:
 - The total number of project proposals received and deemed eligible;
 - The total funding requested;
 - The total funding requested for eligible projects; and
 - A link to access a copy of each submitted project proposal application form separated by eligible and ineligible projects.

- Statewide Plan development process, including:
 - A description of eligibility requirements; and
 - A detailed summary of the scoring criteria.

- Project proposal application form.

Summary of Proposals

On July 1, 2023, Florida Department of Environmental Protection (DEP) opened an application portal designed to collect information from eligible project sponsors about implementation projects consistent with section 380.093, F.S., and Chapter 62S-8, Florida Administrative Code (F.A.C.). An outline of the online form is provided in Appendix A.

How the Statewide Plan was Developed

The Statewide Plan was created based on the eligibility requirements in section 380.093, F.S., and the project score in accordance with Chapter 62S-8, F.A.C., both outlined below.

Methodology (eligibility):

To be eligible for the Statewide Plan, a project must address threats in current or future conditions and the local sponsor must be an eligible entity.

To be an eligible entity, the entity must be identified in section 380.093(5), F.S. Eligible entities that can submit proposals to address risks identified in vulnerability assessments include counties, municipalities and special districts with certain responsibilities. In some cases, other established districts can submit proposals that mitigate risks on water supplies or water resources of the state. Consistent with the program's governing statute, special districts are those that are responsible for the management and maintenance of:

- Inlets and intracoastal waterways;
- Potable water facilities;
- Wastewater facilities;
- Airports; or
- Seaports

Other established districts include:

- Water management districts;
- Drainage districts;
- Erosion control districts;
- Flood control districts; or
- Regional water supply authorities.

Eligible projects submitted by eligible entities with a minimum 50 percent cost share were included and ranked in the Statewide Plan. Section 380.093(5)(e), F.S., provides a match waiver for financially disadvantaged small communities as defined in the excerpt below:

- 1. A municipality that has a population of 10,000 or fewer, according to the most recent April 1 population estimates posted on the Office of Economic and Demographic Research's website, and a per capita annual income that is less than the state's per capita annual income as shown in the most recent release from the Bureau of the Census of the United States Department of Commerce that includes both measurements; or*
- 2. A county that has a population of 50,000 or fewer, according to the most recent April 1 population estimates posted on the Office of Economic and Demographic Research's website, and a per capita annual income that is less than the state's per capita annual income as shown in the most recent release from the Bureau of the Census of the United States Department of Commerce that includes both measurements.*

In total, 238 eligible and ineligible proposals were received for a combined cost of \$2,531,112,045. The total state funding request amount for all proposals was \$1,128,021,450. After reviewing the proposals, 196 implementation projects were deemed eligible for the Fiscal Year (FY) 2024-25 Statewide Plan and received a priority ranking, with total project costs of \$1,788,818,133. After considering available local matches, the total funding request amount for all eligible projects was \$867,093,430. A distribution of all the eligible applications received during this cycle is shown in Figure 1.

Proposals, separated by eligible and ineligible proposals, can be found at the following [FTP site](https://floridadep.gov/2023StatePlanApplications) using the case-sensitive password: **2023Apps**.
<https://floridadep.gov/2023StatePlanApplications>

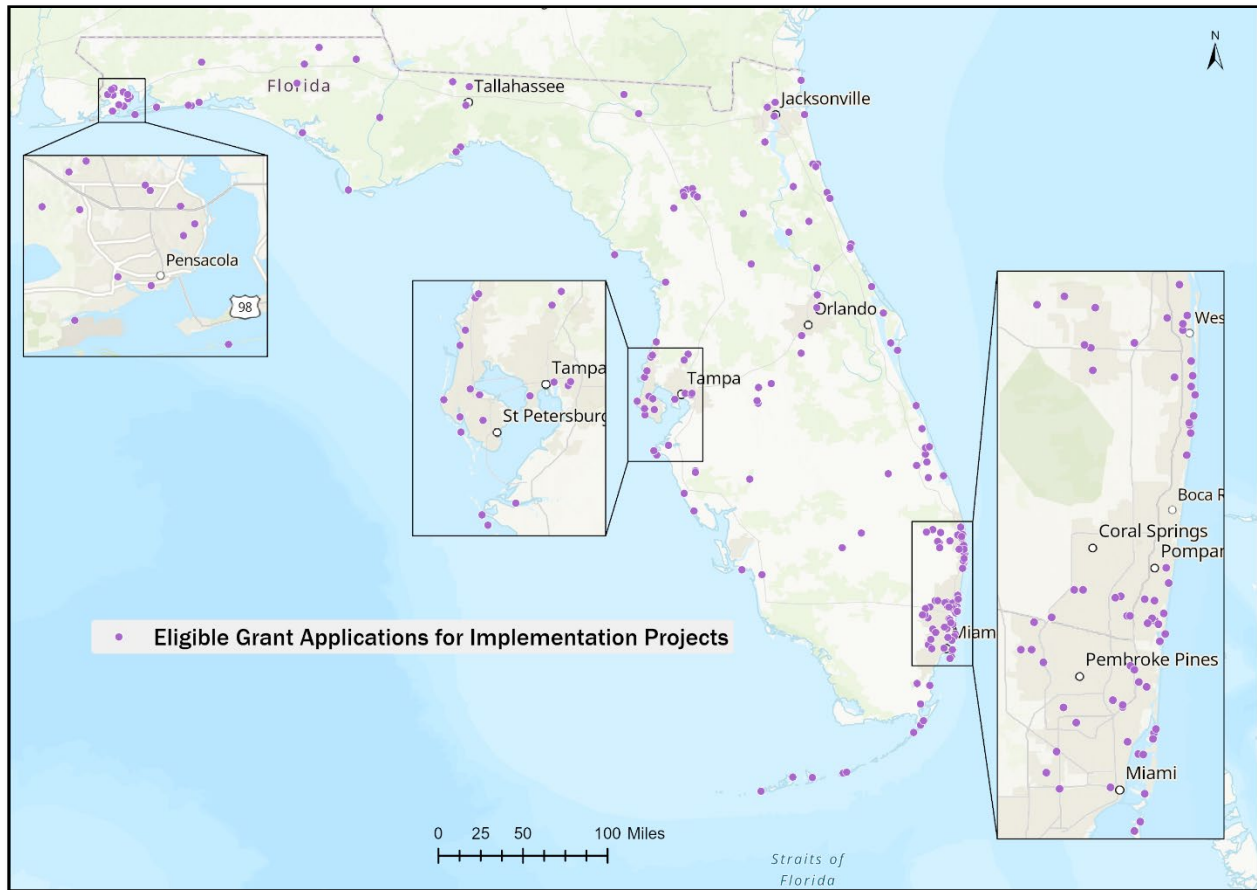

Figure 1. A distribution of eligible proposals submitted during the 2023 application cycle.

Methodology (ranking):

In 2022, following substantial public input, the program adopted [Chapter 62S-8, F.A.C.](#), [“Statewide Flooding and Sea Level Rise Resilience Plan,”](#) to implement scoring criteria outlined in Section 380.093(5)(h), F.S. To satisfy rule requirements and earn the corresponding points, project applicants were required to provide all supporting information and/or documentation needed to evaluate each application criteria to the department. A scoring rubric summarizing the rule is provided in [62S-8 Resilient Florida Program Guidance for Applicants](#).

After all project evaluations were complete, DEP then assigned a priority ranking for each project based on total score. Projects that received the same score received equal rank. The full list of ranked projects can be found in the Statewide Plan Section: All Projects Receiving Score and Rank.

Proposed Projects

The prioritized applications received via the 2023 Resilient Florida grant portal were used to create the list of proposed projects for the Statewide Plan. DEP developed the Statewide Plan based on Section 380.093(5)(i), F.S., which requires proposed funding for the Statewide Plan (state funds) be no less than \$100 million per year for three years, and on the projected balance for the Resilient Florida Trust Fund of \$100 million for Year 1 (FY 2024-25). Should excess funding be available due to projects being unable to proceed or projects being completed for less than the original request, DEP will reallocate excess funds in the following priority: 1) additional funds for multiyear projects, 2) subsequent years of funding for projects funded in Year 1, and 3) to the next prioritized project in the Statewide Plan.

Of the 197 eligible projects, the top 16 prioritized projects are proposed for FY 2024-25 state funding. Pursuant to Section 380.093(5)(i), F.S., multiyear projects that receive funding in the first year of the project must also be included in subsequent plans and funded until the project is completed (“multiyear projects”), provided the project sponsor has complied with all contractual obligations and funds are available. Multiyear projects in subsequent years are not scored or ranked with other submittals. In addition to the 16 projects referenced above, the FY 2024-25 Statewide Plan proposes continued funding for four multiyear projects totaling \$15,675,000.

Consistent with Section 380.093(5)(a), F.S., the Statewide Plan is designed with a three-year planning horizon; therefore, the projects proposed for FY 2024-25 state funding also commit \$25,783,195 and \$24,619,605 to the plans in FY 2025-26 and FY 2026-27, respectively. High-ranking projects not identified for Year 1 funding are listed in Years 2 and 3 in priority order and total \$100,000,000 in Year 2 and \$105,637,208 in Year 3. Projects that do not receive funding in FY 2024-25 must resubmit applications to be considered for funding in subsequent years. Figure 2 identifies high-ranking projects in the FY 2024-25 Statewide Plan. The figure is followed by a list of all projects receiving a score in ranked order. Notations within the table of all projects include the following:

- * Denotes a proposed project without 50% match as a financially disadvantaged small community
- ± Denotes a proposed project that may require scope of work adjustments to ensure no expenditures are ineligible pursuant to s. 380.093(5)(g), F.S.
- ˆ Denotes a current project that will also receive additional funds from available American Rescue Plan Act funds

Figure 2. A map of proposed awards in the FY24-25 Statewide Plan.

**Projects listed in years two and three must resubmit applications to be considered for funding in subsequent Statewide Plans*

Rank	Project Sponsor	County	Project Title	Total Project Cost	Cost Share Percentage	FY24-25 Statewide Plan, Year 1	FY24-25 Statewide Plan, Year 2	FY24-25 Statewide Plan, Year 3
--	City of Sunny Isles Beach	Miami-Dade	Request for additional funding for previous award - 22FRP50 Central Island Area Pump Stations and Drainage Improvements: 174th Street to 183rd Street and Atlantic Avenue to North Bay Road	\$19,000,000	50.0%	\$9,500,000		
--	Town of Sewall's Point	Martin	Request for additional funding for previous award - 22FRP103 South Sewall's Point Road Phase 3 – North & South Areas	\$5,500,000	50.0%	\$2,750,000		
--	Escambia County Board of County Commissioners	Escambia	Request for additional funding for previous award - 22SRP16 Chandler Street Drainage Improvements	\$850,000	50.0%	\$425,000

Appendix A: Project Proposal Application Form

DEP’s Resilient Florida Program launched an application portal on July 1, 2023. To apply, applicants established an account and were able to begin the application, save it in draft form and return later, and complete their application with any necessary uploads all through the online portal. DEP looks forward to improving users’ experiences in the future.

The proposals were submitted via online form, recreated below. Items with a red asterisk are required and italicized text denotes informational text seen by scrolling over an “i” icon in the application portal.

Applicant Information

Applicant Account: [search box for registered accounts]

Applicant Grant Manager: [search box for contacts]

Applicant Authorized Signee: [search box for contacts]

Applicant Fiscal Agent: [search box for contacts]

Project Information

Choose the Entity Category (*Refer to 380.093(5), F.S., for more information*): [drop down menu]

- County, municipality, or authorized special district addressing risks of flooding or sea level rise identified in a vulnerability assessment
- Eligible entity mitigating risks of flooding or sea level rise on water supply or water resources of the State

Choose the project type you are submitting (*Resilient Florida Program Project Type*): [pick list and can select more than one]

- Coastal flood control
- Cultural or community resource
- Domestic wastewater infrastructure
 - Drinking water supply
 - Emergency facilities
 - Land acquisition and conservation
 - Living shoreline
 - Natural system restoration
 - Stormwater infrastructure

- Transportation and evacuation
- Utilities infrastructure
- Preconstruction activities

*Project Title (*This should be a brief synopsis of the project plan. Limited to 20 words.*): [text box]

List the City(ies)/Town(s)/Village(s) (*List all city(ies)/town(s)/village(s) where work is to be performed*): [text box]

Project Geo Location:

- Latitude: [text box]
- Longitude: [text box]

Project Location (narrative; *Neighborhood, part of town, intersection, etc*): [text box]

State Lands or State Parks Utilized (*Will any of the work to be performed or fall on state lands?*): [drop down menu]

Area Served (*If applicable, area served only required for projects that mitigate risks on a regional scale*): [pick list of Florida counties, can select more than one]

Sponsor City/County (*If applicable. If the applicant is the sponsor, leave blank.*): [pick list of Florida counties]

Background

Explain the demonstrated need(s) and how the project will address those needs. (*Explain the demonstrated need which the project addresses.*) [text box]

Explain how the proposed project fits into the Project Types chosen. [text box]

Project Scoring Criteria

Tier 1 Criteria Information

*Does the project reduce risk of flooding or sea level rise identified in a comprehensive vulnerability assessment or the comprehensive statewide flood vulnerability and sea level rise assessment? If yes, please explain. (*Until September 1, 2024, applicants without a comprehensive vulnerability assessment shall receive points based on risks posed by flooding or sea level rise identified an assessment, report, evaluation, or other documentation of risk that addresses flooding or sea level rise.*) [drop down menu and text box]

- Yes
- No

*Does the project reduce risk of compound flooding identified in a vulnerability assessment or the comprehensive statewide flood vulnerability and sea level rise assessment? If yes, please explain. (*Until September 1, 2024, applicants without a comprehensive vulnerability assessment shall receive points based on risks posed by flooding or sea level rise identified an assessment,*

report, evaluation, or other documentation of risk that addresses flooding or sea level rise.) [drop down menu and text box]

- Yes
- No

*Does the project reduce risk to or adapt a regionally significant asset? This can include relocation. If yes, please explain. [drop down menu and text box]

- Yes
- No

*What percent of critical assets in the project impact area considered to be vulnerable? Please describe the method used to determine the percent selected as well as provide a list of critical assets in the project impact area. (*Vulnerable critical assets are those at risk of flooding based on applicable scenarios and standards outlined in paragraph 380.093(3)(d), F.S. Until September 1, 2024, if evaluation of those scenarios and standards is unavailable for the project impact area, best available data can be used to determine the percent.*) [drop down menu and text box]

- None
- At least one critical asset but less than 20%
- 20% or more but less than 40%
- 40% or more but less than 60%
- 60% or more but less than 80%
- 80% or more

*Does the project contribute to existing flood mitigation projects that reduce upland flood damage cost by incorporating new or enhanced structure or natural system restoration and revegetation? If yes, please explain. [drop down menu and text box]

- No
- Yes, by incorporating new or enhanced structure
- Yes, by incorporating natural system restoration and revegetation
- Yes, by incorporating BOTH new or enhanced structure AND natural system restoration and revegetation

Tier 2 Criteria Information

*What is the current frequency of flooding or erosion in the project impact area? (*If area has been flooded 3 times in 5 years or is experiencing ongoing erosion, supporting documentation must be submitted with the application*) [drop down menu and text box]

- No current flooding or erosion

- Has experienced flooding or erosion in the last 3 years
- Has been flooded at least 3 times in the last 5 years or is experiencing ongoing erosion. If area has been flooded 3 times in 5 years or is experiencing ongoing erosion, please explain and provide documentation.

**What is the current severity of flooding or erosion in the project impact area? (If area has been flooded greater than 1 foot in the current and each of the previous three calendar years, been flooded for 7 consecutive days, or erosion is critical for the critical asset class, supporting documentation must be submitted with the application) [drop down menu]*

- None
- No current flooding or erosion
- Flooding greater than 3 inches in last 3 years or has ever experienced unmitigated erosion
- Flooded greater than 1 foot in the current and each of the previous three calendar years, has been flooded for 7 consecutive days, or erosion is critical for the critical asset class. If area has been flooded greater than 1 foot in the current and each of the previous three calendar years, been flooded for 7 consecutive days, or erosion is critical for the critical asset class, supporting documentation must be submitted with the application.

**If the project impact area has been flooded greater than 1 foot in the current and each of the previous three calendar years, has been flooded for 7 consecutive days, or erosion is critical for the critical asset class, please explain and provide documentation.[text box]*

**What is the status of project design? (To receive points for a completed design, plans properly certified by a professional in the relevant field must be submitted with the application.) [drop down menu and text box]*

- Not designed
- Partially designed or site-specific environmental or geotechnical reports have been completed
- Design is complete. To receive points for a completed design, plans properly certified by a professional in the relevant field must be submitted with the application.

**Permitting and easement acquisition status. If applicable, please provide a list of necessary permits/easements and application statuses. [drop down menu and text box]*

- Necessary permits and easements have been identified
- All permits have been applied for or at least one permit has been approved
- All necessary permit(s) and easement(s) have been authorized/obtained

- No permits or easements are required for the project

*Are local funding sources committed as cost share or is the project in a financially disadvantaged small community as defined in 380.093(5)(e), F.S.? If yes, please explain and provide documentation. [drop down menu and text box]

- Yes
- No

*Does the project include environmental habitat enhancement or nature-based solutions? If yes, please explain. [drop down menu and text box]

- Yes
- No

*Does the project impact area include area that is identified as state or federal critical habitat for threatened and endangered species? If yes, please explain. [drop down menu and text box]

- Yes
- No

*Is the project cost-effective? If yes, please explain. [drop down menu and text box]

- Yes
- No

Tier 3 Criteria Information

*Is 50% local, state, or federal cost share secured for the project? If 50% cost share has been secured, please provide documentation with the application. [drop down menu and text box]

- No (unless the project is in a financially disadvantaged small community)
- Cost share has been identified but not appropriated or released
- Cost share has been secured
- The project is in a financially disadvantaged small community and cost share is not required

*Has state funding previously been awarded for the project? If previous state funding was awarded, please explain and provide sufficient information for the Department to verify funds (*Pre-construction activities are defined in s. 380.093(2)(c), F.S.*) [pick list, can select more than one, and text box]

- None
- Preconstruction activities (defined in s. 380.093(2)(c), F.S.) other than design and permitting
- Design
- Permitting
- Construction (previous phases)

*Will this project exceed Florida Building Code flood-resistant requirements and local floodplain management regulations? If yes, please outline the specific requirements and details relating to how the design exceeds the criteria in order to receive full points. [drop down menu and text box]

- No
- Yes
- These regulations do not apply to the project

Tier 4 Criteria Information

*Does this project include innovative technologies designed to reduce project costs and provide regional collaboration? If yes, please specify which technologies will be used and explain why they are innovative as well as how they will reduce cost and provide regional collaboration. (*For this criterion, "innovative" means an emerging technology or a proven technology used in a unique way to adapt one or more critical assets to the effects of flooding or sea level rise.*) [drop down menu and text box]

- Yes
- No

*Does the critical asset being adapted or the project impact area contain a financially disadvantaged community? If yes, please explain the metric used to determine financial disadvantage (ex. Local income compared to state average). [drop down menu and text box]

- Yes
- No

Additional Information

Will this project benefit a spring? If yes, please explain. [drop down menu and text box]

- Yes
- No

Will this project protect water sources using alternative water supplies? If yes, please explain. [drop down menu and text box]

- Yes
- No

Will this project construct, upgrade or expand facilities to provide waste treatment? If yes, please explain. [drop down menu and text box]

- Yes
- No

Will this project convert septic to sewer? If yes, please explain. [drop down menu and text box]

- Yes
- No

Has this project been submitted to other programs for funding? If yes, please explain. [drop down menu and text box]

- Yes
- No

What is the population of your community? (*Enter integer values only.*) [text box]

Multiagency Information

The following information is for data collection purposes only and do not correlate with any of the project evaluation criteria.

Estimated Project Duration: [drop down menu]

- 6 months
- 12 months
- 18 months
- 24 months
- 30 months
- 36 months
- 42 months
- 48 months

Permitting (*Brief description of expected permit determinations necessary for project completion or relevant permit information once permitted.*): [text box]

Lands, Easements, Rights of Way (*Brief description of acquisitions or permissions necessary for project completion or relevant information once required.*): [text box]

Critical Infrastructure (*Select yes if this project includes critical infrastructure that is confidential or should be redacted from public records searches.*): [drop down menu]

- Yes
- No

Project located in a Coastal Zone? [drop down menu]

- Yes
- No

SLIP Study Required? [drop down menu]

- Yes (Upload SLIP Study output)
- No

Source of Match: [drop down menu]

- Local funds
- State funds
- Federal funds

Funding Mechanism (*Program utilized or local funding mechanism.*): [text box]

Local Project Phase: [drop down menu]

- Planning
- Pre-construction (design, permitting, etc)
- Construction
- Post-construction Monitoring
- Closed

Project Work Plan

Project Summary (*Provide a brief synopsis of the project. Limited to 75 words.*): [text box]

Project Description (*This should be a concise summary of the work being done. It may explain the broader issue that the project will address or what the end goal of the work is. It should NOT restate the tasks or deliverables and should not give specifications or similar detailed descriptions. Limited to 300 words.*): [text box]

Uploads

Please make sure uploaded documents are named appropriately, suggested types of categories are listed below. Avoid using scanner assigned file names. You may also add your community such as 'community_filename.'

Upload the following supporting documents:

- *Map of project area (map must have a minimum scale of 1" = 200' and include a compass rose and legend)
- Geographic extent of the project area in GIS format
- Draft or signed resolution or letter of support from local governing board
- Vulnerability Assessment Report or other local study or report
- Final design and permitting documents (if applicable)
- Match or additional cost-share documents (if applicable)
- Subcontractor or other local or regional partnership agreements (if applicable)

If you are attempting to upload an unsupported file type, please place the file in a ZIP compressed folder before uploading.

Task

Input task information below.

At least one task is required to submit application.

Please select "Create New Project Task" to save the record. Once a task is created, it will be added to the table above. To add additional tasks, update the details below and select "Create New Project Task."

To edit a task after creation, you must delete the entry and create a new task to replace it with the correct details. To delete, select the arrow on the table next to the associated task and select "delete." Then enter the correct task information below and select "Create New Task."

*Task Number: [text box]

Select task title from the drop-down field of task titles provided. If your proposed task title is not available, leave the drop-down field as -None-, and enter additional task title in the “Title Other” field.

Task Title: [drop down menu]

- Pre-design or feasibility study
- Data collection or study
- Stakeholder coordination and planning
- Design and permitting or pre-construction activities
- Project management
- Bidding and contractor selection (required to be included prior to construction of project includes construction)
- Construction
- Permit-required monitoring
- Public education
- Equipment purchase
- Land acquisition
- Site cleanup

Title Other: [text box]

*Work Performed by (*who will be performing the work, grantee and/or contractor.*): [drop down menu]

- Grantee only
- Contractor only
- None
- Grantee and Contractor

*Task Description: [text box]

*Goal: [text box]

Time to Completion: [drop down menu]

- 1-6 months
- 1 year
- 2 years
- 3 years
- Other

Select deliverables associated with each task. If your expected deliverable is not part of the field, enter into “Other deliverable” field. [pick list, can select more than one]

- Final pre-design documents, feasibility study, or comparable certificate of completion, signed by a Florida-registered Professional Engineer. If applicable, the Sea Level Impact Projection study report.
- Final report or study to include the process and methodology and any data gaps.
- A summary report from each workshop or meeting, including attendee feedback and outcomes, and a copy of all materials created at each workshop or meeting.
- Final design documents signed by a Florida-registered Professional Engineer. If applicable, final permit documents from all appropriate state and federal regulatory agencies.
- Project management reports signed by the Florida-registered Professional Engineer, to include a summary of project and site inspection(s), meeting minutes, and field notes, as applicable.
- Public notice of advertisement for the bid, complete bid package, and written notice of selected contractor(s).
- Final design and Certificate of Occupancy (if applicable) and Certificate of Completion signed by a Florida-registered Professional Engineer.
- Copy of completed monitoring data, surveys, and final reports for the permit-required work, and documentation of submittal to the appropriate state or federal regulatory agencies.
- Copy of printed material for distribution, including text and graphics, link to website material developed, and dated photograph(s) of installed materials at the project location, if applicable.
- Purchase order(s) and vendor invoice(s) for delivery, installation, and other necessary costs, as applicable.
- Copies of all appraisals, the closing statement or all closing documents, title exam/insurance, property survey, boundary map, and the deed, recorded easement, or property interest.
- Dated color photographs of on-going work and a signed acceptance of the completed work to date, as provided in the Grantee’s Certification of Payment Request.

Other Deliverable: [text box]

Task Budget Category

Select “Create New Application Task Budget” to save the entry. Repeat for each task until completed. If multiple budget categories are needed for a single task, submit multiple entries until the budget for that task is completed.

*Application Task Number (*Please select a task number that corresponds with the information input in the previous section, “Tasks.”*): [drop down of applicant selected tasks]

*Expense budget category: [drop down menu]Contractual services

- Salary/fringe
- Equipment
- Miscellaneous/other expenses
- Land acquisition

*Budget amount: [text box]

*Match amount (*Total match available for this task. If no match, put 0.*): [text box]

Task Personnel Grantee*

**All fields in this section are required if grantee is performing work*

Application Task Number: [drop down menu to choose the application task number]

Position Title: [text box]

Maximum Hours (*rounded to the quarter hour.*): [text box]

Maximum Hours Time Unit: [drop down menu]

Maximum Hourly Rate (*This value should be based on actual salary dollars, rounded down to the nearest penny.*): [text box]

Fringe Percent: [text box]

Select “Create New Task Personnel Grantee Entry” to save the entry. Repeat for each task until completed. If multiple personnel are needed for a single task, submit multiple entries until all personnel for that task have been entered.

Submittal – Grantee’s Certification Statement

By signing this Statement page, the undersigned certifies that:

1. This application is in all respects fair and submitted in good faith without collusion or fraud;

2. If selected through this application process, the recipient will work in good faith and in partnership with the Department of Environmental Protection to manage its subcontractors in a timely and accurate manner;
3. Any funds awarded as a result of this application process will not be used as match fund to apply for or receive other state funds without departmental review and approval;
4. The undersigned has full authority to bind the applicant.

The selection of the checkbox below acts as your signature.

*Authorized Signers Signature: [text box]

Checking this signifies my signature. Please see the certification statements above and ensure you have entered a value of reach indicated require field or section in your application. Once all fields are complete, click the check box to agree to the certification statements and select “Submit” below.

*Certification Agreement: [check box]
