Florida's State 404 Program: An Overview

On December 22, 2020, the U.S. Environmental Protection Agency (EPA) published approval of Florida's State 404 Program in the Federal Register, and the Florida Department of Environmental Protection (DEP) began administering the State 404 Program on that date. Since then, DEP has stood up a comprehensive regulatory program that complements other existing state environmental programs and has trained over 300 Certified Wetlands Evaluators and other staff.

State assumption of the 404 program provides a streamlined permitting procedure within which both federal and state requirements are addressed by state permits. This provides greater certainty to the regulated community, conserves resources of both the applicant and regulator, and affords the state greater control over its natural resources while complying with federal law. The State 404 Program is a separate program from Florida's existing Environmental Resource Permitting (ERP) program, and projects within state-assumed waters require both an ERP and a State 404 Program authorization.

The State 404 Program is responsible for overseeing permitting for any project proposing dredge or fill activities within state-assumed waters. Such projects include, but are not limited to: single family residences; commercial developments; utility projects; environmental restoration and enhancement; linear transportation projects; governmental development; certain agricultural and silvicultural activities; and in-water work within assumed freshwater bodies such as boat ramps, living shorelines and other shoreline stabilization.

Since program assumption, DEP has received over 8,100 State 404 permit applications and continues to make permit determinations as appropriate, subject to EPA oversight. DEP has issued 430 individual permits under the State 404 Program and denied 130 permit applications. While federal agencies retained responsibility for any pending enforcement actions undertaken prior to the date of assumption, DEP has primary responsibility for compliance monitoring and enforcement of Florida's 404 program and is committed to vigorous enforcement of the program. DEP has, since assumption, conducted approximately 400 compliance inspections for permits under the Florida State 404 Program. From those inspections and other information, DEP has identified violations in some situations and is taking enforcement actions as appropriate. In this timeframe, over 3,000 applications have been withdrawn by permit applicants (in many instances, due to concerns raised by DEP). EPA has objected to only a small number of individual permits proposed for issuance by DEP, and in virtually all instances, DEP and EPA have been able to work cooperatively to resolve those objections. As of June 30, 2023, three State 404 Program permits proposed for issuance by DEP have been federalized by EPA and transferred to the Army Corps of Engineers (ACOE) for processing. Florida remains committed to working with EPA to resolve any and all future objections that might arise.

Executive Summary

This is the third annual report for Florida's State 404 Program. This annual report covers a twelve-month period beginning July 1, 2022, and ending June 30, 2023. This report provides the information required in Title 40, Code of Federal Regulations (40 C.F.R.) Section 233.52 and the *Memorandum of Agreement Between the Florida Department of Environmental Protection and the United States Environmental Protection Agency* for Florida's State 404 Program. DEP has incorporated additional information requested in response to previous annual reports into this third annual report as well.

Reporting categories as identified in 40 C.F.R. § 233.52 are as follows:

- Problems the state has encountered in the administration of its program and recommendations for resolving these problems;
- An assessment of the cumulative impacts of the state's permit program on the integrity of the state regulated waters;
- Identification of areas of particular concern and/or interest within the state;
- The number and nature of individual and general permits issued, modified, and denied;
- An estimate of extent of activities regulated by general permits;
- The number of violations identified, and number and nature of enforcement actions taken;
- The number of suspected unauthorized activities reported, and nature of action taken; and
- The number of permit applications received but not yet processed.

Program Administration

The Department has received over 8,100 State 404 Program applications since assumption. In response to the larger-than-anticipated number of applications, the Department has hired and trained additional staff to assist with processing State 404 Program applications. Additional details regarding staffing and training are provided later in this report.

To help prioritize resources and facilitate timely processing of applications, DEP decided that it would not perform stand-alone Waters of the United States (WOTUS) determinations (i.e., Section 404 jurisdictional determinations provided for a property without a planned project and project drawings). For a WOTUS determination under the State 404 Program, applicants are currently required to do one of three things: (1) apply for a permit and request a WOTUS determination during review; (2) apply for a formal determination under Chapter 62-340, Florida Administrative Code (F.A.C.) and request a WOTUS determination in conjunction with the formal determination; or (3) request a "No Permit Required" letter for a project where the applicant plans to avoid impacts to WOTUS (project drawings required).

The State 404 Program is implemented in conjunction with the ERP program and uses the state delineation method in Chapter 62-340, F.A.C., to determine the boundary of jurisdictional waters. DEP is continuing to work with the water management districts (WMDs) to find efficiencies between the implementation of the State 404 Program and the ERP program. DEP will continue to assess its program and implement solutions as challenges arise.

DEP is continually assessing the implementation of the State 404 Program and putting in place practices to improve the program.

No State 404 Program permits were appealed during this reporting period.

Public Participation

The State 404 Program includes several avenues for public participation. Members of the public may sign up to receive notice of receipt of applications within their areas of interest (defined by the user/subscriber) via DEP's Permit Application Subscription Service (PASS) and/or may request to be copied on correspondence or provide comments or information on any application(s) of interest at any time. When an application for an individual permit is deemed administratively complete, it is put out on public notice as described in Rule 62-331.060, F.A.C. Any interested person may comment or request a hearing during the public notice period. Public comments are added to each file in Oculus and the Information Portal. Projects are evaluated on a case-by-case basis, including evaluation of public comments. DEP does not collect information about requests for extension of comment periods on individual projects and whether they are granted.

DEP uses standard notice templates, which were provided in section f of the program description within Florida's assumption package. The notice template was crafted to contain the notice information specified at 40 C.F.R. 233.32(d), and the format was modeled after the current Army Corps of Engineers' public notice template. The notices include all specified information within the public notice template, including species information received during the pre-public notice review period from Florida Fish and Wildlife Conservation Commission (FWC) or U.S. Fish and Wildlife Service (USFWS) and information regarding historical, tribal, or cultural resources received from the State Historic Preservation Office (SHPO) or tribes. The notices also identify whether the applicant accepted all wetlands and other surface waters delineated using Chapter 62-340, F.A.C., as WOTUS, which helps streamline the public notice reviews conducted by EPA. DEP is not aware of any instance where a member of the public stated that the information contained within the public notices is insufficient. The public notice provides a summary of information that may be useful to an interested party, with additional information available in the file. The website where public notices are published includes the following information at the top of the page, with links to Oculus (DEP's official public records repository) and the referenced guidance documents:

The table represents the projects currently on public notice, as required by Rule 62-331.060, F.A.C.

The files are available online at the **OCULUS website**. You can refer to the **Oculus Search Guide** for assistance. You may also access the files through the **Information Portal** or locate records for a specific property using our online GIS tool, **Map Direct**. Please refer to the **Information Portal Tutorial** or the **Map Direct Tutorial** for assistance.

DEP's user-friendly "Oculus" website also provides contact information for general inquiries related to any of its regulatory programs. It includes an information portal (<https://prodenv.dep.state.fl.us/DepNexus/public/searchPortal>), which provides extensive information about projects, including permit application materials, public comments, agency correspondence, and all other associated records. These databases provide more information on a real-time basis than is available from the Army Corps of Engineers.

Moreover, the DEP and EPA Memorandum of Agreement explains the process for additional coordination with other states and tribal groups; the DEP and Army Corps of Engineers Memorandum of Agreement explains the process for DEP and the Army Corps of Engineers coordination; the Memorandum of Understanding between DEP, the FWC and USFWS explains the process for DEP coordinating with federal and state agencies concerning endangered species; and the Operating Agreement between DEP and the Florida Division of Historical Resources explains the process for DEP coordinating with tribal groups and state agencies concerning historic resources. DEP follows the procedures described in these documents when coordinating with commenting agencies or outside entities.

Florida's Sunshine Laws, found in Chapter 119, Florida Statutes (F.S.), provide broader access to governmental records and information than the federal corollary statute, the Freedom of Information Act, 5 U.S.C. § 552. Unlike for Army Corps of Engineers issued permits, Florida provides real-time access to state permit records related to State 404 Program permit applications via publicly accessible DEP websites. Written communications to or from state officials (including permitting staff) and other records regarding state business are readily available at no cost via one of DEP's online resources, including Florida's Oculus document management system (<https://depdms.dep.state.fl.us/Oculus/servlet/login>) and the DEP Nexus Information Portal (<https://prodenv.dep.state.fl.us/DepNexus/public/searchPortal>). Everything in the Nexus Information Portal is also in Oculus as the two systems are different search engines for the same records. The Nexus Information Portal uploads overnight, resulting in a slight delay in content availability (less than 24 hours). Documents are uploaded by DEP staff upon receipt or finalization so that they are readily available to the public. If a document contains confidential information, it is placed in an Oculus "restricted file" but may still be provided to the public, when requested, after redaction of confidential or exempt information, as identified in Chapter 119, F.S. Confidential information is not viewable from the Information Portal or public-facing Oculus. Restricted files are not common; however, if a restricted folder

is used, it is typically for national security, historic resource protection, or financial information. If an applicant requests that the sensitive portions of the file be exempt from the public record, these requests are included in the publicly available Oculus file. DEP does not separately track which permit files may contain confidential information; if EPA would like to view any specific file in depth, however, DEP can provide access upon request. Each publicly available State 404 Program permitting decision (exemption and general permit verifications and individual permits) contains a Notice of Rights pursuant to Chapter 120, F.S., which includes instructions for persons whose substantial interests are affected by the agency action to petition permitting decisions.

In a letter dated April 6, 2023, EPA requested permit information with restricted files be included in the Annual Report. Only materials of a highly sensitive nature are placed in restricted locations that cannot be publicly accessed, however all other project information and issued permits are made available to the public in Oculus. Only one application received during this reporting period for a water utility facility included restricted information. Some documents are restricted from public access for security purposes, but the rest of the project file remains accessible.

An Assessment of the Cumulative Impacts of the State's Permit Program on the Integrity of the State Regulated Waters

The State 404 Program is implemented in addition to Florida's long-standing, robust, Environmental Resource Permitting (ERP) Program. Activities regulated under the State 404 Program also require an ERP permit unless they qualify for an ERP exemption. With a programmatic goal of "no net loss" of wetland and other surface water functions, the ERP program frequently protects more wetlands and other surface waters than the State 404 Program. For example, the ERP program regulates activities impacting isolated wetlands that are not subject to Section 404 jurisdiction. The addition of the State 404 Program to ERP review was intended to reduce duplication in review between the federal and state agencies while maintaining the high level of environmental protection provided by all agencies. The tables in Appendix 1 show the authorized impacts and mitigation for each State 404 Program general and individual permit issued during this reporting period. This table is inclusive with permittee responsible mitigation on pages 79 through 80 and In-Lieu and Regional Off-Site mitigation on page 81 of Appendix 1. Please note that this table does not include other projects that may have only required ERP coverage. A list of projects using compensatory mitigation outside the service area is provided in Appendix 3.

Florida does not use ratios to determine how much mitigation is needed for impacts. Instead, Florida utilizes rapid assessment methods to determine the loss and gain of wetland functions. Rapid assessment methods are more appropriate than ratio methods because they use ecological principles to calculate functional loss and gain units, rather than simple qualitative descriptions and acreage. Florida's rapid assessment method is called the Uniform Mitigation

Assessment Method (UMAM) and is found in Chapter 62-345, F.A.C. Each applicant must provide justification that their project will meet the mitigation rule criteria and provide documentation that the proposed project will not result in a functional loss of wetland or other surface water benefits. The DEP permit reviewer conducts a site-specific analysis, considering habitat and functions, to determine whether more than “minimal individual and cumulative adverse environmental effects” (i.e., insignificant impacts) will occur in accordance with rule criteria. A completed UMAM Part II assessment includes a narrative of the evaluation considerations for each category scored. Documentation of the functional gain/loss assessment for each project is located in the UMAM assessment as well as the Technical Staff Report for that file. While UMAM is the required assessment for current projects, older methods such as ratios, WRAP (wetland rapid assessment procedure) and WATER (wetland assessment technique for environmental review) are still used when mitigation is proposed at an older 404 mitigation bank site that was reviewed under one of those earlier rapid assessment methods.

DEP requires the use of Chapter 62-340, F.A.C., delineation method for ERP and State 404 Program permitting purposes. Department Certified Wetland Evaluators (CWEs) verify all assessment methodology scores submitted by applicants to ensure that the scores reflect a reasonably accurate accounting of loss and compensation and that the compensation provided for the permits is adequate to fully mitigate impacts. A CWE visits the site and completes a UMAM analysis. If the applicant has provided UMAM documentation, and the CWE agrees with the evaluation, the CWE verifies the scores onsite. If the CWE does not agree with the applicant’s UMAM score, the CWE will adjust that score to reflect actual site conditions observed in the field. DEP staff are directed to attach the completed assessment to the CWE work product cover sheet, and the CWE signs the document acknowledging that the documentation is completed in accordance with rule and that the information provided accurately reflects site conditions at the time of inspection. DEP Certified Wetland Evaluator approved delineation information should be included in each of the project files, available through Oculus. DEP is not aware of any instance where the DEP CWE did not review the delineation line for the State 404 Program permit. CWEs perform wetland verifications in the field and complete required 62-340 Data Forms, which are added to the file record. The required number of 62-340 Data Forms to be filled out for a site verification and number of points required for wetland determination are explained in Rule 62-330.201, F.A.C., and section 7.1.1 of the Environmental Resource Permit Applicant’s Handbook Volume I (ERP Applicant’s Handbook). DEP continues to emphasize the importance of including this documentation in the Oculus files and to instruct all new and existing CWE staff to include 62-340 Data Forms in the permit file as they are completed. DEP did not collect data on which Chapter 62-340, F.A.C., delineations were different from previous delineations done under the federal method. Pursuant to section 1.1 of the State 404 Program Applicant’s Handbook (404 Applicant’s Handbook), DEP considers all wetlands and other surface waters delineated using

Chapter 62-340, F.A.C., to be WOTUS unless the applicant provides documentation clearly demonstrating otherwise.

To assist the CWEs in their reviews, DEP drafted guidance for “Delineations for Projects that May Require a State 404 Program Permit” (404 Delineation Guidance). This guidance clarifies the requirement to always use the 62-340, F.A.C., delineation method (see the section titled “existing delineations and determinations”). DEP provided the 404 Delineation Guidance to EPA on January 6, 2023.

DEP uses the mitigation hierarchy in the 404 Applicant’s Handbook, section 8.5.1, to determine the most appropriate type of mitigation. Where the project is within a mitigation bank service area, and credits are available, the mitigation bank credits are prioritized over other types of mitigation unless the applicant proposes an alternative form of mitigation that is found to be environmentally preferable. Where a mitigation banking instrument (MBI) provides for use of the bank outside of the mapped service area, DEP considers use of that bank for projects outside of the mapped area on a case-by-case basis. Most MBIs that allow such use require the approval of the Interagency Review Team (IRT) or the MBI signatories. DEP works with the ACOE mitigation bank team and provides a memo on each such project for IRT review and ACOE concurrence, consistent with the MOA and respective mitigation banking or in-lieu fee instruments. DEP works with applicants to obtain approval where appropriate. After reviewing previous Annual Reports, EPA has requested additional information regarding use of compensatory mitigation outside the impact area. DEP updated the IRT memo format in October of 2022 and is committed to track and provide information regarding which projects used compensatory mitigation outside the service area, per Army Corps of Engineers concurrence, along with rationale for why it was determined to be the most environmentally preferable option. The updated IRT memo template is attached as Appendix 2. Appendix 3 includes a list of projects that used compensatory mitigation outside the service area during this reporting period. Credits are purchased from mitigation banks outside a project service area only because the amount or type of credits are unavailable within the project service area. Any additional information requested by EPA and not included in the Appendices is available where applicable in each Oculus file.

DEP, like the Army Corps of Engineers, uses the concept of “independent utility” to determine whether applications are unique or part of the same larger project. Rule 62-331.051, F.A.C., requires that all activities the applicant plans to undertake which are reasonably related to the same project shall be included in the same permit application, so that all impacts can be reviewed holistically and cumulatively. Cumulative effects/impacts are reviewed in accordance with the ERP Applicant’s Handbook, section 10.2.8, and the 404 Applicant’s Handbook, sections 8.3.5 and 8.2.6 for secondary effects.

The concepts of “single and complete linear project,” “single and complete non-linear project,” and “independent utility” are defined in section 3.2.1 of the 404 Applicant’s Handbook.

Generally, where a project appears to be interconnected for some identifiable reason or depends on other project phases to function, DEP considers the project as part of a larger project unless the applicant successfully demonstrates otherwise. DEP also looks at ownership. If a project is only proposed for a portion of contiguous lands owned by the applicant, DEP will ask the applicant to provide information about future development plans for the other properties and whether they will be part of the same larger project.

EPA approved Florida to issue permits in WOTUS, which at the time of program approval was defined in accordance with the Navigable Waters Protection Rule (NWPR). Since program approval, various court orders have been issued concerning the appropriate definition of WOTUS. During this reporting period, the U.S. Supreme Court adopted a WOTUS interpretation that is narrower than the NWPR definition. *See Sackett v. EPA*, 598 U.S., 143 S. Ct. 1322 (2023); *see also* 88 Fed. Reg. 61,963 (Sept. 8, 2023) (direct final rule implementing narrower “WOTUS” definition). The Department is working cooperatively with EPA to navigate the changing definitional regimes of WOTUS and is committed to administering its assumed CWA Section 404 program in accordance with the Supreme Court’s decision in *Sackett* and other applicable requirements of the Clean Water Act and regulations promulgated thereunder. DEP looks forward to continuing our productive dialogue concerning this matter.

Even as actions at the federal level have continued to create substantial confusion as to the WOTUS definition, DEP remains committed to administering Florida’s CWA programs consistent with applicable law and to maintaining its cooperative partnership with the federal agencies to ensure maximum protection of Florida’s water resources. In this regard, it is important to note that Florida’s Environmental Resource Permit Program extends protection to all “waters of the state,” which goes far beyond the extent of waters subject to the CWA. And DEP continues to work cooperatively with EPA on resolving concerns for specific 404 permits where there may be some potential difference of view as to whether a site is jurisdictional for 404 purposes. Where an unresolvable difference of views may arise, EPA is able to federalize the permitting action (as it has done on two occasions during this reporting period). As such, all waters in Florida continue to be protected. DEP is committed to working cooperatively with EPA to address WOTUS-related concerns as they arise.

Identification of Areas of Particular Concern and/or Interest within the State

Areas of particular concern include those referenced in recent correspondence between EPA and DEP, as discussed above and incorporated by reference herein. Two other areas of particular interest identified during this reporting period are noted below.

During the last reporting period, EPA agreed to reconsider its prior “no effects” determination for species and habitats under the jurisdiction of the National Marine Fisheries Service (NMFS) and to prepare a Biological Evaluation and effects determination for NMFS-listed species and critical habitats. Based on this review, EPA has stated that it “will initiate ESA consultation with

NMFS, as appropriate.” During this reporting period, the permit application for Miami-Dade Water and Sewer Dept. – North District WWTP, File Number: 13-0372409-005-SFI, which EPA previously provided comments on has been successfully coordinated with NMFS and was issued on December 13, 2022. DEP continues to support Section 7 consultation for purposes of State 404 Program assumption approval and requests to be kept closely informed as to progress on this issue.

A large development project (Collier Enterprises Management Inc., file number 396364-001) known as Bellmar Community, located in Collier County, remains a project of significant interest. The Department has made no final decisions regarding the project at this time. The Department is reviewing the final response from FWC and USFWS concerning species-related comments. Once the species-related comments are fully reviewed and the permit file is complete, the proposed project will be publicly noticed. There are other similar development projects for which DEP is awaiting final comments.

The Number and Nature of Individual and General Permits Issued, Modified, and Denied

The Department reviewed applications for – and issued, modified, or denied – a total of 341 individual permits and 687 general permits during this reporting period. The individual and general permits issued were able to successfully undergo complete review by the commenting agencies, the Department, and the public in that timeframe.

Application withdrawals

Approximately 1,017 State 404 Program applications were withdrawn during this third reporting period. An applicant for a State 404 Program permit is not required to provide a reason for withdrawal of permit applications, nor are specific reasons for withdrawal of applications recorded as a standard practice. Discussion with the district offices and programs revealed that applicants regularly requested withdrawals for activities that already have an existing, valid Army Corps of Engineers’ permit. Additionally, some applicants requested a withdrawal to reassess and redesign projects in lieu of denial. Some applications were logged in as the incorrect permit type, withdrawn, and then re-logged for the correct permit type. The reasons for withdrawal are reflected in each permit file, either by a change in the permit type or a withdrawal email from the applicant. Appendix 4 lists all withdrawn applications during this reporting period which can be viewed using one of the methods described on DEP’s Public Records webpage at <https://floridadep.gov/sec/sec/content/public-records>.

Permit modifications

During this reporting period, DEP received 48 applications for permit modifications. Six were withdrawn, and of the 42 permit modifications issued, only one was for a major modification. DEP uses reasonable scientific judgement (RSJ) for purposes of determining whether there

has been a “material permit modification” or “material changes in the scope of the project.” DEP did not define the term “significant” in our ERP or State 404 Programs, partly because there is so much variability in what could be considered “significant” for different projects.

Long-Term Projects

DEP reviews long-term projects pursuant to the process described in sections 5.3.2 – 3 of the 404 Applicant’s Handbook, and Rule 62-331.051, F.A.C., as detailed and accepted in Florida’s 404 assumption package. This analysis includes cumulative impacts for the total project, as well as for each permit phase. DEP complies with the public notice requirements outlined in the 404 Applicant’s Handbook, section 5.3.1, and Rule 62-331.060, F.A.C., and includes in the public notice a link to the Oculus file for the application.

DEP has received State 404 Program applications for projects that either already have or are applying for an ERP Conceptual Approval Permit. However, DEP did not collect data for identifying these projects. For those projects where the ERP Conceptual Approval and the State 404 Program application are reviewed simultaneously and require a long-term planning document, the phases should align in most respects. However, this is project and site specific and may not always be the case. To get a State 404 Program permit, the project needs to meet the requirements of the program, including section 5.3.2 of the 404 Applicant’s Handbook. If the State 404 Program application does not meet those specific requirements, the project permit application will be denied.

The Department issued one individual permit with a long-term plan during this reporting period [Cemex Construction Materials Florida – Alico Road Quarry, file number 166176-033-SFI]. Four other long-term planning projects remain under review during this reporting period and are included in Table 1, below. Prior to permit issuance, applicants must submit a long-term planning document with all of the elements required in section 5.3.2 of the 404 Applicant’s Handbook. DEP assists applicants throughout the process as needed, including through pre-application meetings and during the review process through meetings and RAIs. The public notice, once published, indicates that the project under review is a long-term planning project. The long-term planning document is available for public review through Oculus or the DEP Information Portal.

Two long-term planning project applications (Chemours – Trail Ridge West Levee, file number 137482-021-SFI and Wild Turkey Sand Mine, file number 399660-001-SFI) were withdrawn during this reporting period.

A subsequent phase application for a long-term planning project (Babcock Property Holdings for Babcock Ranch Community, file number 396574-002-SFI) was received on June 13, 2022, and reviewed under the expedited permit review process outlined in Rule 62-331.060(8), F.A.C., for long term projects during this reporting period. The subsequent phase of the State

404 Program permit was issued on January 5, 2023. The Department did not issue any No Permit Required letters (NPRs) associated with long-term planning projects.

Table 1 – Long-Term Planning Projects Under Review as of June 30, 2022.

File Number	Project Name	Application Received
173508-004-SFI	North Florida Rock – Marianna Mine	1/8/2021
400133-001-SFI	Greystone North, South, & West	3/10/2021
396966-001-SFI	Collier Enterprises, Rural Lands West	1/8/2021
396364-001-SFI	Collier Enterprises, Bellmar Community	12/28/2020

The tables below (Tables 2-5) contain the number and nature of State 404 Program individual and general permits issued, modified, or denied during this reporting period.

Table 2 – Number of Individual Permits Issued, Modified, or Denied.

Permit Status	Number of Individual Permits
Effective (Issued)	272
Denied	21
Modified	42
Withdrawn	358

Table 3 – Nature of Individual Permits Issued, Modified, or Denied.

Primary Category of Work	Effective Total	Denied Total	Modified Total
Agriculture	0	1	0
Commercial	51	6	0
Ditches/canals/flood control	3	1	1
Ecological restoration	1	0	0
Mining	3	0	0
Residential development (multi-family/subdivision)	41	7	0
Roadways	27	2	0
Single-family residence	134	6	1
Transmission/distribution lines (linear)	6	0	0
Utilities (nonlinear)	6	0	0
Total	272	21	42

Table 4 – Number of General Permits Issued or Denied.

Permit Status	Number of General Permits
Effective (Issued)	649
Denied	38
Withdrawn	305

Table 5 – Nature of General Permits Issued or Denied.

Grand Total	649	38

An Estimate of Extent of Activities Regulated by General Permits

Table 6 summarizes the total impact acres authorized under each general permit type that was issued within the reporting period. Details regarding the impacts and mitigation for each issued permit are included in Appendix 1. General permits issued for utility lines under Rule 62-331.215, F.A.C., can have multiple crossings of wetlands and waterbodies within a single permit application where each crossing is considered a single and complete project. Wetland impacts of each single and complete crossing authorized under Rule 62-331.215, F.A.C., were reviewed and determined to average less than 0.1 acres.

Table 6 – Estimate of Extent of Activities Regulated by General Permits.

General Permit Type	Number Issued	Total Fill Impacts (Acres)
62-331.210 General Permit for Maintenance or Removal	23	3.73
62-331.211 General Permit for Fish and Wildlife Harvesting, Enhancement, and Attraction Devices	1	0
62-331.212 General Permit for Scientific Measurement Devices	1	0
62-331.213 General Permit for Survey Activities	1	1.45
62-331.214 General Permit for Outfall and Intake Structures	15	0.97
62-331.215 General Permit for Utility Line Activities	68	46.28
62-331.216 General Permit for Bank Stabilization	140	3.83
62-331.217 General Permit for Linear Transportation Projects	100	22.70
62-331.220 General Permit for Minor Activities	24	8.20

General Permit Type	Number Issued	Total Fill Impacts (Acres)
62-331.223 General Permit for Approved Categorical Exclusion	2	1.86
62-331.224 General Permit for Structural Activities	5	0.87
62-331.225 General Permit for Aquatic Habitat Restoration, Enhancement, and Creation Activities	31	N/A Project results in habitat restoration, enhancement, or creation
62-331.227 General Permit for Residential Developments	158	73.62
62-331.231 General Permit for Temporary Construction, Access, and Dewatering	4	1.61
62-331.233 General Permit for Boat Ramps	4	0.09
62-331.236 General Permit for Commercial and Institutional Developments	44	18.89
62-331.237 General Permit for Agricultural Activities	1	0.27
62-331.239 General Permit for Recreational Facilities	5	0.30
62-331.240 General Permit for Stormwater Management	21	9.88
62-331.243 General Permit for Activities in Ditches	3	0.35
62-331.245 General Permit for Land-Based Renewable Energy Generation Facilities	14	1.68
62-331.248 General Permit for Florida Department of Transportation and Florida's Turnpike Enterprise	8	56.27
RGP SAJ-105 General Permit for Certain fill in Bay County (West Bay)	5	186
RGP SAJ-13 General Permit for Aerial Transmission Lines in Florida	1	1.45
RGP SAJ-86 General Permit for Certain fill in Bay and Walton Counties	14	68.37

General Permit Type	Number Issued	Total Fill Impacts (Acres)
(Choctawhatchee, Lake Powell, West Bay)		
RGP SAJ-114 General Permit for Certain fill in Bay and Walton Counties (Choctawhatchee, St. Andrews Bay)	1	28.29

No Permit Required Letters

For this reporting period, DEP issued a total of 498 NPRs for projects which were determined to have no impacts to WOTUS, 263 of which were both received and issued within the reporting period. To issue an NPR, DEP staff is required to include sufficient documentation in the file to support the determination, including a desktop verification, an onsite field assessment, at least one 62-340 Data Form, and/or a signed WOTUS Determination Form. DEP continues to emphasize the importance of including this documentation in the Oculus files and to provide consistent training for all new and existing staff. Jurisdictional determinations are made in accordance with DEP’s current authorized State 404 Program. As explained in prior correspondence, all NPRs are available to EPA for review. A summary of NPR projects with the basis of jurisdiction is included in Appendix 5. The summary tables include the information requested in EPA’s April 6, 2023 letter (application number and district office that processed the action, relevant county, project name, agency action date, documentation of whether a WOTUS Determination Form was used and/or whether the CWE signature page was signed, documentation of whether there was coordination with the Army Corps of Engineers, the jurisdictional assessment method used, documentation of whether a site inspection or desktop assessment was performed, and the relevant link to the Oculus (Nexus) database).

DEP has also provided DEP’s NPR Guidance to EPA. The guidance was updated as of September 22, 2022, and was provided again on January 3, 2023. NPRs are used to indicate to the regulated community an assessment of whether or not a proposed project may require authorization. The NPR serves as a verification that the activity as proposed in the submitted site plan/drawings would not impact WOTUS. In addition, the text of each letter states as follows: “This verification reflects current regulations and is only valid for a period of no longer than five years from the date of this letter unless new information warrants a revision of this verification before the expiration date.”

Number of Permit Applications Received But Not Yet Processed

As of June 30, 2023, DEP had the following numbers of applications under review:

- Exemption verification requests: 4

- General permit notices: 467
- Individual permit applications: 659
- “No Permit Required” letter requests: 404
- Formal determinations of the landward extent of wetlands and other surface waters: 69
- Emergency Authorizations: 1
- Modifications: 8

The number of applications under review has decreased from the previous year by approximately one hundred (100) for both general and individual permits. This may be attributable to having additional staff, training, and experience with the program. It is anticipated that any backlog of permit applications will continue to decrease as staff continue to gain experience and work through program applications.

The Number of Violations Identified and Number and Nature of Enforcement Actions Taken and The Number of Suspected Unauthorized Activities Reported and Nature of Action Taken

Once a State 404 Program permit is issued, a permit compliance inspection typically is triggered by one of the following: 1) a permittee submits Form 62-330.350(1), “Construction Commencement Notice,” (for individual permits); 2) a permittee submits Form 62-331.200(1) – “Certification of Compliance with a State 404 Program General Permit”; 3) at least one year has passed since permit issuance; or 4) a complaint on a permitted site is received. DEP typically does not inspect earlier than the occurrence of one of the above because many projects have not yet begun construction within one year of permit issuance. As such, the number of permit compliance inspections is provided in table 7 below. The permit compliance inspections have been broken down by district and permit type and the number is driven largely by the number of permits issued during the previous reporting cycle (July 1, 2021, to June 30, 2022).

The number of violations identified for this reporting period (July 1, 2022 – June 30, 2023) increased. This increase can be attributed to the fact that the first full year of permitting under the State 404 Program was from July 1, 2021, through June 30, 2022. The increase in permitted projects directly correlates to the increase in the inspections of permitted projects. The majority of violations were resolved with informal enforcement because they are either technical or result in no wetland impact or loss and are easily remedied. Examples of these types of violations include failure to provide the Notice of Commencement or not having the correct installation or appropriate BMPs. Formal enforcement resulted in 11 warning letters, and one project authorized under an Individual Permit received a Long Form Consent Order.

Table 7 – Permit compliance inspections by district.

District	General Permit Compliance Inspections	Individual Permit Compliance Inspections	General Permit Violations	Individual Permit Violations	General Permit Formal Enforcement	Individual Permit Formal Enforcement
CD	4	5	2	3	0	0
NED	32	14	3	3	0	2
NWD	39	22	6	1	0	0
SD	51	32	14	22	3	7
SED	22	1	0	0	0	0
SWD	31	9	3	0	0	0
TLMN	1	2	0	0	0	0
TAL	1	1	0	0	0	0
TOTAL	181	86	28	29	3	9

Table 8 shows the total number of suspected unauthorized activities during this reporting period. Suspected unauthorized activities include complaints received within state-assumed waters that are relevant to the State 404 Program (for example, complaints regarding docks in state-assumed waters were not included because docks are typically not regulated under the State 404 Program), and referrals from permitting. Specifically, discharge of fill material (2)(i) in Appendix B of the 404 Applicant’s Handbook indicates that the “placement of pilings in WOTUS that does not have or would not have the effect of a discharge of fill material shall not require a 404 permit.” A referral from permitting typically occurs when a permit processor performs a site inspection during review of a permit application and finds a suspected unauthorized activity. All compliance and enforcement staff are capable and dedicated to conducting inspections of suspected unauthorized activities; all suspected unauthorized activities are inspected. Many complaints were still in the process of being investigated at the end of the reporting period. Responses to violations are shown in Table 9. The appropriate type of response is determined as described in section g of the program description. Penalties are not collected at the time they are assessed, as each enforcement document specifies the due date for any penalties. Because penalty collections occur after inspections and initiation of enforcement cases, the balance of the penalty collection amounts for the violations reported in this report will be reflected in subsequent reporting periods.

Table 8 – Suspected Unauthorized Activities.

Suspected Unauthorized Activities (Complaints and Referrals)	Total
Total suspected unauthorized activities	1122
Total confirmed violations	177
Total still under investigation or awaiting agency action	352

Suspected Unauthorized Activities (Complaints and Referrals)	Total
Total closed w/out agency action	542

Table 9 – Response to Confirmed Violations.

Response to Violations (Formal and Informal Enforcement)	Total
Compliance Assistance Offer (CAO)	98
Warning Letters (WL) issued	167
Notices of Violation issued	2
Short Form Consent Orders executed	0
Long Form Consent Orders executed	16
Total Settlement Agreements executed	1
Penalties Assessed	\$50,010
Penalties Collected	\$45,734.98
Post-Enforcement Permits issued	8

Two Post-Enforcement Permits conditional to executed Long Form Consent Orders remain pending at the end of this reporting period.

Enforcement Coordination with EPA

The EPA/DEP MOA, in Section III.E (Unauthorized Activity) states:

FDEP shall coordinate with EPA when a violation is identified that is within the permit and discharge categories in Section II.B.(1) of this Agreement. FDEP shall provide a summary of the unauthorized activity and inform EPA of the status of the file as enforcement actions are taken, including any decision to accept an after-the-fact permit application.

DEP copies EPA on actions as they occur for those projects that fall within the non-waiver categories outlined in Section II.B.(1) of the MOA. DEP and EPA discussed the possibility of EPA creating a special mailbox to receive these communications in a standardized way. If such a mailbox is created, DEP will use that mailbox to send EPA copies of those actions.

DEP has set up a recurring monthly enforcement call with EPA to discuss any enforcement-related subject matter as needed by either DEP or EPA.

The database of record for permit compliance actions is currently DEP’s ERPce database. Data is not uploaded to ICIS. DEP discussed the potential use of ICIS with EPA and found that other assumed states do not use ICIS, nor does the Army Corps of Engineers. ICIS does not appear to be built for activities regulated under Section 404 of the Clean Water Act. DEP plans to continue to use ERPce and will provide data to EPA upon request as outlined in Section III.D. of the MOA, or through the annual report as required by Section III.C. of the MOA.

DEP maintains its “program designed to identify persons subject to regulation who have failed to obtain a permit or to comply with permit conditions,” as required by 40 C.F.R. § 233.40(a), by updating our ERPce database when complaints are received and when complaint or permit inspections reveal a violation. The database is searchable, so agency reviewers can check to see if a person has violated in the past and consider that information when determining the best path to resolution.

Staff Training

DEP has provided multiple field and virtual staff trainings with high participation rates. Recordings of virtual trainings and associated documents and training materials are posted to the Division’s internal website where staff may access them at any time. As of June 30, 2023, DEP has provided the following training opportunities for staff:

- Weekly training webinars prior to assumption (August – December 2020); attendance numbers for the trainings ranged from 186-250 participants.
- Weekly training webinars after assumption (December 2020 – June 30, 2021); attendance numbers for the trainings were routinely between 100 and 120 participants.
- Training webinars as needed (July 1, 2021 – June 30, 2022) had attendance between 100 and 120 participants.
- Each processing office is assigned a Division mentor to assist them with 404 permitting and compliance questions. Scheduled meetings between the mentors and their assigned processing offices continue to be held regularly.
- Chapter 62-340, F.A.C., Basic and advanced field delineation training (for 3 years prior to assumption and post assumption.) Approximately 256 total participants attended field training in previous years post-assumption, and 241 total employees participated in field training this reporting period, as shown in Table 10.

Table 10 – Post Assumption Field Training (July 1, 2022 – June 30, 2023).

Chapter 62-340, F.A.C. Field Trainings	Location	Date	Attendees
Central District Regional Field Training	Orlando	Jan. 25 and Jan. 26, 2023	23

Chapter 62-340, F.A.C. Field Trainings	Location	Date	Attendees
Southwest District Regional Field Training	Tampa	Feb. 8 and Feb. 9, 2023	53
Southeast District Regional Field Training	West Palm	Feb. 22 and Feb. 23, 2023	40
Northeast District Regional Field Training	Jacksonville	March 8 and March 9, 2023	35
Northwest District Regional Field Training	Pensacola	March 22 and March 23, 2023	27
South District Regional Field Training	Ft. Myers	April 12 and April 13, 2023	35
Tallahassee and Mining Field Training	Tallahassee	May 2 and May 3, 2023	28
TOTAL			241

Historical, Cultural, and Tribal Resources

DEP is committed to full engagement with the State Historic Preservation Officer (SHPO) and the Tribes on protecting historic and cultural resources in the State of Florida. For each State 404 Program general and individual permit application received between July 1, 2022, and June 30, 2023, DEP provided advance notice to the SHPO, the Seminole Tribe of Florida (STOF) and the Miccosukee Tribe of Indians of Florida (MTIF) according to the procedures outlined in the Operating Agreement (August 6, 2020) between DEP and the SHPO. The Operating Agreement provides for an opportunity for the SHPO and the Tribes to review permit applications for effects to cultural resources or historic properties, make requests for additional information, and/or make effects determinations and recommendations.

DEP’s Operating Agreement with SHPO remains in effect, with no amendments or alterations proposed or requested during the preceding year. DEP and SHPO continue to work in partnership to protect and document the state’s historic resources located in areas affected or potentially affected by 404 and ERP permits. DEP also continues to adhere to the Operating Agreement regulations, described above, for notifying the Tribal Historic Preservation Officers of the Seminole and Miccosukee Tribes, and THPO has requested no alterations to the Operating Agreement.

DEP’s commitment to fostering historic preservation in its jurisdiction also extends beyond the agreement with SHPO, the Seminole Tribe, and the Miccosukee Tribe. The Department is pleased to note cooperation with other state agencies, including FWC and Florida Forest Service, in its effort to learn from and secure the future of Florida’s historic resources. This cooperation takes place on a case-by-case basis, as permitting needs dictate.

Every State 404 Program public notice is a solicitation for comments, including comments on the potential effects to historic/cultural resources. DEP's public notice template provides information regarding any known historic properties and/or cultural resources within the permit area and provides a summary of recommendations received by SHPO/THPO/Indian Tribes during initial review of the application. SHPO/THPO/Indian Tribes are also notified when the public notice is posted, and each entity has the opportunity to provide additional comments in response to public notice. Any public comments received from other tribes with which DEP does not have an established operating agreement are reviewed and considered along with public comments and are included in the project specific file. The date of receipt for all public comments, including the timing for any comments from a commenting agency or tribe, are available in the associated permitting file.

There were no instances where DEP did not accept the recommendations and/or determinations from a commenting agency or tribe.

SHPO

Between July 1, 2022, and June 30, 2023, the SHPO requested additional information for 141 applications, mostly requesting Cultural Resource Assessment Surveys. The SHPO provided six (6) conditional no adverse effect determinations and one (1) no adverse effect determinations. The SHPO also provided 652 letters of no effect determinations, with a request for the inclusion of the standard condition for unanticipated discoveries.

Tribes

Between July 1, 2022, and June 30, 2023, the Seminole Tribe of Florida requested additional information for 54 permit applications. Fifty-three (53) of the requests were for Cultural Resource Assessment Surveys and only one (1) was for project-specific information. Additionally, the STOF provided twenty-eight (28) letters of no objection. The remaining twenty-six (26) applications were withdrawn or had no Request for Additional Information response provided prior to July 1, 2023. The STOF consistently provided comments and recommendations in advance of public notice. Between July 1, 2022, and June 30, 2023, the Miccosukee Tribe of Indians of Florida (MTIF) submitted no requests for additional information and provided no determinations of effect.

There were seven (7) instances in which consulting parties determined a proposed State 404 Program project had the potential to adversely affect historic properties eligible for listing in the National Register of Historic Properties or of other religious and cultural significance. SHPO requested additional preservation steps prior to implementation of the permits in each of these instances. These projects and the final determinations are listed in Table 11. DEP was not notified of any unanticipated discovery of human remains as a result of the implementation of a State 404 Program permitted activity.

DEP is required to place all finalized file materials into Oculus and has instructed processing staff to do so. Any information generated during the advance notice and public notice process which identifies the location of an archaeological site is uploaded into Oculus as a restricted file. Per section 267.135, Florida Statutes, this information is exempt from s. 119.07(1), F.S., and s. 24(a) of Art. I of the State Constitution.

DEP does not recommend any actions or revisions to the DEP-SHPO Operating agreement or the Programmatic Agreement at this time.

Table 11 – Recommendations by SHPO Following Effects Determinations (July 1, 2022, to June 30, 2023).

Permit	(County) Project Description	Outcome
429201-001-SFG	(Highlands) Wetlands restoration	DHR endorsed permit on condition of avoidance of resources. Application withdrawn.
429320-001-SFI	(Leon) Multiple road extensions and a new park and trails	DHR endorsed permit on condition of avoidance of resources.
432260-002-SFG	(Osceola) Pipeline relocation to accommodate road extension	DHR endorsed permit on condition of avoidance of resources.
403873-002-SFI	(Marion) Mass grading	DHR endorsed permit on condition of avoidance of resources.
399615-002-SFG	(Sumter) Road widening	DHR endorsed permit on condition of avoidance of resources.
431353-001-SFI	(Dade) Construction of distribution center	DHR requested documentation of properties potentially eligible for NRHP required before demolition.
433470-001-SFG	(Hardee) Bridge replacement	DHR requested addition of a permit condition dealing with inadvertent discoveries.

The Department and DHR worked together on two projects that concluded with Memoranda of Agreements between DEP and SHPO. The respective permit information and conditions are included in Table 12.

Table 12 – Memoranda Agreement Concluded between SHPO and DEP.

Permit	Permit Condition Added
416259-001-SFG	(Polk) Demolition allowed after comprehensive documentation of the resource
412769-002-SFI	(Pasco) Building demolished after HABS and HALS completed

Listed Species

DEP provides early Endangered Species Act (ESA) coordination engagement for all State 404 Program general and individual permit applications. The Memorandum of Understanding between DEP, FWC and USFWS describes the roles, responsibilities, and commitments of each agency in implementing the State 404 Program. Coordination procedures are further outlined in rule 62-331, F.A.C., and in the USFWS’s Programmatic Biological Opinion for the EPA’s Approval of FDEP’s Assumption of the Administration of the Dredge and Fill Permitting Program (State 404 Programmatic BiOp). These procedures ensure that endangered and threatened federally listed species and their critical habitats are protected as an integral part of the State 404 Program. FWC and USFWS provide their comments to DEP directly for general permits. For individual permit reviews, FWC coordinates with USFWS and combines the federal and state-listed species comments into one letter for DEP. All FWC and USFWS correspondence and related materials are made a part of the record and available for public review and comment.

The Endangered and Threatened Species Technical Team, comprised of FDEP, USFWS, and FWC experts, convenes once a week to discuss specific projects and improvements to coordination procedures. The team has worked together to provide training to DEP, FWC, and USFWS staff regarding review procedures. Additionally, FWC and DEP compile and share weekly reports on both pending and closed applications to provide general information needed for each agency’s review. According to the USFWS, during a meeting held July 26, 2023, the provisions in the Memorandum of Understanding have been successfully implemented by DEP and FWC during this reporting period.

Both USFWS and FWC review a proposed project’s effect on listed species before a permit is issued. The outcomes of the effect determinations are incorporated into the State 404 Program permit file and included in the public notice. The coordination efforts result in a combination of determinations identifying projects as either “no affect” or “may affect.” Projects that are determined to be in the “may affect” category are further identified as either “likely” or “not likely to adversely affect,” and a determination of jeopardy is made (jeopardy or no jeopardy). For example, a determination of “may affect, likely to adversely affect” for a listed species indicates anticipated incidental take and requires additional review by USFWS. If adequate protection measures are available, the USFWS’s final conclusion would be “no jeopardy” or “may affect, not likely to adversely affect.” If the USFWS’s final conclusion is that the activities allowed by a potential permit will “jeopardize the continued existence of a species,” and no

protection measures are available to address the adverse impacts, the permit would not be issued pursuant to the ESA and Rules 62-33.053(3)(a) 4, F.A.C., 62-331.201(3)(k), F.A.C. and 62-331.248(3)(j), F.A.C.

During this reporting period, one hundred and fifteen (115) State 404 Program permit applications showed reasonable potential for affecting federally endangered or threatened species. Of the 115, EPA provided comments on 84 projects and did not provide comments on fourteen (14). Fifteen (15) applications were mischaracterized as falling within a category of permit for which EPA waived review, so EPA was not noticed for those 15. The mischaracterized applications were identified as “may affect, not likely to adversely affect.” The remaining two applications involved authorized take and were not noticed to EPA: CEMEX Alico Quarry Phase 3D (No. 0166176-033) and Emerald Lakes Phase 1 (No.0396998-001-SFI). However, in all instances these applications were reviewed by FWC and USFWS, and appropriate conditions were included in the permits.

Tables 13a, 13b, and 14 below summarize the actions DEP, FWC, and USFWS have taken to protect endangered and threatened federally listed species and designated critical habitats. There were no projects proposed in this reporting period where the anticipated effects to federally listed species were determined to be “jeopardy,” and there were no proposed projects with anticipated adverse modification to or destruction of designated critical habitats. Twelve (12) reviews of listed species included an initial determination of “may affect, likely to adversely affect.” After further review, each of these “likely to adversely affect” determinations concluded with either “no jeopardy” or “may affect, not likely to adversely affect,” and protective measures were incorporated into the final permit as specific conditions.

Table 13a below is a summary of project effect determination reviews for each federally listed species for permits issued between July 1, 2022, and June 30, 2023.

Table 13a: Summary of federally listed species reviews for issued State 404 Individual Permits, July 2022 - June 2023.

Federally listed species	Total	No effect	Not likely to adversely affect	Likely to adversely affect
American crocodile	3		3	
Audubon's crested caracara	31	19	10	2
Bluetail mole skink	7	5	1	1
Cape Sable seaside sparrow	2	1	1	
Choctawhatchee beach mouse	2	1	1	
Eastern black rail	10	5	5	
Eastern indigo snake	106	24	80	3

Federally listed species	Total	No effect	Not likely to adversely affect	Likely to adversely affect
Everglade snail kite	31	22	9	
Florida bonneted bat	24	11	10	3
Florida grasshopper sparrow	21	21		
Florida Manatee	2	1	1	
Florida panther	9		4	6
Florida scrub-jay	61	54	7	1
Frosted flatwoods salamander	11	7	4	
Green sea turtle	3		3	
Kemp's ridley sea turtle	3		3	
Leatherback sea turtle	3		3	
Loggerhead sea turtle	3		3	
Panama City crayfish	3	1		2
Piping plover	4	3	1	
Red knot	1		1	
Red-cockaded woodpecker	39	32	7	
Reticulated flatwoods salamander	10	8	2	
Rufa red knot	1	1		
Sand skink	16	12	3	1
St. Andrew's beach mouse	1		1	
West Indian Manatee	1		1	
Wood stork	91	3	87	2
Totals	499	231	251	21

Table 13b below shows how many project applications could affect each of the federally listed species where the initial effect was determined to be “may affect, likely to adversely affect,” and incidental take is anticipated.

Table 13b: Summary of initial determinations of “May Affect, likely to Adversely Affect” federally listed species for State 404 Permits issued between July 1, 2022 and June 30, 2023.

Federally listed species	Number of Permits/Projects
Audubon's crested caracara	2
Bluetailed mole skink	1
Eastern indigo snake	3

Federally listed species	Number of Permits/Projects
Florida bonneted bat	3
Florida panther	6
Florida Scrub-Jay	1
Panama City Crayfish	2
Sand skink	1
Wood stork	2
Total	21

Table 14 below shows additional information for issued permits where the initial effect determinations were “may affect, likely to adversely affect,” and incidental take is anticipated. There were twelve (12) Individual Permits issued with this determination, including one with long term planning.

Table 14: Initial determinations of “May affect, likely to Adversely Affect” that were resolved before being issued between July 2022 and June 2023.

Project and Permit Number	Affected Species	Amount of Take¹	Mitigation²	Other Requirements
Tyndall Town Center Apartments 396481-001 SFI	Panama City crayfish	25 acres critical habitat (estimated 350 individuals)	\$225,000 donation to the National Fish and Wildlife Foundation Conservation Fund	Additional avoidance and minimization measures
College Station Phase 3B 399183-001 SFI	Panama City crayfish	21.35 acres (4.55 acres critical habitat)	Conservation easement for 367.1 acres; includes 157.05 critical habitat	Additional avoidance and minimization measures
CEMEX Alico Quarry 3D extension 166176-033 SFI	Florida panther	1 individual/ 149 acres	1,354 PHUs	49.4-acre on-site mitigation area (equivalent to 284.92 PHUs)
	Florida bonneted bat	1 roost, 11 individuals	Avoidance and minimization measures	-

Project and Permit Number	Affected Species	Amount of Take¹	Mitigation²	Other Requirements
C-139 Flow Equalization Basin 379456-003 SFI	Eastern indigo snake	2,650 acres two individuals and one nest	Avoidance and minimization measures	-
	Florida panther	343.6 acres (expansion from original)	6,314 PHUs	Additional avoidance and minimization measures
	Audubon's crested caracara	10 adults, 20 eggs and/or nestlings, 8 juveniles	Avoidance and minimization measures	-
Randall Curve Commercial 403542-001 SFI	Florida bonneted bat	1.34 acres	0.90 credits	Additional avoidance and minimization measures
	Florida panther	17.64 acres in secondary zone of Focus Area	182.16 PHUs	-
Sebring Storage 412558-002 SFI	Sand skink and Bluetailed mole skink	0.85 acres occupied habitat	1.7 credits	Additional avoidance and minimization measures
Everglades National Park Salem Radio Tower 396345-001 SFI	Wood stork	1.5 acres	0.94 credits and 0.46 acres wetland restoration	Additional avoidance and minimization measures
Babcock Ranch Community ³ Phase 3	Audubon's crested caracara	12,474.97 acres	Trap and GPS tag two (2) adult caracaras; track for two years with an annual report	Additional avoidance and minimization measures

Project and Permit Number	Affected Species	Amount of Take¹	Mitigation²	Other Requirements
396574-002 SFI with Long Term Planning	Eastern indigo snake	8,681.34 acres No more than 5 snakes	amended BO 41420-2007-F-0900-R001	-
	Florida bonneted bat	12,526 acres habitat managed	12,981 acres for foraging; 8.04 acres for roosting;	Additional avoidance and minimization measures
	Florida panther	10,932.63 acres Primary zone of the Focus Area	85,549.10 PHUs equivalent	-
St. Paul Church 409217-002 SFI	Florida panther	0.39 acres	16.70 PHUs	Additional avoidance and minimization measures
Tamiami Trail Next Steps Phase II 325949-008 SFI	Florida panther	Not available	452 PHUs	-
	Wood stork	Not available	Restoration of 43.96 acres of offsite wetlands and the enhancement of 15.2 acres of offsite wetlands	Adhere to 1990 Habitat Management Guidelines
Two Rivers Southwest 406731-005 SFI	Eastern indigo snake	Not available	Voluntary monetary donation to the eastern indigo snake conservation fund	Standard conditions, reporting
Emerald Lakes 396998-001-SFI	Florida scrub-jay	5	See: Biological Opinion, Emerald Lakes SAJ-2018-02833, FWS Log Number 2020-F-0453, USFWS, July 21, 2020

³Also addressed in referenced Biological Opinions: FWS Consultation #41420-2007-F-0900, dated August 21,

2009; FWS Consultation #41420-2010-F-0345, dated September 1, 2010; FWS Consultation #41420-2010-F-0345, dated April 14, 2011; and the Amendment, FWS Consultation #41420-2007-F-0900-R001, dated August 9, 2019.

Division of Water Resource Management, Submerged Lands and Environmental Resources Coordination Program (SLERC) staff attended several EPA meetings with NMFS Protected Resources Division staff to support EPA's progress towards an ESA section 7 consultation. The purpose for the meetings was to support preparation of a Biological Evaluation and develop coordination processes between DEP and NMFS for Florida's State 404 Program.

In addition to the effort to potentially consider ESA-listed species under NMFS jurisdiction, DEP has been coordinating with NMFS's Habitat Conservation Division in the NMFS Southeast Regional Office to ensure compliance with the Magnuson-Stevens Fishery Conservation and Management Act (MSA). During this reporting period, a State 404 Program permit application was identified as having Essential Fish Habitat (EFH) resources within the project footprint, which requires coordination with NMFS per the MSA. For this particular project, SLERC staff coordinated with NMFS to assist the DEP District permitting staff with MSA compliance for the project.

In September 2022, SLERC created a centralized email address dedicated for listed species correspondence, which has improved communication between partner agencies. All State 404 Program correspondence between FWC and USFWS relevant to listed species project reviews are copied to this mailbox, which allows SLERC staff to identify potential issues as well as improve tracking of listed species data for reporting purposes.

During this reporting period, internal DEP coordination procedures have been updated to provide clarification and guidance on rule requirements for deeming an application administratively complete with regards to listed species information. In addition, guidance was developed for reviewing post-enforcement permits with listed species issues and for initiating modifications to issued permits when requested by the USFWS based on new species information.

Internal training opportunities related to listed species continued during this period, as follows:

- August 2022: USFWS and FWC staff gave presentations to DEP staff describing their review of projects for potential adverse impacts to federal and State-listed species for the State 404 Program.
- February 2023: SLERC staff clarified rule requirements regarding completeness considerations of listed species information prior to an application being deemed administratively complete by the Department.

Program Auditing

DEP implements a State 404 Program that is at least as stringent as the federal program. SLERC is responsible for ensuring statewide consistency in the implementation of the State 404 Program. SLERC is composed of technical staff housed in the Tallahassee DEP headquarters. This staff performs multiple functions statewide; the 404 team within SLERC specifically handles audits, delineation training, and other 404 topics. This team also provides programmatic oversight and tracks information used in reporting to EPA. To that end, DEP adopted a standard form of documentation for determinations of the landward extent of wetlands or other surface waters. The Chapter 62-340, F.A.C., Data Form (62-340 Data Form) is analogous to the Wetland Determination Data Form used by the Army Corps of Engineers. The 62-340 Data Form facilitates standardization of field procedures and documentation of wetland determinations.

To further ensure consistency, program auditing requirements, including target numbers, are described in section g of the approved Program Description. A DEP SLERC technical staff team conducts auditing on an annual basis. An organizational chart for SLERC was included in section c of the assumption package; positions and structure on the updated chart provided to EPA on January 3, 2023, have not changed. After the end of each quarter starting July 1 each year, staff pull a list of permits and formal determinations issued the same quarter of the previous year. Staff review 50% of individual permits, 25% of general permits, and 100% of formal determinations for the time period from a list of all files in that category using one of two methods: Method 1 – using Microsoft Excel’s random function to randomly select the correct percentage of authorizations per district or program office; or Method 2 – choosing every n^{th} file from a list (example: to audit 20% of permits, pull every 5th file number from a list.) The audit period for this annual report reflects the permitting time period from July 1, 2021, through June 30, 2022. The Department will continue to identify and describe any concerns found through these consistency initiatives and to provide recommendations for their resolution in this and future annual reports.

Formal Determination Audit Summary

A Formal Determination (FD) is a binding determination of the landward extent of wetlands and other surface waters as defined by Chapter 62-340, F.A.C. A formal determination may be based on a certified survey, an approximate delineation, or a combination thereof. The determination is conducted by a CWE from DEP or one of the five Water Management Districts (WMDs). A formal determination is binding for five years and may be renewed or reissued in accordance with the procedures in Section 7 of the ERP Applicant’s Handbook. This portion of the audit focuses on 62-340 Data Forms prepared in support of FD authorization applications during the July 1, 2021, to June 30, 2022, audit period; 62-340 Data Forms submitted with individual or general permit applications were reviewed under those audits, respectively.

Pursuant to Rule 62-330.201, F.A.C., staff must use the 62-340 Data Form to document the landward extent of wetlands and other surface waters for any application that requires a wetland determination or assessment. The forms are used to document and support the delineation of wetlands and other surface waters. Section 7.1.1 in the ERP Applicant's Handbook, clarifies that at least one complete 62-340 Data Form is required for a data point for each time an agency concludes or determines that an area is a non-wetland surface water, wetland, or upland. Since assumption, SLERC staff have provided webinars and field trainings to instruct participating staff on completing the 62-340 Data Form. SLERC also created an internal Certified Wetland Evaluator (CWE) certification to demonstrate that those staff who are reviewing wetland delineations under Chapter 62-340, F.A.C., and performing WOTUS determinations possess the necessary skillset to satisfactorily carry out those responsibilities. As of June 30, 2021, eighty-four (84) staff members had received CWE certification. As of June 30, 2022, one hundred fifty-nine (159) staff members had received CWE certification. The CWE certification is valid for a period of two years and, upon reaching the two-year anniversary date, re-certification to extend certification for another two years is required. As of June 30, 2023, 192 staff members received CWE certification, of which 40 staff members received re-certification for an additional two years.

SLERC conducted an audit of all 227 Formal Determinations issued during the auditing period. Of these FDs, 224 were certified surveys, 207 were new determination requests, and six were WOTUS determinations. Five of the FD requests were submitted prior to assumption and issued within the audit period.

A summary of the FD audit is provided in Table 15. The projects range in size from 0.2 acre to over 7,063 acres. The FDs describe 44,965 acres in Florida including 8,702 acres of wetlands and 84 acres of surface waters. The SLERC Wetland Evaluation Training Team has audited the FDs to evaluate implementation of the 62-340 Data Form requirements, determine consistency or drift in documentation practices and standards, and identify the future training needs of CWEs. The audit involves an inspection of the 62-340 Data Form documentation, in combination with additional reliable available information, to verify that the landward extent of wetlands and surface waters has been accurately identified and documented.

During the reporting period, staff began using the Chapter 62-340 Data Form mobile application (the Data Form App). SLERC created the Data Form App to modernize data collection and reporting, and to improve efficiency. Use of the Data Form App is expected to reduce the errors or omissions noted below. The Data Form App prompts staff to provide photo documentation at each step in the delineation process. DEP is committed to ensuring each field vehicle is equipped with a tablet that has the Data Form App installed. SLERC has provided training to introduce the Data Form App to CWEs, demonstrate its functionality, and continue pursuing implementation.

Table 15 – Formal Determination Audit Summary.

Parameter	FD files consistent with Parameter	FD files without Parameter	Unclear or absent
Data Forms are Present	214	12	1
Data Form documentation is supported by Chapter 62-340, F.A.C.	189	33	5
Plant lists and calculations are correct	198	24	5
Soils have been correctly identified as hydric	188	27	12
Hydrologic indicators are consistent with rule	190	32	5
Photographic documentation is present	202	20	5
Clerical information recorded correctly	183	39	5

Individual Permit Audit Summary

DEP District offices work closely with SLERC 404 mentors to ensure review and processing of applications is conducted correctly. As such, the results of the audit reflect the successful processing of these applications. Demonstrated aptitude is considered when hiring or promoting a SLERC 404 mentor, rather than strictly relying on years of experience. The

mentors work as a team to be available to all State 404 Program regulatory staff. They serve an advisory rather than supervisory role for district processors. The Division Mentorship positions are useful tools to help ensure consistency in implementation, in addition to state program requirements.

During the auditing period (July 1, 2021 – June 31, 2022) for this report, 197 individual permits and modifications were issued. Duplicative modifications were removed and the total number of Individual Permit files to be considered for the audit totaled 170. SLERC is required to audit 50% of individual permits issued and selected 85 files randomly.

Table 16 provides a summary of the Individual Permit audit results. The coordination with commenting agencies and tribal partners was over 95% correct and included documentation. Requests for additional information was also over 95% correct for relevant information, documentation, and correct citation. Over 98% of public notice letters were included correctly in project files. During the audit, 16 files did not properly include 62-340 Data Form. These 16 files were not included in the reporting for data form parameter accuracy.

Table 16 – Individual Permit Audit Summary.

Parameter	Individual files consistent with Parameter	Individual files without Parameter	Unclear or provided prior to assumption
Correct commenting agency and tribal coordination	81	4	N/A
Request for Additional Information (RAI) correctly cited and uploaded	82	3	N/A
Correct ID determination on Data Form	28	41	16 missing data forms
Hydrologic indicators are consistent with	57	12	16 missing data forms

Parameter	Individual files consistent with Parameter	Individual files without Parameter	Unclear or provided prior to assumption
Chapter 62-340, F.A.C.			
Water Level Indicators recorded correctly	47	22	16 missing data forms
Photographic documentation is present	67	2	16 missing data forms

General Permit Audit Summary

SLERC reviewed general permits to evaluate consistency with the review procedures for State 404 Program general permits (62-331.201, F.A.C.). Each project file was inspected to determine whether the site documentation, interagency coordination, and authorization were sufficiently documented. In total, 657 authorizations for twenty-six (26) types of general permits were issued. SLERC is required to audit 25% of the general permits, and 167 permit files were audited. A summary of the General Permit audit is provided in Table 17. The most frequently issued authorizations were residential developments (62-331.227, F.A.C.) and bank stabilizations (62-331.216, F.A.C.).

Table 17 –General Permit Audit Summary.

Parameter	General permit files consistent with Parameter	General permit files without Parameter	Unclear
Activity meets conditions of specific permit type	144	8	15
Permit includes permit drawings and narrative description	153	7	7

Parameter	General permit files consistent with Parameter	General permit files without Parameter	Unclear
Mitigation correctly addressed and documented	129	13	25
Data Forms are Present	159	8	N/A
Delineations conducted by a CWE	157	10	N/A
Plant lists and calculations are correct	155	12	N/A
Soils have been correctly identified as hydric	134	33	N/A
Hydrologic indicators are consistent with Chapter 62-340, F.A.C.	147	20	N/A
Photographic documentation is present	159	8	N/A

Compliance and Enforcement Audit Summary

For this audit period (July 1, 2021 – June 31, 2022), the Compliance and Enforcement Audit requires review of 50% of the formal enforcement cases reported in the previous Annual Report. No Short Form Consent Orders (SFCO) were issued during this period. To obtain a representative assessment of compliance and enforcement activities by DEP districts, a total of nine sites were audited which reflects more than 50% of the required formal enforcement cases resolved since assumption.

For the nine sites, the audit found all were inspected by Department staff and correctly documented within the files. All of the formal enforcement cases were appropriately publicly-noticed, and all but one included a technical staff report which documented the Department’s decision in resolving the violation. Subsequent post enforcement permits were issued for all

nine cases. Eight of the projects were routed through the Division of Water Resource Management for Peer Review, which includes evaluation of penalty calculations.

Audit findings

The audit period of July 1, 2021, to June 30, 2022, was the first complete year of State 404 Program assumption. Although areas for improvement have been identified, the Department is pleased with the overall implementation of Rule 62-331.201, F.A.C., and the performance of CWEs in conducting determinations of the landward extent of wetlands or surface waters. SLERC will share the audit results with Districts and CWEs to inform them of the overall trends noticed and to generate feedback on any challenges experienced during the audit period. Based on the results of the audit, SLERC has identified the following topics that are being addressed where applicable:

- Documentation of site inspections in file. Work with staff to ensure full documentation of site inspections and determinations is completed, and all field information and materials are correctly included with project files.
- Documentation of mitigation in file. Work with staff to ensure complete documentation of mitigation analysis including UMAM and Mitigation Bank or Mitigation Plans are correctly included with project files.
- Clerical errors. Project files occasionally include references to site visits, photographs, and/or completed data forms that have not been uploaded contemporaneously in the file.
- Site Visits Preparation. SLERC is providing staff additional recommendations and training on best practices to prepare for a site visit and for more consistent documentation of site information.
- Renewal and Reissuance of FDs. SLERC will reiterate to staff the data form is also required for the renewal and reissuance of FD authorizations. Renewed or reissued FDs may have been previously verified without the 62-340 Data Form prior to the data form being required; however, all FDs require field verification of the lines consistent with Chapter 62-340, F.A.C.
- Verification of Data Form Information. Instruct staff to review all documentation prior to finalizing Data Forms to ensure GPS coordinates correctly identify the site location and photographs clearly document information in support of determinations.

Efforts to improve on audit findings are now scheduled and include a new employee training program, District Field training, Tuesday Webinars, and regularly scheduled meetings with SLERC mentors. Staff new to permitting and compliance and enforcement will be provided classroom type instruction to include at the least Chapters 62-331 and 62-340, F.A.C., the ERP Applicant's Handbook, the 404 Applicant's Handbook, and the Uniform Mitigation Application Method (UMAM) in Chapter 62-345, F.A.C. Field training exercises will introduce wetland delineation in accordance with 62-340, F.A.C., and will include use of the 62-340 Data

Form and Chapter 62-340, F.A.C., Data Form Guide. New employees will attend this training once within the first few months of hire and will subsequently attend District field trainings when available.

DEP will continue providing yearly district field training. Included in the training program is a virtual meeting held bi-weekly to present topics and provide a forum for discussion and exchange of information related to the State 404 Program. The forum will address hot topics and provide resources to assist staff and provide opportunities to share and disseminate information relevant to the State 404 Program. SLERC mentors will also continue to have regular meetings with Districts to assist with questions and provide assistance on projects.

Other Information

In total, approximately three hundred fifty-five (355) positions support the State 404 Program in some capacity. A permitting team of one hundred nineteen (119) individuals processes and reviews applications; ninety (90) of these individuals spend the majority of each workday evaluating activities for the assumed program. The DEP State 404 Program Compliance and Enforcement team is comprised of fifty-eight (58) total individuals with forty-four (44) members whose primary job responsibilities support the State 404 Program. All compliance and enforcement staff are capable and dedicated to conducting inspections of suspected unauthorized activities; all suspected unauthorized activities are inspected. This provides a total of one hundred seventy-seven (177) positions directly involved in permitting and compliance and enforcement activities. Additional staff members provide a supporting role outside of permitting and compliance and enforcement activities. This includes clerical, training, guidance, and leadership personnel statewide who contribute to the continued implementation of the State 404 Program.

DEP continues to obtain new positions and hire new staff as quickly as possible to handle the workload. With the increase in total applications for this reporting period, the workload has increased for existing staff. The scope of this report includes activities through June 30, 2023; the 2022 legislature allocated an additional thirty-three (33) employees to the Department for implementation of the State 404 Program, effective as of July 1, 2022. DEP has filled twenty-nine (29) positions and continues working to fill the remaining four (4) positions. It is difficult to predict the change in workload going forward, as it depends on the number of permit applications received.

As of June 30, 2023, a total of 208 agency staff (including DEP, WMDs, and Hillsborough County EPC) have been certified as CWEs. Of this total, 32 CWEs are dually employed by the WMDs and DEP. All CWEs for DEP perform at least some additional duties. The number of CWEs continues to increase as more staff are hired and trained. Dual-employed CWEs conduct formal determinations utilizing Chapter 62-340, F.A.C., and complete the required data form. Only DEP CWEs process 404 applications and make WOTUS determinations.

DEP issued 8 verifications of State 404 Program exemptions, as shown in Table 18, below:

Table 18 - Verifications of Exemption.

Application #	Project Name	Exemption	Agency Action
<u>0402268-001-SFE</u>	CRUICKSHANK WETLAND CROSS (404)	(c)(6) – Farm, forest, or temporary access roads	Exempt
<u>0418104-001-SFE</u>	DCT BRIDGE AND LWC-BAY	(c)(6) – Farm, forest, or temporary access roads	Exempt
<u>0419435-001-SFE</u>	DCT BRIDGE AND LWC-GULF	(c)(6) – Farm, forest, or temporary access roads	Exempt
<u>0418104-002-SFE</u>	DCT BRIDGE & LWC-BAY	(c)(6) – Farm, forest, or temporary access roads	Exempt
<u>0419435-002-SFE</u>	DCT BRIDGE AND LWC-GULF	(c)(6) – Farm, forest, or temporary access roads	Exempt
<u>0424293-001-SFE</u>	BRIDGE MAINTENANCE (404)	(c)(2) - Maintenance	Exempt
<u>0423462-001-SFE</u>	SEABOARD CROSSING CULVERT	(c)(6) – Farm, forest, or temporary access roads	Exempt
<u>0398543-001-SFE</u>	WILLAWAY SOD FARM	(c)(1) – Agriculture	Exempt

Summary

In its third year, Florida’s State 404 permit program has continued to grow into a successful and robust regulatory program. DEP is committed to the continuous development and improvement of its program and welcomes EPA’s assistance and input.

Has an ERP been issued?

If yes, what is the Permit Number:

Brief description of project:

Acreage of Impacts by Community Type:

Community Type	Acreage of Impact
Palustrine Emergent	
Palustrine Forested	
Estuarine Emergent	
Estuarine Forested	

Impacted Watershed Name:

Mitigation Details

Impact Scoring Methodology:

Must match bank credit methodology

Mitigation Bank Credit Methodology:

Community Type	Amount of Credits
Palustrine Emergent	
Palustrine Forested	
Estuarine Emergent	
Estuarine Forested	

Description of Proximity Factor Tool	Proximity Factor Ratios
If impact site is outside of mitigation bank/IFL service area boundary, but within same 8-digit HUC as the mitigation bank/IFL service area boundary, enter 0 If impact site is located outside the 8-digit HUC that contains the mitigation bank/IFL service area boundary or PRM site, proceed to next row	
If impact site is outside of the mitigation bank/ILF service area boundary and one 8-digit HUC away from the mitigation bank location/ILF service area boundary, enter 1.5	
For each additional 8-digit HUC away from the mitigation bank location/ILF service area boundary, or PRM site, add 0.25 (For example, if the impact site is 3 8-digit HUC's away from the mitigation bank location/ILF service area boundary, add 0.50)	
If the mitigation entails in-kind replacement, enter 0 If the mitigation entails out-kind replacement, enter 0.75	
If the mitigation occurs within the same EPA Level IV Ecoregion, enter 0 If the mitigation occurs within a different EPA Level IV Ecoregion, enter 0.25	
Total of all applicable variables (Proximity Factor) =	

Mitigation Bank Watershed:

Total Required Bank Credits:

Community Type	Total Credits by Type
Palustrine Emergent	
Palustrine Forested	
Estuarine Emergent	
Estuarine Forested	

Mitigation Options

Mitigation Bank Credits: *Describe the status of available, in-service area credits. If project is within a mitigation bank service area but currently the appropriate credit types are not available, please insert or attach documentation from the bank stating that the credits are not available. If some credits are available, but not enough to fully offset the impact, available in-service area credits should be purchased, and any remaining balance would be offset out of service area.*

Is there a Corps-authorized in-lieu fee option?

Why is permittee-responsible mitigation not the preferred option?

Bank Appropriateness

Provide a brief description of how you determined the selected bank was the most appropriate mitigation option. Is this bank the closest available bank to the impact site?

Cumulative Impact Analysis

Locate the appropriate map for your region [Applicant's Handbook](#), go to Section 10.2.8, Figures 10.2.8-1 through 10.2.8-5. If the impact is located in a different mapped unit than the unit that contains the bank, describe how cumulative impacts were addressed.
