

JACK KOSTRZEWA

*Assistant Director
Capital Region
Transportation
Planning Agency*

Jack has been with the Capital Region Transportation Planning Agency (CRTPA) and its predecessor the Tallahassee-Leon County Metropolitan Planning Organization (TLCMPO) for 30 years. Originally, his work included projects such as long range transportation plans, road studies, and transportation systems modeling. That emphasis widened in the last 15 years towards the development of multi-modal systems including the CRTPA regional trails efforts. Specific projects include the Lake Jackson Ecopassage along North Monroe Street, The Capital City to the Sea Master Plan (Coastal Trail and Wakulla Springs to St. Marks Trail), Tallahassee-Leon County Bike and Pedestrian Master Plan, Thomasville Road Multi-Use Path, as well as, trails linking Tallahassee/Leon County to Gadsden County and Jefferson County. None of these projects were completed in a vacuum and could not have been completed without the dedication of the entire staff at the CRTPA. Jack loves Florida State University so much that he went to school there twice, once for a BA in Communications and once for an MS in Urban and Regional Planning.
