Introduction

The Florida Coastal Management Program (FCMP) consists of a network of 24 Florida Statutes (F.S.) administered by nine state agencies and five water management districts. Twenty-two of the 24 Florida Statutes have approved Enforceable Policies, which are listed in this document. This framework allows the state to make integrated, balanced decisions that ensure the wise use and protection of the state's water, property, cultural, historical, and biological resources; protect public health; minimize the state's vulnerability to coastal hazards; ensure orderly, managed growth; protect the state's transportation system; and sustain a vital economy.

Federal consistency reviews are integrated into other review processes conducted by the state depending on the type of federal action being proposed. Regardless of the process used, the review of federal activities is coordinated with the appropriate FCMP network partner agencies. Each agency is given an opportunity to object, provide comments on the merits of the proposed action, address concerns, make recommendations, and state whether the project is consistent, or not consistent, with its statutory authorities in the FCMP.

As the designated lead coastal agency for the state, the Florida Department of Environmental Protection (FDEP) communicates the agencies' reviews, including objections, and the state's final consistency decision to federal agencies and applicants for all actions other than permits issued under Clean Water Act Section 404 and Section 10 of the Rivers and Harbors Act. The state's consistency decisions on those permits are made through the approval or denial of the wetland resource or environmental resource permits issued under Chapter 373, Part IV, F.S.

Every county in Florida is in the 'Florida Coastal Zone.' Therefore, all federal actions within the state, including funding, that will or may affect the Florida Coastal Zone are subject to federal consistency reviews. Additionally, federal actions, including funding, that will or may affect the Outer Continental Shelf (OCS) are subject to consistency reviews. The OCS are submerged lands that lie seaward of state water boundaries (10.36 statutory miles off Florida's west coast and 3.45 statutory miles off the east coast).

For an in-depth review of Florida's Coastal Management Program and review process for enforceable policies please see the document [Florida's Coastal Management Program Guide: A Guide to the Federally Approved Florida Coastal Management Program](#) published by the Florida Department of Environmental Protection.

How to Use this Document

This document provides a tabular listing of the approved enforceable policies organized by Florida Statute. Please note that there are 24 statutes within the Coastal Management Program, but two statutes of those Statutes do not contain approved enforceable policies. Florida Statutes are structured by sections and the tables provide only the sections that are approved as enforceable policies. Note that the total number of approved enforceable policies vary widely by statute.

In addition to the approved enforceable policies under each statute, information provided within the tables includes: 1) a “quick glance” summary for each statute with key words; 2) the statute section title; 3) the applicability of the statute to the OCS; and 4) the state agency or agencies charged with implementing the statute. Summaries within this document are not to be construed as an interpretation or a rewrite of the enforceable policy.

The user of this document is directed to the statutes and sections via the links provided in the document or by going to <http://www.leg.state.fl.us/Statutes/>. The text of the statute and section should be read in full to review its applicability to a specific project, activity, or action.
