The Beach and Shore Preservation Act [Section 161.091, Florida Statutes (F.S.)] charges the Florida Department of Environmental Protection (DEP) with developing and implementing a comprehensive, long-range statewide beach management plan. In fulfilling that responsibility, DEP has developed, in coordination with local sponsors and the U.S. Army Corps of Engineers (Corps), a Strategic Beach Management Plan (Strategic Plan), Long Range Budget Plan (Budget Plan) and prioritized list of specific beach erosion control projects for FY 2018-19, called the Local Government Funding Request (LGFR).

DEP developed the Strategic Plan to meet the intent of Section 161.091(2), F.S., to recommend actions that address the critically eroded shoreline on the Atlantic Ocean, Gulf of Mexico and Straits of Florida. The Strategic Plan divides the state into regions and sub-regions based upon geology and sand movement in order to promote regional solutions and cost effectiveness. Local governments may choose to become project sponsors and request state cost-sharing to implement projects consistent with the Strategic Plan.

The Budget Plan projects the 10-year planning needs for federal, state and local governments necessary to implement the Strategic Plan. The information contained within is based primarily upon formal projections for funding furnished to DEP from local sponsors. Federal costs have been estimated for planning purposes and are not verified by the Corps. The Budget Plan is divided into the same regions as the Strategic Plan. A map of the regions is presented on Page 2. A summary table of the projects by region is presented in the "Regional Summaries" section. The individual projects follow in their respective regional groupings, beginning with the Northeast Atlantic Coast and ending with the Panhandle Coast.

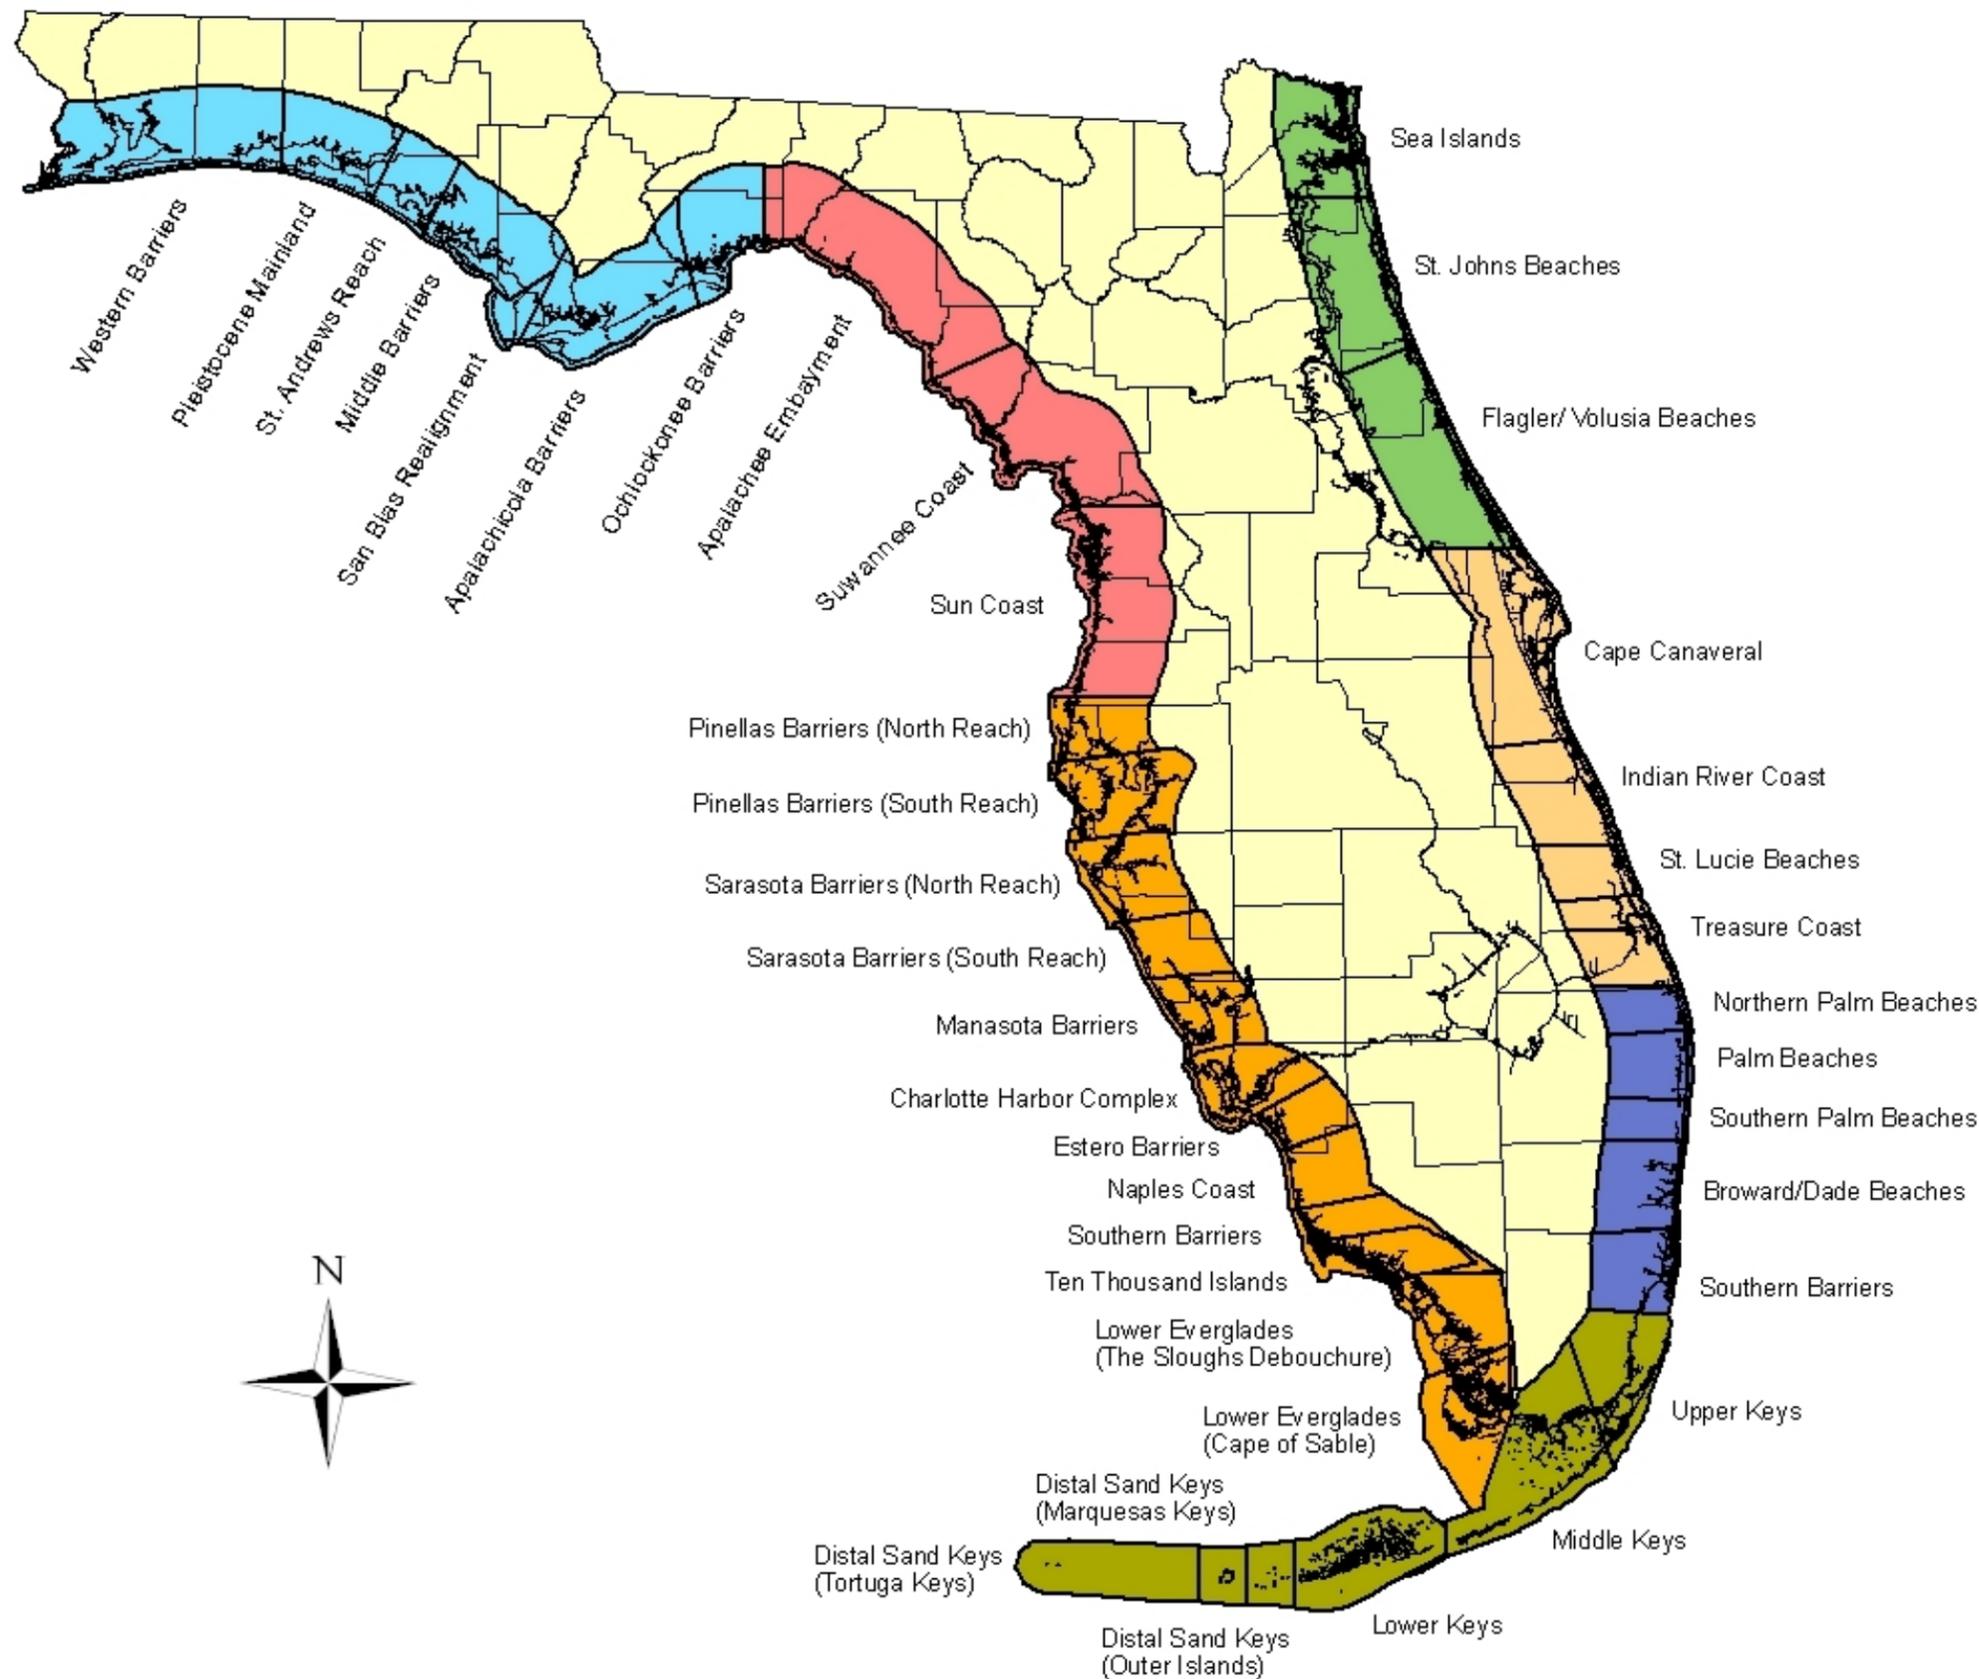

The first year of the Budget Plan summarizes DEPs LGFR submitted to the Florida Legislature for funding consideration in FY 2018-19. The first five years of each budget projects the estimated costs of the planned phase. Years 6 through 10 indicate the anticipated project phase only, as project costs are difficult to estimate more than five years in advance. Funding estimates for FY 2019-20 and beyond are subject to revision by the local sponsor and revalidation by DEP to reflect changes in project scope, cost estimates, project eligibility and availability of state, local and federal funds. Beach management projects require time to plan, design, finance, construct, monitor and maintain. The Budget Plan provides a statewide view of the many individual project efforts. It is used to encourage cooperation and coordination among the local, state and federal entities and organizations involved in managing Florida beaches.
