STATE OF FLORIDA
DOMESTIC WASTEWATER FACILITY PERMIT

PERMITTEE: [REDACTED]

RESPONSIBLE OFFICIAL:
[REDACTED]
[REDACTED]
[REDACTED]

FACILITY:
[REDACTED]
[REDACTED]
[REDACTED]

PERMIT NUMBER: [REDACTED]
FILE NUMBER: [REDACTED]
ISSUANCE DATE: [REDACTED]
EFFECTIVE DATE: [REDACTED]
EXPIRATION DATE: [REDACTED]

This permit is issued under the provisions of Chapter 403, Florida Statutes (F.S.), and applicable rules of the Florida Administrative Code (F.A.C.) and constitutes authorization to discharge to waters of the state under the National Pollutant Discharge Elimination System. This permit does not constitute authorization to discharge wastewater other than as expressly stated in this permit. The above-named permittee is hereby authorized to construct and operate the facilities in accordance with the documents attached hereto and specifically described as follows:

WASTEWATER TREATMENT:

The cover page of your permit is where you'll find some critical information:

- Currently listed permittee.
- Permit effective and expiration date.
- Under “WASTEWATER TREATMENT” is a brief description of treatment.
 - Authorized modifications to the plant may also be listed here.
- Reuse and Disposal is listed shortly after this section.

PERMIT SECTION I: MONITORING REQUIREMENTS

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

I. RECLAIMED WATER AND EFFLUENT LIMITATIONS AND MONITORING REQUIREMENTS

A. Underground Injection Control Systems

- During the period beginning on the effective date and lasting through the expiration date of this permit, the permittee is authorized to direct reclaimed water to Aquifer Storage and Recovery System U-001 located approximately at latitude [REDACTED]. Such reclaimed water shall be limited and monitored by the permittee as specified below and reported in accordance with Permit Condition I.C.8.:

Parameter	Units	Max /Min	Reclaimed Water Condition		Monitoring Requirements			Notes
			Limit	Statistical Basis	Frequency of Analysis	Sample Type	Monitoring Site Number	
Flow	MGD	Max Max	Report Report	Annual Average Monthly Average	Continuous	Recording Flow Meter with Totalizer	FLW-03	See I.A.4
Flow	MGD	Max Max	Report Report	Annual Average Monthly Average	Continuous	Recording Flow Meter with Totalizer	FLW-05	
BOD, Carbonaceous 5 day, 20C	mg/L	Max Max Max Max	20.0 30.0 45.0 60.0	Annual Average Monthly Average Weekly Average Single Sample	5 Days/Week	24-hr FPC	EFA-02	
Solids, Total Suspended	mg/L	Max Max Max Max	20.0 30.0 45.0 60.0	Annual Average Monthly Average Weekly Average Single Sample	5 Days/Week	24-hr FPC	EFA-02	
pH	s.u.	Min Max	6.0 8.5	Single Sample Single Sample	Continuous	Meter	EFA-02	See I.A.3

- Reclaimed water samples shall be taken at the monitoring site locations listed in Permit Condition I.A.1. and as described below:

Monitoring Site Number	Description of Monitoring Site
FLW-03	Flow meter for the first underground injection well.
FLW-05	Flow meter for the second underground injection well.
EFA-02	The discharge weir of the (basic-level disinfection) chlorine contact chamber.

Section I of the permit establishes some of your basic parameters and their sampling schedules.

- The tables in section I are directly related to the requirements of Discharge Monitoring Report (DMR) reporting.
- Frequency of Analysis, Sample Type and Monitoring Site Location are all found within this section.

PERMIT SECTION I: MONITORING REQUIREMENTS

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

B. Reuse and Land Application Systems

- During the period beginning on the effective date and lasting through the expiration date of this permit, the permittee is authorized to direct reclaimed water to Reuse System R-001. Such reclaimed water shall be limited and monitored by the permittee as specified below and reported in accordance with Permit Condition I.C.8.:

Parameter	Units	Reclaimed Water Limitations			Monitoring Requirements			Notes
		Max. /Min	Limit	Statistical Basis	Frequency of Analysis	Sample Type	Monitoring Site Number	
Flow	MGD	Max Max	Report Report	Annual Average Monthly Average	Continuous	Calculated	FLW-10	
Flow (from the East Port WRF)	MGD	Max Max	9.830 Report	Annual Average Monthly Average	Continuous	Recording Flow Meter with Totalizer	FLW-02	
BOD, Carbonaceous 5 day, 20C	mg/L	Max Max Max Max	20.0 30.0 45.0 60.0	Annual Average Monthly Average Weekly Average Single Sample	5 Days/Week	24-hr FPC	EFA-01	
Solids, Total Suspended	mg/L	Max	5.0	Single Sample	Daily; 24 hours	Grab	EFB-01	
Coliform, Fecal	#/100mL	Max	25	Single Sample	Daily; 24 hours	Grab	EFA-01	
Coliform, Fecal, % less than detection	percent	Min	75	Monthly Total	Daily; 24 hours	Calculated	EFA-01	See I.B.4
pH	s.u.	Min Max	6.0 8.5	Single Sample Single Sample	Continuous	Meter	EFA-01	See I.B.3
Chlorine, Total Residual (For Disinfection)	mg/L	Min	1.0	Single Sample	Continuous	Meter	EFA-01	See I.B.5, I.B.8, and I.B.14
Turbidity	NTU	Max	Report	Single Sample	Continuous	Meter	EFB-01	See I.B.6 and I.B.8
Giardia	cysts/100 L	Max	Report	Single Sample	Biennially; Every 2 years	Grab	EFA-01	See I.B.9
Cryptosporidium	oocysts/100L	Max	Report	Single Sample	Biennially; Every 2 years	Grab	EFA-01	See I.B.9
Nitrogen, Total	mg/L	Max	Report	Single Sample	5 Days/Week	24-hr FPC	EFA-01	
Phosphorus, Total (as P)	mg/L	Max	Report	Single Sample	5 Days/Week	24-hr FPC	EFA-01	
Overflow Use					Daily; 24			

Also found in section I is your monitoring requirements for any auxiliary or secondary reuse or disposal systems.

- Certain disposal/storage locations may have different requirements than the rest of your system.
- Pay close attention to this permit section as it defines how, when, and where you must test.
- Permit section I.B.7. (sometimes I.C.7.) clarifies the deadlines of any DMRs for monthly, quarterly, semiannual, or annual submittals.
- Please feel free to reach out to the department to discuss any monitoring requirements and their basis in the Florida Administrative Code (F.A.C).

PERMIT SECTION II: BIOSOLIDS MANAGEMENT

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

II. BIOSOLIDS MANAGEMENT REQUIREMENTS

A. Basic Requirements

1. Biosolids generated by this facility may be transferred to [REDACTED] or disposed of in a Class I solid waste landfill. Transferring biosolids to an alternative biosolids treatment facility does not require a permit modification. However, use of an alternative biosolids treatment facility requires submittal of a copy of the agreement pursuant to Rule 62-640.880(1)(c), F.A.C., along with a written notification to the Department at least 30 days before transport of the biosolids. [62-620.320(6), 62-640.880(1)]
2. The permittee shall monitor and keep records of the quantities of biosolids generated, received from source facilities, treated, distributed and marketed, land applied, used as a biofuel or for bioenergy, transferred to another facility, or landfilled. These records shall be kept for a minimum of five years. [62-640.650(4)(a)]
3. Biosolids quantities shall be monitored by the permittee as specified below. Results shall be reported on the permittee's Discharge Monitoring Report for Monitoring Group RMP-Q in accordance with Condition I.B.7.

Parameter	Units	Max./Min	Biosolids Limitation		Monitoring Requirements			Notes
			Limit	Statistical Basis	Frequency of Analysis	Sample Type	Monitoring Site Number	
Biosolids Quantity (Transferred)	dry tons	Max	Report	Monthly Total	Monthly	Calculated	RMP-01	
Biosolids Quantity (Landfilled)	dry tons	Max	Report	Monthly Total	Monthly	Calculated	RMP-01	

[62-640.650(5)(a)1]

4. Biosolids quantities shall be calculated as listed in Permit Condition II.3 and as described below:

Monitoring Site Number	Description of Monitoring Site Calculations
RMP-01	Calculated Monthly Total of Biosolids transferred, or landfilled. (per truck weight, flow measurements, calculated from total solids, etc.)

5. The treatment, management, transportation, use, land application, or disposal of biosolids shall not cause a violation of the odor prohibition in subsection 62-296.320(2), F.A.C. [62-640.400(6)]
6. Storage of biosolids or other solids at this facility shall be in accordance with the Facility Biosolids Storage Plan. [62-640.300(4)]

Section II of your permit is all about biosolids management.

- II.A.1. Clarifies where you may haul biosolids to. Hauling to any facility not directly mentioned in this subsection is explicitly prohibited, except for defined at the end of the subsection.
 - “Use of alternative biosolids treatment facility requires written notification to the Department **at least 30 days before** transport of the biosolids” (Rule 62-620.320 and 62-640.880(1) F.A.C.)
- To determine dry tons, please refer to page 15 of the [Helpful Tips for Completing DMRs](#) guidance document.

PERMIT SECTION II: BIOSOLIDS MANAGEMENT

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

II. BIOSOLIDS MANAGEMENT REQUIREMENTS

A. Basic Requirements

1. Biosolids generated by this facility may be transferred to [REDACTED] or disposed of in a Class I solid waste landfill. Transferring biosolids to an alternative biosolids treatment facility does not require a permit modification. However, use of an alternative biosolids treatment facility requires submittal of a copy of the agreement pursuant to Rule 62-640.880(1)(c), F.A.C., along with a written notification to the Department at least 30 days before transport of the biosolids. [62-620.320(6), 62-640.880(1)]
2. The permittee shall monitor and keep records of the quantities of biosolids generated, received from source facilities, treated, distributed and marketed, land applied, used as a biofuel or for bioenergy, transferred to another facility, or landfilled. These records shall be kept for a minimum of five years. [62-640.650(4)(a)]
3. Biosolids quantities shall be monitored by the permittee as specified below. Results shall be reported on the permittee's Discharge Monitoring Report for Monitoring Group RMP-Q in accordance with Condition I.B.7.

Parameter	Units	Max./Min	Biosolids Limitation		Monitoring Requirements			Notes
			Limit	Statistical Basis	Frequency of Analysis	Sample Type	Monitoring Site Number	
Biosolids Quantity (Transferred)	dry tons	Max	Report	Monthly Total	Monthly	Calculated	RMP-01	
Biosolids Quantity (Landfilled)	dry tons	Max	Report	Monthly Total	Monthly	Calculated	RMP-01	

[62-640.650(5)(a)1]

4. Biosolids quantities shall be calculated as listed in Permit Condition II.3 and as described below:

Monitoring Site Number	Description of Monitoring Site Calculations
RMP-01	Calculated Monthly Total of Biosolids transferred, or landfilled. (per truck weight, flow measurements, calculated from total solids, etc.)

5. The treatment, management, transportation, use, land application, or disposal of biosolids shall not cause a violation of the odor prohibition in subsection 62-296.320(2), F.A.C. [62-640.400(6)]
6. Storage of biosolids or other solids at this facility shall be in accordance with the Facility Biosolids Storage Plan. [62-640.300(4)]

If you do not have biosolids analyses results, you may estimate the percent total solids. Generally, liquid is approximately 1.5 - 2% total solids, and dewatered "cake" is approximately 15 - 20% total solids.

Example: 1,000 gallons of 2% total solids was hauled.

$$1,000 \text{ gal biosolids} \times 8.34 \text{ lb/gal} = 8,340 \text{ lbs.}$$

$$2\% \text{ of } 8,340 \text{ lbs.} = .02 \times 8,340 = 166.8 \text{ lbs.}$$

$$166.8 \text{ lbs.} / 2,000 \text{ lbs.} = 0.0834 \text{ dry tons hauled.}$$

The reported value on your DMR should be "0.0834."

PERMIT SECTION II: BIOSOLIDS MANAGEMENT

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

C. Transfer

1. The permittee shall not be held responsible for treatment and management violations that occur after its biosolids have been accepted by a permitted biosolids treatment facility with which the source facility has an agreement in accordance with subsection 62-640.880(1)(c), F.A.C., for further treatment, management, or disposal. [62-640.880(1)(b)]
2. The permittee shall keep hauling records to track the transport of biosolids between the facilities. The hauling records shall contain the following information:

Source Facility	Biosolids Treatment Facility or Treatment Facility
1. Date and time shipped	1. Date and time received
2. Amount of biosolids shipped	2. Amount of biosolids received
3. Degree of treatment (if applicable)	3. Name and ID number of source facility
4. Name and ID Number of treatment facility	4. Signature of hauler
5. Signature of responsible party at source facility	5. Signature of responsible party at treatment facility
6. Signature of hauler and name of hauling firm	

A copy of the source facility hauling records for each shipment shall be provided upon delivery of the biosolids to the biosolids treatment facility or treatment facility. The treatment facility permittee shall report to the Department within 24 hours of discovery any discrepancy in the quantity of biosolids leaving the source facility and arriving at the biosolids treatment facility or treatment facility.

[62-640.880(4)]

Permit section II.C.2. defines what must be recorded on all “hauling slips” or other documents recording the transfer of biosolids.

- According to rule, the original hauling documents should be kept on-site for a minimum of five years.
 - Audits of receiving facilities may result in requests of hauling records from the department from source facilities.
- If biosolids are reported on DMR RMP-Q, then hauling records must match the reported haul. The same is true in reverse.
 - Outside of the hauling of Sanitary Sewer Overflow clean-up, any hauling of biosolids, septage, and “other solids” should be reflected in the DMR and in hauling records.

PERMIT SECTION III: GROUND WATER REQUIREMENTS

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

III. GROUND WATER REQUIREMENTS

A. Construction Requirements

1. The permittee shall give at least 72-hour notice to the Department's South District Office, prior to the installation of any monitoring wells. [62-520.600(6)(h)]
2. Before construction of new ground water monitoring wells, a soil boring shall be made at each new monitoring well location to properly determine monitoring well specifications such as well depth, screen interval, screen slot, and filter pack. [62-520.600(6)(g)]
3. Within 30 days after installation of a monitoring well, the permittee shall submit to the Department's South District Office well completion reports and soil boring/lithologic logs on the DEP Form 62-520.900(3), Monitoring Well Completion Report. [62-520.600(6)(f) and .900(3)]
4. All piezometers and monitoring wells not part of the approved ground water monitoring plan shall be plugged and abandoned in accordance with Rule 62-532.500(5), F.A.C., unless future use is intended. [62-532.500(5)]

B. Operational Requirements

1. For the Part II land application system(s), all ground water quality criteria specified in Chapter 62-520, F.A.C., shall be met at the edge of the zone of discharge. The zone of discharge for Land Application Site R-002 shall extend horizontally 100 feet from the application site and vertically to the base of the shallow water table aquifer. [62-520.200(27)] [62-520.465]
2. For the Part III Public Access system, all ground water quality criteria specified in Chapter 62-520, F.A.C., shall be met at the edge of the zone of discharge. The zone of discharge shall extend horizontally 100 feet from the application site(s) or to the property boundaries, whichever is less, and vertically to the base of the surficial aquifer. [62-520.200(27)] [62-520.465]
3. The ground water minimum criteria specified in Rule 62-520.400 F.A.C., shall be met within the zone of discharge. [62-520.400 and 62-520.420(4)]
4. If the concentration for any constituent listed in Permit Condition III.7. in the natural background quality of the ground water is greater than the stated maximum, or in the case of pH is also less than the minimum, the representative background quality shall be the prevailing standard. [62-520.420(2)]
5. During the period of operation authorized by this permit, the permittee shall continue to sample ground water at the monitoring wells identified in Permit Conditions III.6. below in accordance with this permit and the approved ground water monitoring plan prepared in accordance with Rule 62-520.600, F.A.C. [62-520.600] [62-610.412] [62-610.463]

Permit section III is all about ground water. In this section you'll find:

- Construction requirements of wells.
- Operational requirements of wells.
- Monitoring requirements for ground water:
 - FS 2200 is the groundwater sampling Standard Operating Procedure.
- Lat/Long or GPS coordinates for wells.
- Abandonment rule reference:
 - All piezometers and monitoring wells not part of the approved ground water monitoring plan **shall be plugged and abandoned** in accordance with Rule 62-532.500(5), F.A.C., **unless future use is intended.**

PERMIT SECTION IV: ADDITIONAL REUSE

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

IV. ADDITIONAL REUSE AND LAND APPLICATION REQUIREMENTS

A. Part II Slow-Rate/Restricted Access System(s)

1. Advisory signs shall be posted around the site boundaries to designate the nature of the project area. [62-610.418(1)]
2. Routine aquatic weed control and regular maintenance of storage pond embankments and access areas are required. [62-610.414(8)]
3. The maximum annual average loading rate to the onsite sprayfields shall be limited to 2 inches per week. The hydraulic loading rate shall not produce surface runoff or ponding of the applied reclaimed water. [62-610.423(3) and (4)]
4. The crops or vegetation shall be periodically harvested and removed from the project area. [62-610.310(3)(d) and 62-610.419(1)(b)]
5. Dairy cattle whose milk is intended for human consumption shall not be allowed on the project area for a period of 15 days after the last application of reclaimed water. No restrictions are imposed on the grazing of other cattle. [62-610.425]
6. Irrigation of edible food crops is prohibited, unless all requirements of Part III of Chapter 62-610, F.A.C., are met. [62-610.475]
7. Overflows from emergency discharge facilities on storage ponds shall be reported as abnormal events in accordance with Permit Condition IX.20. [62-610.800(9)]
8. No cross-connections to potable water systems shall be allowed. The permittee shall submit documentation of Department acceptance for a cross-connection control and inspection program pursuant to Rule 62-555.360, F.A.C., for all public water supply systems located within the area to be served by reclaimed water. [62-610.469(7)(a)]

B. Part III Public Access System(s)

1. Use of reclaimed water is authorized within the general service area identified in the attached map. The following uses of reclaimed water are authorized within this general service area:

Golf Courses
Other Landscape Irrigation
Residential Developments

[62-620.630(10)(a)]

Permit section IV discusses additional reuse and land application requirements:

- For the majority of facilities, this will include information regarding signage around disposal sites, loading and resting procedures, information on absorption fields, etc.
- For the districts largest facilities, this section clarifies some important parameters:
 - Nature and requirements of signage.
 - Cross-connection control and inspection program requirements.
 - Capacity and acreage of reuse users.
 - Setback distances from public supply wells.
 - Hose bibb requirements and pipe coloration.
 - Abnormal event reporting requirements for storage pond overflows.

PERMIT SECTION V: OPERATION AND MAINTENANCE

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

V. OPERATION AND MAINTENANCE REQUIREMENTS

A. Staffing Requirements

1. During the period of operation authorized by this permit, the wastewater facilities shall be operated under the supervision of one or more operators certified in accordance with Chapter 62-602, F.A.C. In accordance with Chapter 62-699, F.A.C., this facility is a [REDACTED] and, at a minimum, operators with appropriate certification must be on the site as follows:

A Class C or higher operator 24 hours/day for 7 days/week. The lead/chief operator must be a Class A operator.

[62-620.630(3)][62-699.310] [62-610.462]

2. The lead/chief operator shall be employed at the plant full time. "Full time" shall mean at least 4 days per week, working a minimum of 35 hours per week, including leave time. A licensed operator shall be on-site and in charge of each required shift for periods of required staffing time when the lead/chief operator is not on-site. An operator meeting the lead/chief operator class for the treatment plant shall be available during all periods of plant operation. "Available" means able to be contacted as needed to initiate the appropriate action in a timely manner. *[62-699.311(10), (6) and (1)]*

B. Capacity Analysis Report and Operation and Maintenance Performance Report Requirements

1. The application to renew this permit shall include an updated capacity analysis report prepared in accordance with Rule 62-600.405, F.A.C. *[62-600.405(5)]*
2. The application to renew this permit shall include a detailed operation and maintenance performance report prepared in accordance with Rule 62-600.735, F.A.C. *[62-600.735(1)]*

C. Recordkeeping Requirements

1. The permittee shall maintain the following records and make them available for inspection at the following address: on the site of the permitted facility.
 - a. Records of all compliance monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, including, if applicable, a copy of the laboratory certification showing the certification number of the laboratory, for at least three years from the date the sample or measurement was taken;
 - b. Copies of all reports required by this permit for at least three years from the date the report was prepared;
 - c. Records of all data, including reports and documents, used to complete the application for this permit for at least three years from the date the application was filed;

Permit section V defines:

- Staffing requirements:
 - Staffing should be reflected both in the facility Logbook **and** at the bottom of DMR part B.
- Capacity Analysis Report requirements.
- Recordkeeping requirements:
 - While permit section V.C.1. does a good job of reflecting what must be required to be kept on site, it may not be non-exhaustive and may not fully reflect what is required to be on site on facility-to-facility basis.
 - For any questions for what is required for **your** facility, please either refer to the SOPs or reach out to your county's department inspector.

PERMIT SECTION VI: SCHEDULES

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

VI. SCHEDULES

1. The following improvement actions shall be completed according to the following schedule:

Improvement Action	Completion Date
1. Complete modifications listed on Pages 1 and 2	
2. Attain AWT standards	

[403.086, F.S.]

2. Prior to placing the modifications to existing facilities into operation or any individual unit processes into operation, for any purpose other than testing for leaks and equipment operation, the permittee shall complete and submit to the Department DEP Form 62-620.910(12), Notification of Completion of Construction for Wastewater Facilities or Activities. [62-620.410(7) and 62-620.630(2)]
3. The modified portions of the existing Part III reuse system shall not be placed in service for any purpose without written approval from the Department. For projects identified in the permit as being constructed in phases, written permission is only required for the first phase. Application for approval shall be made to the Department on DEP Form 62-610.300(4)(a)3., Application for Permission to Place a Public Access Reuse System in Operation. [62-610.800(7)]
4. Within six months after the facility modifications are placed in operation, the permittee shall provide written certification to the Department on Form 62-620.910(13) that record drawings pursuant to Chapter 62-620, F.A.C., and that an operation and maintenance manual pursuant to Chapters 62-600 and 62-610, F.A.C., as applicable, are available at the location specified on the form. [62-620.410(6) and 62-620.630(7)]
5. The permittee is not authorized to discharge to waters of the state after the expiration date of this permit, unless:
 - a. The permittee has applied for renewal of this permit at least 180 days before the expiration date of this permit using the appropriate forms listed in Rule 62-620.910, F.A.C., and in the manner established in the Department of Environmental Protection Guide to Permitting Wastewater Facilities or Activities Under

Permit section VI displays tables and requirements pertaining to schedules. Language in this section defines:

- Completion deadlines / Milestones.
- Notification of Completion of Construction requirements.
- Application(s) for Permission to place in service.
- Record drawing submittal requirements.
- Renewal deadlines.

PERMIT SECTION VII - IX: REMAINING SECTIONS

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

The sections of the permit following section VI clarify the following:

- Section VII: Industrial Pretreatment Program Requirements
 - If your facility has this requirement, please reach out to the department for any clarifications you may need.
- Section VIII: Other Specific Conditions
 - Provisions that may pertain to your facility (or category/class of facility) but not **all** facilities.
- Section IX: General Conditions
 - Provisions that apply equally to **all** Domestic Wastewater facilities.

CLOSING REMARKS AND QUESTIONS

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

HOW WE CAN ASSIST

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

How Can Dep Help You?

Compliance assistance: The department helps residents and businesses comply with environmental regulations through site visits and technical support. DEP's six regulatory district offices review permit applications, inspect permitted facilities, respond to reports of environmental damage, and conduct compliance assistance and enforcement.

Education and information: Sign up for a variety of digital newsletters, updates and announcements about the department's programs, activities and events.

Recognizing environmental stewardship: DEP encourages sound environmental practices through its sustainable initiative programs, including Clean Marinas, Green Lodging and Recycling Recognition.
