

# BE A GREEN GUEST

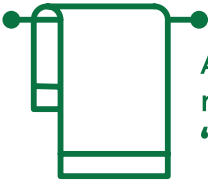

---

Dear guest,  
Every day, millions  
of gallons of water  
are used to wash  
towels that have only  
been used once.

---

## IT'S YOUR CHOICE:

A towel on the rack  
means:  
**"I will use again."**

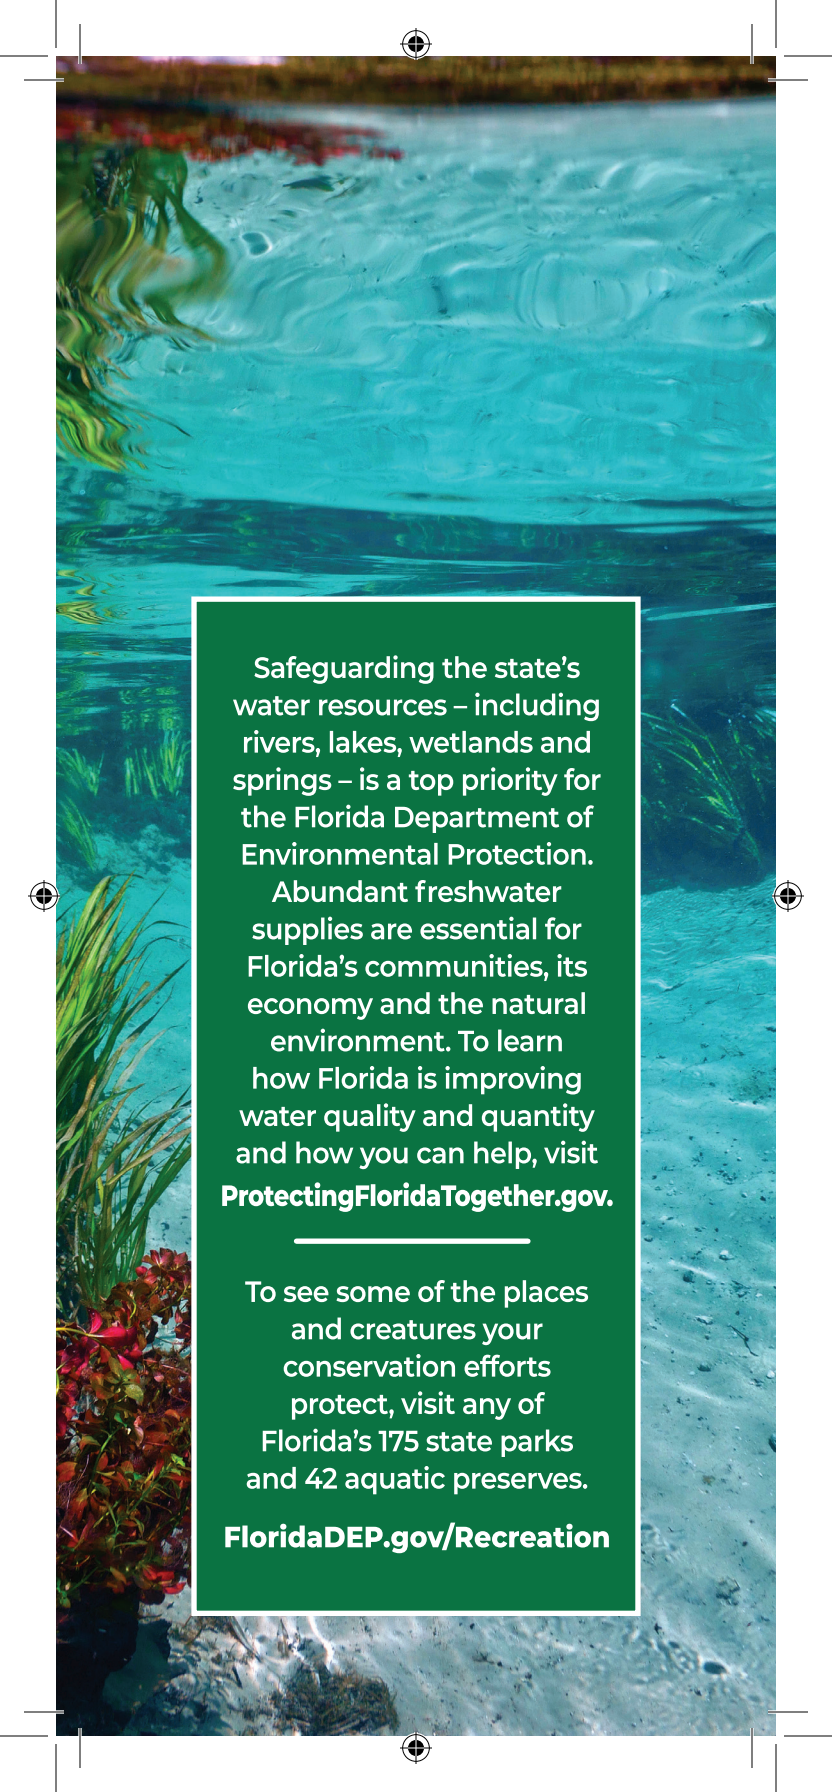

A towel on  
the floor means:  
**"Please  
replace."**

---

**THANK YOU**  
for helping us to  
conserve Florida's  
vital resources.

An underwater photograph showing clear, bright blue water. In the foreground, there are green seagrass blades and some reddish-brown plants. The water surface is visible at the top, with ripples and reflections. The overall scene is vibrant and clear.

Safeguarding the state's water resources – including rivers, lakes, wetlands and springs – is a top priority for the Florida Department of Environmental Protection.

Abundant freshwater supplies are essential for Florida's communities, its economy and the natural environment. To learn how Florida is improving water quality and quantity and how you can help, visit **[ProtectingFloridaTogether.gov](https://ProtectingFloridaTogether.gov)**.
