The SMWW program provides grant funds for the acquisition of interests in land for the restoration and preservation of working waterfronts directly used for the purposes of the commercial harvest of marine organisms or saltwater products by state-licensed commercial fishermen, aquaculturists, or business entities, including piers, wharves, docks, or other facilities operated to provide waterfront access to licensed commercial fishermen, aquaculturists, or business entities.

SMWW grant funds may also be used for the acquisition of interests in land for exhibitions, demonstrations, educational venues, civic events, and other purposes that promote and educate the public about the economic, cultural, and historic heritage of Florida's traditional working waterfronts, including the marketing of the seafood and aquaculture industries.

The acquisition of land used for recreational waterfront activities is not considered within the SMWW program.

## **WORKING WATERFRONT DEFINITION**

A Working Waterfront is defined in Section 380.503(18), F.S. as:

- a) A parcel or parcels of land directly used for the purposes of the commercial harvest of marine organisms or saltwater products by state-licensed commercial fishers, aquaculturists, or business entities, including piers, wharves, docks, or other facilities operated to provide waterfront access to licensed commercial fishers, aquaculturists, or business entities; or
- b) A parcel or parcels of land used for exhibitions, demonstrations, educational venues, civic events, and other purposes that promote and educate the public about the economic, cultural, and historic heritage of Florida's traditional working waterfronts, including the marketing of the seafood and aquaculture industries.

## **PROJECT REQUIREMENT**

The project proposed for funding in the grant application must clearly further the purposes of a working waterfront as defined above.

A Project Site is defined as a specific area(s), defined by a boundary map or legal description and Certified Survey, where Florida Forever Funds are proposed in an application to be used for all or a portion of the Acquisition. The Project Site may include up to three (3) ownerships. The Project Site may include non-contiguous parcels, so long as the non-contiguous areas are part of a unified scheme of development and management within the same working waterfronts and within 300 feet of each other. Applicants are encouraged to inventory available properties and determine which sites are most competitive (score the highest) by self-scoring the potential sites.

To minimize the possibility of encountering a prolonged or complicated site acquisition, it is strongly recommended that applicants also take into consideration any serious impediments to a successful real estate closing such as known environmental hazards, an unreasonable number of parcels to be acquired, or an unwilling seller.

## **ACQUISITION TYPES**

- **Fee Simple** – The Project Site will be a joint acquisition with both FCT and the applicant participating in the acquisition process. FCT shall be responsible for all acquisition activities.
- **Less-than-Fee-Working Waterfront Covenants** – FCT and the applicant will acquire a less than fee interest in the site – acquiring the development rights off the property while still allowing the owner to continue operation of the site as a working waterfront.

The use of condemnation or the threat of condemnation is not considered a Voluntarily-Negotiated Transaction. Parcels proposed to be acquired under these conditions do not qualify for acquisition under the SMWW program.

## **REQUIRED DUE DILIGENCE PRODUCTS:**

Although SMWW parcels may not be pre-acquired, the following documents must still be approved by FCT in order for grant funds to be dispersed:

- Title insurance commitments, including supporting documents; and title insurance policies, including any endorsements.

- Certified Survey of the parcel(s) dated within ninety (90) days of the date of acquisition of the parcel.
- Appraisal(s) (or two appraisals if the value is over \$1 million). Appraisals must be completed by a DEP Division of State Lands' approved appraiser.
- Environmental Site Assessment of the parcel dated within ninety (90) days of the date of acquisition of the parcel.
