

Small Quantity Generator (SQG) Re-Notification Fact Sheet

When must an SQG re-notify?

An SQG is required to re-notify every four years starting in 2021. The re-notification must be submitted by September 1 of the year that re-notification is required.

The first re-notification is due September 1, 2021

How does an SQG re-notify?

A Florida SQG will re-notify using form 8700-12FL Florida Notification of Regulated Waste Activity: <https://floridadep.gov/waste/permitting-compliance-assistance/forms/8700-12fl-florida-notification-regulated-waste-activity>

How early can I submit a notification, and have it count towards the re-notification requirement?

If an SQG has submitted a notification anytime within the four years before the deadline to meet this requirement, then the re-notification requirement has been fulfilled.

For example, if the SQG submitted a notification in November 2017, this meets the initial re-notification requirement. Even if the SQG has submitted a notification in the past four years prior to September 1, 2021, it is highly recommended that the SQG review the site information for accuracy and make any necessary updates to site information whenever it changes.

What is an SQG of hazardous waste?

A site that generates greater than 100 kg (220 pounds) but less than 1,000 kg (2,200 pounds) of non-acute hazardous waste; and less than or equal to 1 kg (2.2 pounds) of acute hazardous waste, and less than or equal to 100 kg (220 pounds) of residues from a cleanup of acute hazardous waste must notify and operate as a small quantity generator (SQG) of hazardous waste.

Additionally, as an SQG, the quantity of hazardous waste accumulated on-site must never exceed 6,000 kg (13,200 pounds). More information on the categories of hazardous waste generators can be found at the following EPA webpage: <https://www.epa.gov/hwgenerators/categories-hazardous-waste-generators>

What regulation requires SQGs to re-notify?

40 CFR 262.18(d)(1), adopted by reference at FAC 62-730.160(1).

Where can I get more information about the federal SQG re-notification requirement?

Further information on the SQG re-notification requirements can be found at the following EPA webpage: <https://www.epa.gov/hwgenerators/re-notification-requirement-small-quantity-generators>
