What best describes your interest in the reef?

FISHING

1. This draft Recommended Management Action (RMA) will result in an improvement to the coral reef ecosystem in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

LIKELY NOT

2. This draft Recommended Management Action (RMA) will result in an improvement to you life or livelihood in southeast Florida (Martin, Palm Beach, Broward, and Miami-Dade Counties).

DEFINITELY NOT

3. Do you support this draft Recommended Management Action (RMA)?

DEFINITELY NOT

4. What do you support, or how could this RMA be changed to an action you could support?

SCRAP IT. IT DOES NOT ADDRESS THE PROBLEM. IT IS A POLITICAL "FEEL

GOOD" SOLUTION

5. Other comments or input.

1. BAG LIMITS ON FISH ALREADY EXIST. ENFORCE EXISTING LAW

2. THE BIGGEST PROBLEM IS FRESH WATER BEING DUMPED INTO THE OCEAN THROUGH THE INLETS IN THE AFFECTED AREA, MUCH OF IT POLLUTED WITH FERTILIZER RUNOFF. PUT A LEASH ON THE SFWMD. AND HOLD AGRICULTURE ACCOUNTABLE FOR THEIR RUNOFF.

3. FOLLOW #1 AND 2 ABOVE AND THERE WILL BE NO NEED FOR THIS NONSENSE.

GARY JOHNSTON 2231 NE 35TH STREET LIGHTHOUSE POINT, FL 33064
954.309.1763

5. Other comments or input:

THESE "DRAFTS" SHOULD HAVE BEEN RESEARCHED
20 YEARS AGO WITH BETTER EXAMPLES OF EDUCATION OF OUR FISHERIES
AND POSITIVE ENFORCEMENT. ITS 20 YEARS TOO LATE. AS A CAPTAIN
OF CHARTER BOATS HERE IN MIAMI OVER 40 YEARS IM ASHAMED OF THE STATE
OF FLORIDA FOR HOW THE STATE HAS MANAGED OUR FISHERIES, WE ARE
ALL BARELY HANGING BY A THREAD TO SURVIVE, IMPLEMENT BETTER
EDUCATIONAL ASPECTS WHEN YOU APPLY FOR A FISHING LICENSE.

KNOWLEDGE IS KEY!

4. What do you support, or how could this RMA be changed to an action you could support?

I believe there are better ways to conserve and improve our reefs than closures. FWC has been doing a great job managing our fish stock and I have personally seen the benefits. We all have a right to enjoy our nature!

5. Other comments or input:

resources. The time, energy, and money should be spent on ways to IMPROVE not take away. Educating the public and providing mooring buoy works. It has worked in the Keys and will work here.

Thanks,

RMA #: N-12/6

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Increasing the size limit of the fish so that younger fish can continue to reproduce. Also, enforcing laws that require boaters, divers, and fishermen with experience under 5 years to take safety courses on responsibilities in the ocean.

5. Other comments or input:

Courses should teach about littering, taking care of grassbeds and coral reefs. Also, responsibility when driving a boat around these delicate areas.

4. What do you support, or how could this RMA be changed to an action you could support?

I believe that size restrictions & limits, as well as seasons in some instances, are all that is needed to protect the fish on our reefs.

5. Other comments or input:

Creating vast "no take" zones would change the lifestyles of recreational fishermen & be a life altering hit to the multitude of boat captains & mates who charter their boats for a living. This would also hurt the environment by causing those of us who fish or dive to use more fuel to get to the areas that are legal to fish.

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

I support conservation of the reef, but not complete conservation. I believe that it is important for the fishing community as a whole to want the best for our reefs. we can look at past actions, such as the temporary season on hogfish last year, to better further future actions.

5. Other comments or input:

I believe a increase in FWE officers on the water is just as important as any regulations. There needs to be a boat of officers enforcing regulations at areas such as Stillsville, Lewis cut, Caesars creek and angelfish creek. These are popular cuts where many boaters fishing or diving on the reef come in and out of.

Definitely So Likely Not Sure Likely Not Definitely Not

3. Do you support this draft Recommended Management Action (RMA)?

Definitely So Likely Not Sure Likely Not Definitely Not

4. What do you support, or how could this RMA be changed to an action you could support?

Do support protecting the coral reef ecosystem but not the way it's being conducted without scientific research and complete lock down of said areas. The effects of water pollution, water runoff, rising water temperatures and evasive marine species are not mentioned.

5. Other comments or input:

Be specific as to the main causes of coral reef and marine reduction per area by proper scientific research and then tackle each of those areas with detailed steps towards ecosystem rehabilitation showing proof that such measures will bring positive results.
